Activity 7

Margins are the white space left between the edge of the paper and the print. When the right and left margins are increased, the length of the line of text will be decreased. When the top and bottom margins are increased, the number of lines of text that can be placed on a page will be decreased.

Of course, increasing or decreasing the size of the font also changes the amount of text that appears on a page. You will understand this concept better when you learn about fonts later in the book.

Activity 8

1. Click the I-beam where you want the line spacing changed.
2. Access the Line Spacing feature.
3. Specify the line spacing.
4. Begin or continue keying.

Activity 11

Theodore Roosevelt: *“Much has been given us, and much will rightfully be expected from us. We have duties to others and duties to ourselves; and we can shirk neither.”*

Woodrow Wilson: *“We have built up, moreover, a great system of government, which has stood through a long age as in many respects a model for those who seek to set liberty upon foundations that will endure against fortuitous change, against storm and accident.”*

Harry S. Truman: *“The American people stand firm in the faith which has inspired this Nation from the beginning. We believe that all men have a right to equal justice under law and equal opportunity to share in the common good. We believe that all men have the right to freedom of thought and expression.”*

Ronald Reagan: *“We are a nation that has a government--not the other way around. And this makes us special among the nations of the Earth. Our government has no power except that granted it by the people. It is time to check and reverse the growth of government, which shows signs of having grown beyond the consent of the governed.”*

Math Skills

1. Ben uses his word processing software's built-in Help system to access the software manufacturer's Web site. He sees that there are a number of software updates that he can download for free. He selects a security update and sees that the application is 7.25 MB. He begins the download process. At one point, a message box opens that says the download is 40% complete. How much of the application has been downloaded?

Answer: Students should first convert 40% to a decimal (.40). Then, $7.25 \times .40 = 2.9$ MB.

2. If 1 megabyte (MB) equals 1,048,576 bytes, how many bytes is the security update? (*Hint:* When multiplying by a decimal, count the total number of decimal places in both factors and then insert a decimal point in the answer so that it has the same total number of decimal places as the factors.)

Answer: $7.25 \times 1,048,576 = 7,602,176$

3. After downloading the update, Ben wants to find out how much hard disk space he has left on his computer. The size of his hard disk is 148 GB and $\frac{3}{4}$ of the space is being used. How many gigabytes are still free?

Answer: Students should convert 148 to a fraction: $\frac{148}{1}$. Then, multiply the two fractions: $\frac{148}{1} \times \frac{3}{4} = \frac{444}{4} = 111$ GB that are being used. $148 - 111 = 37$ GB that are still free.

4. Ben reviews the contents and properties of his main working folder on his hard disk. The folder contains a total of 256 files. Of the total, roughly $\frac{1}{3}$ are word processing documents; $\frac{1}{4}$ are presentation files; $\frac{1}{6}$ are picture files; $\frac{1}{8}$ are spreadsheet files; and the remaining $\frac{1}{8}$ are various other formats. How many of each type of file are in the folder? (Round to the nearest whole number.)

Answer: About 85 are word processing documents; 64 are presentation files; 43 are picture files; 32 are spreadsheet files; and 32 are other formats.
