14) In the phenomenon of groupthink, the team may arrive at poor-quality decisions and even act unethically.
Answer: TRUE
Explanation: Groupthink can lead a team into making disastrous decisions. The essence of groupthink usually lies in two dynamics: one person or a few people dominating the agenda, and others in the group who are afraid to speak up or drowned out when they do speak up. The result is a false consensus in which the group seems to have debated all of the important issues and arrived at an optimum outcome, when in reality the group saw only a small part of the entire picture and came to somewhat arbitrary, rather than informed, conclusions.

C) let all members use their own preferred software.
D) make the team as large as possible so that every possible area of expertise will be covered.
E) compose as a group.
Answer: A
Explanation: A) The actual composition is the only part of developing team messages that does not usually benefit from group participation. For longer projects, it's efficient to plan, research, and outline together; however, assign the task of writing to one person or divide larger projects among multiple writers. If you divide the writing, try to have one person do a final revision pass to ensure a consistent style.

Sites such as LinkedIn and Xing link people together in a particular business community. For example, professional orchestra musicians may keep in touch with one another and the trends and opportunities in their vocation through LinkedIn, monitoring such things as job opportunities, concert schedules, and gossip on their virtual community.

C) you should expect poor results.
D) members should always meet in person and never rely on meeting technologies.
E) members should avoid trying to reach consensus, since it is nearly impossible.
Answer: A
Explanation: A) Teams typically evolve through a number of phases on their way to becoming productive. One commonly used model identifies the phases a problem-solving team goes through as it evolves. The first one is orientation. Team members socialize, establish their roles, and begin to define their task or purpose. Team-building exercises and activities can help teams break down barriers and develop a sense of shared purpose. For geographically dispersed virtual teams, creating a "team operating agreement" that sets expectations for online meetings, communication processes, and decision-making can help overcome the disadvantages of distance. New teams can provide extraordinary results and reach a consensus if allowed to evolve.

Answer: B
Explanation: B) An extranet is a restricted site that is available to employees and to outside parties by invitation only. Answer A is a firewall or similar tool to protect computers against malware and viruses. 31) Discuss the concept of unified communication as it applies to mobile communication and collaboration.
Answer: Today's mobile systems can do virtually everything that fixed-web collaboration systems can do, from writing on virtual whiteboards to sharing photos, videos, and other multimedia files. Therefore, they add another layer of options for collaborative writing and other communication projects, particularly when used with cloud computing. Given the flexibility of mobile devices, however, an important aspect of mobile collaboration and communication in general is unified communication, which integrates such capabilities as voice and video calling/conferencing, instant messaging, and real-time collaboration software in a single system. By minimizing or eliminating the need to manage multiple communication systems and devices, unified communication can improve response times, productivity, and collaboration.

A) preparing carefully.
B) allowing anyone interested in the topic to attend.
C) limit participation during the meeting to supervisors.
D) minimize your participation during the meeting.
E) develop a flexible agenda.
Answer: A
Explanation: A) Meetings can be a waste of time if they aren't planned and managed well. You can help ensure productive meetings by preparing carefully, conducting meetings efficiently, and using meeting technologies wisely. Before the meeting begins, carefully select participants, identify the purpose of the meeting, and set the meeting's location and agenda. In some situations, when attempting to identify the purpose for a meeting or setting its agenda, you may decide that the purpose or agenda are unclear or inappropriate. In that case, cancel the meeting to avoid wasting people's time.

A) before the meeting.
B) at the start of the meeting.
C) during the meeting.
D) after the meeting.
E) as participates arrive.
Answer: A
Explanation: A) The success of a meeting depends on the preparation of the participants. Therefore, distribute the agenda before the meeting begins, being sure to allow participants sufficient time to prepare for the meeting. Allow participants to review the meeting agenda before the meeting begins. That way, they can have the option of doing some preparing of their own for the meeting, which may include researching, compiling data, or preparing documents.

B) allow introverted participants to disengage from the meeting.
C) try to simply act as an observer, and let the meeting "run itself."
D) allow individuals to decide their individual roles.
E) follow a predetermined agenda.
Answer: E
Explanation: E) Effective meeting leaders keep the discussion on track, follow agreed-upon rules, encourage participation, participate actively, and close effectively. In meetings, it is natural for some people to be more involved and for some people to dominate the discourse. However, when extremes of these trends occur, the person running the meeting must take action. A participant may be fairly quiet during the meeting, for example, but it is not acceptable for that person to be completely disengaged. Similarly, a dominant participant who lets no one else get a word in edgewise must be managed, or the meeting will produce no meaningful results.

A) is much easier than doing so face-to-face.
B) is virtually impossible.
C) dramatically reduces the distractions participants must overcome.
D) requires extra planning before the meeting and more diligence during the meeting.
E) eliminates the need for anyone to take minutes.
Answer: D
Explanation: D) Conducting successful meetings over the phone or online requires extra planning before the meeting and more diligence during the meeting. Because virtual meetings offer less visual contact and nonverbal communication than in-person meetings, leaders need to make sure everyone stays engaged and has the opportunity to contribute. Paying attention during online meetings takes greater effort as well. Participants need to stay committed to the meeting and resist the temptation to work on unrelated tasks. So it is harder, but not impossible, to do it. It also increases distractions and does not eliminate the need for someone to take minutes.

Shared workspaces are "virtual offices" that give everyone on a team access to a variety of materials. Videoconferencing combines audio communication with live video, enabling team members to see each other, demonstrate products, and transmit other visual information. Web-based meeting systems allow teams to collaborate in real time simply by logging on from any computer or smartphone from almost anywhere in the world.

52) If you are listening mainly to understand the speaker's message, you are engaging in
A) content listening.
B) critical listening.
C) empathic listening.
D) active listening.
E) selective listening.
Answer: A
Explanation: A) With content listening, the listener's primary focus is simply in comprehending what the speaker is saying. Content listening should be the default listening mode for most situations. Once the listener has a strong grasp of the speaker's basic message, he or she can move on to higher forms of listening, such as critical listening or empathic listening.

C) evaluate the logic and validity of the message.
D) appreciate the speaker's point of view.
E) find flaws in the speaker's ideas as quickly as possible.
Answer: C

Seeking answers to questions such as the following enables critical listening: Does the speaker's position make sense? Are the points that the speaker brings up valid and appropriate? Overall, does the case that the speaker presents stand up to scrutiny?

A) content listening.
B) empathic listening.
C) critical listening.
D) sustained listening.
E) defensive listening.
Answer: B
Explanation: B) When the issue involves emotions and feelings, empathic listening should be employed. Rather than immediately telling the speaker what to do, it is important simply to let the speaker have his or her say and to listen intently to show that you understand and that you sympathize. Once the speaker feels that the issue has been truly "heard," you can move on to more practical issues, like how to schedule the leave of absence.

A) 10
B) 25
C) 50
D) 75
E) 90
Answer: C
Explanation: C) Since people tend to forget half of what they hear, it is important to focus on clarity when you are speaking. It is also important to recognize that you are likely to forget a substantial portion of what you hear, so the important points that a speaker makes should be reviewed and made clear.

59) Selective listening refers to
A) a highly focused form of listening.
B) letting one's mind wander until something personally relevant is said.
C) a form of defensive listening.
D) listening only long enough to form an opinion.
E) a timesaving technique in which you ignore at least 25% of what is being said.
Answer: B
Explanation: B) Selective listening occurs when the listener tends to tune in and tune out rather than listen consistently. In almost every case, the listener is at fault in engaging in selective listening for failing to focus. However, in some instances, the speaker can also share some of the responsibility for the confusion by speaking in a rambling or incoherent manner that makes it difficult for the listener to follow.

A) defensive listening
B) content listening
C) critical listening
D) empathetic listening
E) selective listening
Answer: C
Explanation: C) The goal of critical listening is to understand and evaluate the meaning of the speaker's message on several levels: the logic of the argument, the strength of the evidence, the validity of the conclusions, the implications of the message, the speaker's intentions and motives, and the omission of any important or relevant points.

A) can think faster than speakers can speak.
B) concentrate on each word the speaker says, rather than the overall point.
C) are unable to think originally.
D) cannot process words and phrases as quickly as speakers can say them.
E) do all of the above.
Answer: A
Explanation: A) One reason listeners' minds tend to wander is that people think faster than they speak. Most people speak at about 120 to 150 words per minute, but listeners can process audio information at up to 500 words per minute or more. Consequently, your brain has a lot of free time whenever you are listening, and if left unsupervised, it will find a thousand other things to think about. Make the effort to focus on the speaker and use the extra time to analyze and paraphrase what you hear or to take relevant notes. Listeners do not concentrate on each individual word said and can process information much faster than is spoken.

D) allowing your mind to multitask while others are speaking.
E) working to overhear coworkers' conversations, even if they are unaware that you are listening.
Answer: C

B) works only if you have special training.
C) requires that you stop everyone from speaking so you can repeat what you hope to remember.
D) can be a useful strategy.
E) is far more effective than writing the information down.
Answer: D
Explanation: D) Mnemonics is one technique to help store information in long-term memory. You can create mnemonics such as acronyms or rhymes. One example of a mnemonic is "Please Excuse My Dear Aunt Sally" for following algebra rules (Parentheses, Exponents, Multiplication, Division, Addition, and Subtraction). As one can see, it is not a waste of time, and you do not need special training.

In this type of listening, the listener's goal is to evaluate the message on various levels. Finally, empathic listening is most useful when a speaker is primarily interested in sharing feelings. E) is the primary vehicle for expressing emotion.
Answer: D
Explanation: D) Each culture has its own informal rules for touch. In dealing with people from other cultures, it is best to be flexible and adaptable when it comes to touch. C) it pays to be careful, since others might interpret things very differently than you intended.
D) eye contact is a universal symbol of respect.
E) don't forget that you can never smile too much.
Answer: C
Explanation: C) Nonverbal communication is the interpersonal process of sending and receiving information (intentionally or unintentionally) without using written or spoken language. Even when your intentions are good, you can still misinterpret incoming messages if you and the speaker do not have a shared background in language or experience. Ultimately, the receiver is the one who decodes the message and must determine what the signals mean. Furthermore, many behaviors are influenced by culture. In some cultures, sustained eye contact or excessive smiling may be disrespectful.

99) Identify and discuss five tips that can help you use the phone confidently and professionally.
Answer: When you're using the phone at work, you have to rely on your attitude and tone of voice to convey confidence and professionalism. Here are some tips that can help: Be conscious of how your voice sounds. Avoid monotone; vary your pitch and inflections. Slow down when talking with people whose native language isn't the same as yours. Be courteous when you call someone. Identify yourself and your organization, briefly explain why you're calling, verify that you've called at a good time, and minimize the noise level in your environment. Convey a positive, professional attitude when you answer the phone. Answer promptly (with a smile), and identify yourself and your company. Determine the caller's needs by asking, "How may I help you?" If you can't answer the caller's questions, forward the call to a colleague who can or tell the caller how to get his or her questions resolved. If you plan to forward a call, put the caller on hold and verify that the colleague is available. Close in a positive manner and double-check all vital information. Use your own voicemail features to help callers. Record a brief, professional-sounding outgoing message for regular use. When you'll be away from the phone for an extended period, record a temporary greeting that tells callers when you'll respond to messages. If you don't check your messages regularly or at all, disable your voicemail. Be considerate when leaving voicemail messages. Unless voicemail is the best or only choice, consider leaving a message through other means, such as text messaging or email. If you leave a voicemail, keep it brief: your name, number, reason for calling, and times you can be reached.
