

Chapter 02

Cost Concepts and Behavior

True / False Questions

1. The cost of an item is the sacrifice of resources made to acquire it.

True False

2. An expense is a cost charged against revenue in an accounting period.

True False

3. If a cost is recorded as an asset (for example, prepaid rent for an office building), it becomes an expense when the asset has been consumed.

True False

4. Accounting systems typically record opportunity costs as assets and treat them as intangible items on the financial statements.

True False

5. Total cost of goods purchased minus beginning merchandise inventory plus ending merchandise inventory equals cost of goods sold.

True False

6. Cost of goods sold includes the actual costs of the goods sold and the costs required to sell them to the customer.

True False

7. Period costs are those costs assigned to units of production in the period in which they are incurred.

True False

8. Only direct costs can be classified as product costs; indirect costs are classified as period costs.

True False

9. The three categories of product costs are direct materials, direct labor, and manufacturing overhead.

True False

10. The first step in determining whether a cost is direct or indirect is to specify the cost allocation rule.

True False

11. Total work-in-process during the period is the sum of the beginning work-in-process inventory and the total manufacturing costs incurred during the period.

True False

12. Cost of goods sold plus the ending finished goods inventory minus the beginning finished goods inventory equals the cost of goods manufactured.

True False

13. If the cost of goods manufactured during the period exceeds the cost of goods sold, the ending balance of Finished Goods Inventory account increased.

True False

14. Total variable costs change inversely with changes in the volume of activity.

True False

15. Fixed costs per unit change inversely with changes in the volume of activity.

True False

16. The range within which fixed costs remain constant as volume of activity varies is known as the relevant range.

True False

17. The term full cost refers to the cost of manufacturing and selling a unit of product and includes both fixed and variable costs.

True False

18. Variable marketing and administrative costs are included in determining full absorption costs.

True False

19. Revenue minus cost of goods sold equals contribution margin.

True False

20. The primary goal of the cost accounting system is to provide managers with information to prepare their annual financial statements.

True False

Multiple Choice Questions

21. An opportunity cost is

- A. a cost that is charged against revenue in an accounting period.
- B. the foregone benefit from the best alternative course of action.
- C. the excess of operating revenues over operating costs.
- D. the cost assigned to the products sold during the period.

22. Which of the following statements is (are) true?

- (1). An asset is a cost that will be matched with revenues in a future accounting period.
- (2). Opportunity costs are recorded as intangible assets in the current accounting period.

- A. Only (1) is true.
- B. Only (2) is true.
- C. Both (1) and (2) are true.
- D. Neither (1) nor (2) are true.

23. Which of the following statements is (are) **false**?

(1). In general, the term expense is used for managerial purposes, while the term cost refers to external financial reports.

(2). An opportunity cost is the benefit forgone by selecting one alternative over another.

A. Only (1) is false.

B. Only (2) is false.

C. Both (1) and (2) are false.

D. Neither (1) nor (2) are false.

24. Which of the following best distinguishes an opportunity cost from an outlay cost?

A. Opportunity costs are recorded, whereas outlay costs are not.

B. Outlay costs are speculative in nature, whereas opportunity costs are easily traceable to products.

C. Opportunity costs have very little utility in practical applications, whereas outlay costs are always relevant.

D. Opportunity costs are sacrifices from foregone alternative uses of resources, whereas outlay costs are cash outflows.

25. Which of the following accounts would be a period cost rather than a product cost?

A. Depreciation on manufacturing machinery.

B. Maintenance on factory machines.

C. Production manager's salary.

D. Freight out.

26. A company which manufactures custom-made machinery routinely incurs sizable telephone costs in the process of taking sales orders from customers. Which of the following is a proper classification of this cost?

- A. Product cost
- B. Period cost
- C. Conversion cost
- D. Prime cost

27. For a manufacturing company, which of the following is an example of a period cost rather than a product cost?

- A. Wages of salespersons.
- B. Salaries of machine operators.
- C. Insurance on factory equipment.
- D. Depreciation of factory equipment.

28. Tallon Company manufactures a single product. The product's prime costs consist of

- A. direct material and direct labor.
- B. direct material and factory overhead.
- C. direct labor and factory overhead.
- D. direct material, direct labor and factory overhead.

29. The cost of fire insurance for a manufacturing plant is generally considered to be a:

- A. product cost.
- B. period cost.
- C. variable cost.
- D. all of these.

30. An example of a period cost is:

- A. fire insurance on a factory building.
- B. salary of a factory supervisor.
- C. direct materials.
- D. rent on a headquarters building.

31. Transportation costs incurred by a manufacturing company to ship its product to its customers would be classified as which of the following?

- A. Product cost
- B. Manufacturing overhead
- C. Period cost
- D. Administrative cost

32. Doran Technical Company has set up a toll-free telephone line for customer inquiries regarding computer hardware produced by the company. The cost of this toll-free line would be classified as which of the following?

- A. Product cost
- B. Manufacturing overhead
- C. Direct labor
- D. Period cost

33. Which of the following costs is both a prime cost and a conversion cost?

- A. direct materials
- B. direct labor
- C. manufacturing overhead
- D. administrative costs

34. Marketing costs include all of the following **except**:

- A. Advertising.
- B. Shipping costs.
- C. Sales commissions.
- D. Legal and accounting fees.

35. Property taxes on the manufacturing facility are an element of

	Conversion Cost	Period Cost
a.	No	No
b.	No	Yes
c.	Yes	No
d.	Yes	Yes

- A. Option A
- B. Option B
- C. Option C
- D. Option D

36. The cost of the direct labor will be treated as an expense on the income statement when the resulting:

- A. payroll costs are paid.
- B. payroll costs are incurred.
- C. products are completed.
- D. products are sold.

37. Calculate the conversion costs from the following information:

Fixed manufacturing overhead	\$2,000
Variable manufacturing overhead	1,000
Direct materials	2,500
Direct labor	1,500

- A. \$3,000
- B. \$4,000
- C. \$4,500
- D. \$5,000

38. The corporate controller's salary would be considered a(n):

- A. manufacturing cost.
- B. product cost.
- C. administrative cost.
- D. selling expense.

39. The costs of direct materials are classified as:

	Conversion cost	Manufacturing cost	Prime cost
A)	Yes	Yes	Yes
B)	No	No	No
C)	Yes	Yes	No
D)	No	Yes	Yes

- A. Choice A
- B. Choice B
- C. Choice C
- D. Choice D

40. Grover Company has the following data for the production and sale of 2,000 units.

Sales price per unit	\$800 per unit
Fixed costs:	
Marketing and administrative	\$400,000 per period
Manufacturing overhead	\$200,000 per period
Variable costs:	
Marketing and administrative	\$50 per unit
Manufacturing overhead	\$80 per unit
Direct labor	\$100 per unit
Direct Materials	\$200 per unit

What is the conversion cost per unit?

- A. \$100
- B. \$180
- C. \$280
- D. \$380

41. Grover Company has the following data for the production and sale of 2,000 units.

Sales price per unit	\$800 per unit
Fixed costs:	
Marketing and administrative	\$400,000 per period
Manufacturing overhead	\$200,000 per period
Variable costs:	
Marketing and administrative	\$50 per unit
Manufacturing overhead	\$80 per unit
Direct labor	\$100 per unit
Direct Materials	\$200 per unit

What is the prime cost per unit?

- A. \$100
- B. \$280
- C. \$300
- D. \$480

42. Which one of the following costs is classified as a period cost? (CIA adapted)

- A. The wages of the workers on the shipping docks who load completed products onto outgoing trucks.
- B. The wages of a worker paid for idle time resulting from a machine breakdown in the molding department.
- C. The payments for employee (fringe) benefits paid on behalf of the workers in the manufacturing plant.
- D. The wages paid to workers for reworking defective products that failed the quality inspection upon completion.

43. The following cost data for the month of May were taken from the records of the Terrence Manufacturing Company: (CIA adapted)

Depreciation on factory equipment	\$1,000
Depreciation on sales office	500
Advertising	7,000
Wages of production workers	28,000
Raw materials used	47,000
Sales salaries and commissions	10,000
Factory rent	2,000
Factory insurance	500
Materials handling	1,500
Administrative salaries	2,000

Based upon this information, the manufacturing cost incurred during the month was:

- A. \$78,500.
- B. \$80,000.
- C. \$80,500.
- D. \$83,000.

44. Which of the following is **not** a name for indirect resources?

- A. Overhead costs
- B. Burden
- C. Direct costs
- D. Common costs

45. Which of the following should be considered part of a manufacturing company's direct labor cost?

- A. Factory supervisor's salary
- B. Forklift operator's hourly wages
- C. Employer-paid health insurance on factory assemblers' wages
- D. Cost of idle time

46. Tulsa Company, (a merchandising Co.) has the following data pertaining to the year ended December 31, 2016: (CPA adapted)

Purchases	\$450,000
Beginning inventory	170,000
Ending inventory	210,000
Freight-in	50,000
Freight-out	75,000

What is the cost of goods sold for the year?

- A. \$385,000
- B. \$460,000
- C. \$485,000
- D. \$536,000

47. The Shoal Company's manufacturing costs for the third quarter of 2016 were as follows: (CPA adapted)

Direct materials and direct labor	\$700,000
Other variable manufacturing costs	100,000
Depreciation of factory building and manufacturing equipment	80,000
Other fixed manufacturing costs	18,000

What amount should be considered product costs for external reporting purposes?

- A. \$700,000
- B. \$800,000
- C. \$880,000
- D. \$898,000

48. The three basic elements of manufacturing cost are direct materials, direct labor, and:

- A. cost of goods manufactured.
- B. cost of goods sold.
- C. work in process.
- D. manufacturing overhead.

49. Prime cost consists of direct materials combined with:

- A. direct labor.
- B. manufacturing overhead.
- C. indirect materials.
- D. cost of goods manufactured.

50. Classifying a cost as either direct or indirect depends upon
- A. whether an expenditure is unavoidable because it cannot be changed regardless of any action taken.
 - B. whether the cost is expensed in the period in which it is incurred.
 - C. the behavior of the cost in response to volume changes.
 - D. the cost object to which the cost is being related.

51. The process of assigning indirect costs to products, services, people, business units, etc., is

- A. cost object.
- B. cost pool.
- C. cost allocation.
- D. opportunity cost.

52. A _____ is any end to which a cost is assigned.

- A. cost object
- B. cost pool
- C. cost allocation
- D. opportunity cost

53. A cost allocation rule is the method or process used to assign the costs in the _____ to the _____.

- A. cost allocation; cost pool
- B. cost pool; opportunity cost
- C. cost object; cost pool
- D. cost pool; cost object

54. The beginning Work-in-Process inventory plus the total of the manufacturing costs equals

- A. total finished goods during the period.
- B. cost of goods sold for the period.
- C. total work-in-process during the period.
- D. cost of goods manufactured for the period.

55. A product cost is deducted from revenue when

- A. the finished goods are sold.
- B. the expenditure is incurred.
- C. the production process takes place.
- D. the production process is completed.

56. The amount of direct materials issued to production is found by
- A. subtracting ending work in process from total work in process during the period.
 - B. adding beginning direct materials inventory and the delivered cost of direct materials.
 - C. subtracting ending direct materials from direct materials available for production.
 - D. adding delivered cost of materials, labor, and manufacturing overhead.
57. The beginning Finished Goods Inventory plus the cost of goods manufactured equals
- A. ending finished goods inventory.
 - B. cost of goods sold for the period.
 - C. total work-in-process during the period.
 - D. cost of goods available for sale for the period.
58. Direct labor would be part of the cost of the ending inventory for which of these accounts?
- A. Work-in-Process.
 - B. Finished Goods.
 - C. Direct Materials and Work-in-Process.
 - D. Work-in-Process and Finished Goods.

59. The Work-in-Process Inventory of the Model Fabricating Corp. was \$3,000 higher on December 31, 2016 than it was on January 1, 2016. This implies that in 2016:

- A. cost of goods manufactured was higher than cost of goods sold.
- B. cost of goods manufactured was less than total manufacturing costs.
- C. manufacturing costs were higher than cost of goods sold.
- D. manufacturing costs were less than cost of goods manufactured.

60. Which of the following is **not** a product cost under full-absorption costing?

- A. Direct materials used in the current period
- B. Rent for the warehouse used to store direct materials
- C. Salaries paid to the top management in the company
- D. Vacation pay accrued for the production workers

61. The term "gross margin" for a manufacturing firm refers to the excess of sales over:

- A. cost of goods sold, excluding fixed indirect manufacturing costs.
- B. all variable costs, including variable marketing and administrative costs.
- C. cost of goods sold, including fixed indirect manufacturing costs.
- D. variable costs, excluding variable marketing and administrative costs.

62. Given the following information for a retail company, what is the total cost of goods purchased for the period?

Purchases discounts	\$3,500
Transportation-in	6,700
Ending inventory	35,000
Gross merchandise cost	304,000
Purchases returns	8,400
Beginning inventory	27,000
Sales discounts	10,300

- A. \$298,800
- B. \$290,800
- C. \$282,100
- D. \$304,000

63. A company had beginning inventories as follows: Direct Materials, \$300; Work-in-Process, \$500; Finished Goods, \$700. It had ending inventories as follows: Direct Materials, \$400; Work-in-Process, \$600; Finished Goods, \$800. Material Purchases (net including freight) were \$1,400, Direct Labor \$1,500, and Manufacturing Overhead \$1,600. What is the Cost of Goods Sold for the period?

- A. \$4,100.
- B. \$4,200.
- C. \$4,300.
- D. \$4,400.

64. Compute the Cost of Goods Sold for 2016 using the following information:

Direct Materials, Jan. 1, 2016	\$40,000
Work-in-Process, Dec. 31, 2016	69,000
Direct Labor	48,500
Finished Goods, Dec. 31, 2016	105,000
Finished Goods, Jan. 1, 2016	128,000
Manufacturing Overhead	72,500
Direct Materials, Dec. 31, 2016	43,000
Work-in Process, Jan. 1, 2016	87,000
Purchases of Direct Material	75,000

- A. \$244,000
- B. \$234,000
- C. \$211,000
- D. \$198,000

65. Foxburg Company has the following information:

	Work-in- Process	Finished Goods	Materials
Beginning inventory	\$300	\$400	\$500
Ending inventory	700	900	1,500
Purchases of materials	\$7,700		
Cost of Goods Sold	\$15,600		
Manufacturing overhead	\$4,300		

What was the direct labor for the period?

- A. \$5,500.
- B. \$5,800.
- C. \$6,300.
- D. \$6,800.

66. Foxburg Company has the following information:

	Work-in- Process	Finished Goods	Materials
Beginning inventory	\$300	\$400	\$500
Ending inventory	700	900	1,500
Purchases of materials (net)	\$7,700		
Cost of Goods Sold	\$15,600		
Manufacturing overhead	\$4,300		

What was the cost of goods available for sale for the period?

- A. \$16,800
- B. \$16,500
- C. \$16,100
- D. \$15,100

67. During the year, a manufacturing company had the following operating results:

Beginning work-in-process inventory	\$45,000
Beginning finished goods inventory	\$190,000
Direct materials used in production	\$308,000
Direct labor	\$475,000
Manufacturing overhead incurred	\$250,000
Ending work-in-process inventory	\$67,000
Ending finished goods inventory	\$89,000

What is the cost of goods manufactured for the year?

- A. \$1,011,000
- B. \$1,134,000
- C. \$1,033,000
- D. \$1,112,000

68. During April, the Meade Enterprises had the following operating results:

Sales revenue	\$1,500,000
Gross margin	\$600,000
Ending work-in-process inventory	\$50,000
Beginning work-in-process inventory	\$80,000
Ending finished goods inventory	\$100,000
Beginning finished goods inventory	\$125,000
Marketing costs	\$250,000
Administrative costs	\$150,000

What is the cost of goods manufactured for April?

- A. \$900,000
- B. \$875,000
- C. \$925,000
- D. \$905,000

69. How would property taxes paid on a factory building be classified in a manufacturing company?

- A. Fixed, period cost.
- B. Fixed, product cost.
- C. Variable, period cost.
- D. Variable, product cost.

70. How would miscellaneous supplies used in assembling a product be classified for a manufacturing company?

- A. Fixed, period cost.
- B. Fixed, product cost.
- C. Variable, period cost.
- D. Variable, product cost.

71. How would a 5% sales commission paid to sales personnel be classified in a manufacturing company?

- A. Fixed, period cost.
- B. Fixed, product cost.
- C. Variable, period cost.
- D. Variable, product cost.

72. The student health center employs one doctor, three nurses, and several other employees. How would you classify (1) the nurses' salary and (2) film and other materials used in radiology to give X-rays to students? Assume the activity is the number of students visiting the health center.

	Nurse's Salaries	Film and Other Materials Used in Radiology
a.	Fixed cost	Fixed cost
b.	Fixed cost	Variable cost
c.	Variable cost	Fixed cost
d.	Variable cost	Variable cost

- A. Option A
- B. Option B
- C. Option C
- D. Option D

73. Barton's Taco Tico has four taco makers and ten other employees who take orders from customers and perform other tasks. The four taco makers and the other employees are paid an hourly wage. How would one classify (1) the wages paid to the taco makers and other employees and (2) materials (e.g., cheeses, salsa, tomatoes, lettuce, taco shells, etc.) used to make the tacos? Assume the activity is the number of tacos made.

	Employees' Wages	Materials to Make the Tacos
A.	Fixed cost	Fixed cost
B.	Fixed cost	Variable cost
C.	Variable cost	Fixed cost
D.	Variable cost	Variable cost

- A. Choice A
- B. Choice B
- C. Choice C
- D. Choice D

74. The difference between variable costs and fixed costs is (CMA adapted)

- A. Unit variable costs fluctuate and unit fixed costs remain constant.
- B. Unit variable costs are fixed over the relevant range and unit fixed costs are variable.
- C. Total variable costs are constant over the relevant range, while fixed costs change in the long-term.
- D. Total variable costs are variable over the relevant range but fixed in the long-term, while fixed costs never change.

75. Which terms below correctly describe the cost of the black paint used to paint the dots on a pair of dice?

	Variable Cost	Administrative Cost
A)	Yes	Yes
B)	Yes	No
C)	No	Yes
D)	No	No

- A. Choice A
- B. Choice B
- C. Choice C
- D. Choice D

76. Manufacturing overhead:

- A. can be either a variable cost or a fixed cost.
- B. includes the costs of shipping finished goods to customers.
- C. includes all factory labor costs.
- D. includes all fixed costs.

77. Which of the following statements is(are) true?

(1). The term full cost refers to the cost of manufacturing and selling a unit of product and includes both fixed and variable costs.

(2). The fixed cost per unit is considered constant despite changes in volume of activity within the relevant range.

A. Only (1) is true.

B. Only (2) is true.

C. Both (1) and (2) are true.

D. Neither (1) nor (2) are true.

78. The estimated unit costs for a company to produce and sell a product at a level of 12,000 units per month are as follows:

Cost Item	Estimated Unit Cost
Direct material	\$32
Direct labor	20
Variable manufacturing overhead	15
Fixed manufacturing overhead	6
Variable selling expenses	3
Fixed selling expenses	4

What are the estimated conversion costs per unit?

- A. \$35
- B. \$41
- C. \$44
- D. \$48

79. The estimated unit costs for a company to produce and sell a product at a level of 12,000 units per month are as follows:

Cost Item	Estimated Unit Cost
Direct material	\$32
Direct labor	20
Variable manufacturing overhead	15
Fixed manufacturing overhead	6
Variable selling expenses	3
Fixed selling expenses	4

What are the estimated prime costs per unit?

- A. \$73
- B. \$32
- C. \$67
- D. \$52

80. The estimated unit costs for a company to produce and sell a product at a level of 12,000 units per month are as follows:

Cost Item	Estimated Unit Cost
Direct material	\$32
Direct labor	20
Variable manufacturing overhead	15
Fixed manufacturing overhead	6
Variable selling expenses	3
Fixed selling expenses	4

What are the estimated variable costs per unit?

- A. \$70
- B. \$38
- C. \$67
- D. \$52

81. Grover Company has the following data for the production and sale of 2,000 units.

Sales price per unit	\$800 per unit
Fixed costs:	
Marketing and administrative	\$400,000 per period
Manufacturing overhead	\$200,000 per period
Variable costs:	
Marketing and administrative	\$50 per unit
Manufacturing overhead	\$80 per unit
Direct labor	\$100 per unit
Direct materials	\$200 per unit

What is the variable manufacturing cost per unit?

- A. \$380
- B. \$430
- C. \$480
- D. \$730

82. Grover Company has the following data for the production and sale of 2,000 units.

Sales price per unit	\$800 per unit
Fixed costs:	
Marketing and administrative	\$400,000 per period
Manufacturing overhead	\$200,000 per period
Variable costs:	
Marketing and administrative	\$50 per unit
Manufacturing overhead	\$80 per unit
Direct labor	\$100 per unit
Direct materials	\$200 per unit

What is the total manufacturing cost per unit?

- A. \$380
- B. \$430
- C. \$480
- D. \$730

83. Grover Company has the following data for the production and sale of 2,000 units.

Sales price per unit	\$800 per unit
Fixed costs:	
Marketing and administrative	\$400,000 per period
Manufacturing overhead	\$200,000 per period
Variable costs:	
Marketing and administrative	\$50 per unit
Manufacturing overhead	\$80 per unit
Direct labor	\$100 per unit
Direct materials	\$200 per unit

What is the full cost per unit of making and selling the product?

- A. \$430
- B. \$480
- C. \$530
- D. \$730

84. Grover Company has the following data for the production and sale of 2,000 units.

Sales price per unit	\$800 per unit
Fixed costs:	
Marketing and administrative	\$400,000 per period
Manufacturing overhead	\$200,000 per period
Variable costs:	
Marketing and administrative	\$50 per unit
Manufacturing overhead	\$80 per unit
Direct labor	\$100 per unit
Direct materials	\$200 per unit

What is the contribution margin per unit?

- A. \$70
- B. \$320
- C. \$370
- D. \$430

85. The following information was collected from the accounting records of the Part SX9 for 3,000 units:

	Per Unit	Per Period
Sales price	\$350	
Direct Materials	80	
Direct Labor	40	
Overhead	60	\$90,000
Marketing	20	
Administrative		60,000

What is Part SX9's total cost per unit?

- A. \$180.
- B. \$200.
- C. \$210.
- D. \$250.

86. Mountainburg Industries has developed two new products but has only enough plant capacity to introduce one product during the current year. The following data will assist management in deciding which product should be selected.

Mountainburg's fixed overhead includes rent and utilities, equipment depreciation, and supervisory salaries. Selling and administrative expenses are **not** allocated to individual products.

	Product L	Product W
Direct materials	\$44	\$36
Machining labor (\$12/hour)	18	15
Assembly labor (\$10/hour)	30	10
Variable overhead (\$8/hour)	36	18
Fixed overhead (4/hour)	<u>18</u>	<u>9</u>
Total Manufacturing Cost	<u>\$146</u>	<u>\$88</u>
Estimated selling price per unit	\$170	\$100
Actual research and development costs	\$240,000	\$175,000
Estimated advertising costs	\$500,000	\$350,000

For Mountainburg's Product L, the costs for direct material, machining labor, and assembly labor represent

- A. Conversion costs.
- B. Period costs.
- C. Prime costs.
- D. Common costs.

87. Mountainburg Industries has developed two new products but has only enough plant capacity to introduce one product during the current year. The following data will assist management in deciding which product should be selected.

Mountainburg's fixed overhead includes rent and utilities, equipment depreciation, and supervisory salaries. Selling and administrative expenses are **not** allocated to individual products.

	Product L	Product W
Direct materials	\$44	\$36
Machining labor (\$12/hour)	18	15
Assembly labor (\$10/hour)	30	10
Variable overhead (\$8/hour)	36	18
Fixed overhead (4/hour)	<u>18</u>	<u>9</u>
Total Manufacturing Cost	<u>\$146</u>	<u>\$88</u>
Estimated selling price per unit	\$170	\$100
Actual research and development costs	\$240,000	\$175,000
Estimated advertising costs	\$500,000	\$350,000

The difference between the \$100 estimated selling price for Mountainburg's Product W and its total cost of \$88 represents

- A. Contribution margin per unit.
- B. Gross margin per unit.
- C. Variable cost per unit.
- D. Operating profit per unit.

88. Mountainburg Industries has developed two new products but has only enough plant capacity to introduce one product during the current year. The following data will assist management in deciding which product should be selected.

Mountainburg's fixed overhead includes rent and utilities, equipment depreciation, and supervisory salaries. Selling and administrative expenses are **not** allocated to individual products.

	Product L	Product W
Direct materials	\$44	\$36
Machining labor (\$12/hour)	18	15
Assembly labor (\$10/hour)	30	10
Variable overhead (\$8/hour)	36	18
Fixed overhead (\$4/hour)	<u>18</u>	<u>9</u>
Total Manufacturing Cost	<u>\$146</u>	<u>\$88</u>
Estimated selling price per unit	\$170	\$100
Actual research and development costs	\$240,000	\$175,000
Estimated advertising costs	\$500,000	\$350,000

The total overhead cost of \$27 for Mountainburg's Product W is a(n)

- A. Sunk cost.
- B. Opportunity cost.
- C. Variable cost.
- D. Mixed cost.

89. Mountainburg Industries has developed two new products but has only enough plant capacity to introduce one product during the current year. The following data will assist management in deciding which product should be selected.

Mountainburg's fixed overhead includes rent and utilities, equipment depreciation, and supervisory salaries. Selling and administrative expenses are **not** allocated to individual products.

	Product L	Product W
Direct materials	\$44	\$36
Machining labor (\$12/hour)	18	15
Assembly labor (\$10/hour)	30	10
Variable overhead (\$8/hour)	36	18
Fixed overhead (4/hour)	<u>18</u>	<u>9</u>
Total Manufacturing Cost	<u>\$146</u>	<u>\$88</u>
Estimated selling price per unit	\$170	\$100
Actual research and development costs	\$240,000	\$175,000
Estimated advertising costs	\$500,000	\$350,000

Research and development costs for Mountainburg's two new products are

- A. Prime costs.
- B. Conversion costs.
- C. Opportunity costs.
- D. Sunk costs.

90. Mountainburg Industries has developed two new products but has only enough plant capacity to introduce one product during the current year. The following data will assist management in deciding which product should be selected.

Mountainburg's fixed overhead includes rent and utilities, equipment depreciation, and supervisory salaries. Selling and administrative expenses are **not** allocated to individual products.

	Product L	Product W
Direct materials	\$44	\$36
Machining labor (\$12/hour)	18	15
Assembly labor (\$10/hour)	30	10
Variable overhead (\$8/hour)	36	18
Fixed overhead (4/hour)	<u>18</u>	<u>9</u>
Total Manufacturing Cost	<u>\$146</u>	<u>\$88</u>
Estimated selling price per unit	\$170	\$100
Actual research and development costs	\$240,000	\$175,000
Estimated advertising costs	\$500,000	\$350,000

The advertising costs for the product selected by Mountainburg will be

- A. Prime costs.
- B. Conversion costs.
- C. Period costs.
- D. Opportunity costs.

91. Under full absorption costing, which of the following are included in product costs?

- A. Only direct materials and direct labor.
- B. Only variable manufacturing costs.
- C. Only conversion costs.
- D. All fixed and variable manufacturing costs.

92. Ramos Company has the following unit costs:

Variable manufacturing overhead	\$13
Direct materials	12
Direct labor	17
Fixed manufacturing overhead	10
Fixed marketing and administrative	8

What cost per unit would be used for product costing under full absorption costing?

- A. \$29
- B. \$42
- C. \$52
- D. \$60

93. Ramos Company has the following unit costs:

Variable manufacturing overhead	\$13
Direct materials	12
Direct labor	17
Fixed manufacturing overhead	10
Fixed marketing and administrative	8

What cost per unit would be used for product costing under variable costing?

- A. \$29
- B. \$42
- C. \$52
- D. \$60

94. Vegas Company has the following unit costs:

Variable manufacturing overhead	\$25
Direct materials	20
Direct labor	19
Fixed manufacturing overhead	12
Variable marketing and administrative	7

Vegas produced and sold 10,000 units. If the product sells for \$100, what is the gross margin?

- A. \$170,000
- B. \$240,000
- C. \$290,000
- D. \$360,000

95. Vegas Company has the following unit costs:

Variable manufacturing overhead	\$25
Direct materials	20
Direct labor	19
Fixed manufacturing overhead	12
Variable marketing and administrative	7

Vegas produced and sold 10,000 units. If the product sells for \$100, what is the contribution margin?

- A. \$170,000
- B. \$240,000
- C. \$290,000
- D. \$360,000

96. Vegas Company has the following unit costs:

Variable manufacturing overhead	\$25
Direct materials	20
Direct labor	19
Fixed manufacturing overhead	12
Variable marketing and administrative	7

Vegas produced and sold 10,000 units. If the product sells for \$100, what is the operating profit under full absorption costing?

- A. \$170,000
- B. \$240,000
- C. \$290,000
- D. \$360,000

97. Vegas Company has the following unit costs:

Variable manufacturing overhead	\$25
Direct materials	20
Direct labor	19
Fixed manufacturing overhead	12
Variable marketing and administrative	7

Vegas produced and sold 10,000 units. If the product sells for \$100, what is the operating profit using a contribution margin income statement?

- A. \$170,000
- B. \$240,000
- C. \$290,000
- D. \$360,000

98. Beginning inventory in units	0
Units produced	4,800
Units sold	4,000
Sales	\$400,000
Material cost (unit level or variable)	\$96,000
Variable conversion cost used (Committed)	\$48,000
Facility-level or fixed manufacturing cost	\$72,000
Indirect operating costs (fixed)	\$80,000

The variable cost of goods sold is:

- A. \$110,000
- B. \$120,000
- C. \$144,000
- D. \$40,000

99. Beginning inventory in units	0
Units produced	4,800
Units sold	4,000
Sales	\$400,000
Material cost (unit level or variable)	\$96,000
Variable conversion cost used (Committed)	\$48,000
Facility-level or fixed manufacturing cost	\$72,000
Indirect operating costs (fixed)	\$80,000

The absorption cost of goods sold is:

- A. \$246,667
- B. \$120,000
- C. \$180,000
- D. \$40,000

100. Beginning inventory in units	0
Units produced	4,800
Units sold	4,000
Sales	\$400,000
Material cost (unit level or variable)	\$96,000
Variable conversion cost used (Committed)	\$48,000
Facility-level or fixed manufacturing cost	\$72,000
Indirect operating costs (fixed)	\$80,000

The variable operating income is:

- A. \$120,000
- B. \$140,000
- C. \$104,000
- D. \$128,000

101. Beginning inventory in units	0
Units produced	4,800
Units sold	4,000
Sales	\$400,000
Material cost (unit level or variable)	\$96,000
Variable conversion cost used (Committed)	\$48,000
Facility-level or fixed manufacturing cost	\$72,000
Indirect operating costs (fixed)	\$80,000

The absorption operating income is:

- A. \$120,000
- B. \$140,000
- C. \$128,000
- D. \$112,000

102. Beginning inventory in units	0
Units produced	4,800
Units sold	4,000
Sales	\$400,000
Material cost (unit level or variable)	\$96,000
Variable conversion cost used (Committed)	\$48,000
Facility-level or fixed manufacturing cost	\$72,000
Indirect operating costs (fixed)	\$80,000

The variable ending inventory is:

- A. \$36,000
- B. \$8,000
- C. \$40,000
- D. \$24,000

103. Beginning inventory in units	0
Units produced	4,800
Units sold	4,000
Sales	\$400,000
Material cost (unit level or variable)	\$96,000
Variable conversion cost used (Committed)	\$48,000
Facility-level or fixed manufacturing cost	\$72,000
Indirect operating costs (fixed)	\$80,000

The absorption ending inventory is:

- A. \$40,000
- B. \$24,000
- C. \$36,000
- D. \$8,000

104. Beginning inventory in units	0
Units produced	4,800
Units sold	4,000
Sales	\$400,000
Material cost (unit level or variable)	\$96,000
Variable conversion cost used (Committed)	\$48,000
Facility-level or fixed manufacturing cost	\$72,000
Indirect operating costs (fixed)	\$80,000

The difference between the variable ending inventory cost and the absorption ending inventory cost is:

- A. 800 units times \$15 per unit indirect manufacturing cost
- B. 800 units times \$10 per unit material cost
- C. 800 units times \$20 per unit variable conversion cost plus \$15 per unit indirect manufacturing cost
- D. 800 units times \$20 per unit variable conversion cost plus \$15 per unit indirect manufacturing cost plus \$16.67 per unit indirect operating costs

105. Absorption costing measures contribution to profit as:

- A. Sales less unit level costs spent of goods sold
- B. Sales less variable costs of goods sold
- C. Sales less absorption cost of goods sold
- D. Sales less all costs including operating expenses

106. Inventoriable costs:

- A. include only the prime costs of manufacturing a product.
- B. include only the conversion costs of providing a service.
- C. exclude fixed manufacturing costs.
- D. are regarded as assets until the units are sold.

Essay Questions

107. The following information is available for the Weston Consulting Company for the fiscal year ended December 31.

Gross margin	\$170,000
Operating profit	\$65,500
Revenues	\$809,000
Income tax rate	34%

Required:

- (a) Compute the cost of services sold.
- (b) Compute the total marketing and administrative costs.
- (c) Compute net income.

108. The following information is available for the Cherryville Enterprises, Inc. for the fiscal year ended December 31.

Revenues	\$900,000
Gross margin	\$315,000
Operating profit	85,000
Income tax rate	32%

Required:

- (a) Compute the cost of goods sold.
- (b) Compute the total marketing and administrative costs.
- (c) Compute net income.

109. The following information is available for the Tenor Music Store for the fiscal year ended December 31.

Ending inventory	\$100,100
Transportation-in costs	\$8,900
Purchase discounts	\$15,000
Beginning inventory	\$79,000
Merchandise cost	\$450,000
Purchase returns and allowances	\$6,200
Sales revenue	\$800,000
Sales discounts	\$12,500

Required:

- (a) Prepare a cost of goods sold statement for Tenor Music Store.
- (b) Compute the gross margin for the fiscal year ended December 31.

110. **Required:**

For each of the following costs incurred in a manufacturing company, indicate whether the costs are (a) fixed or variable and (b) product costs or period costs.

	Cost Item	Fixed	Variable	Product	Period
0	Annual audit and tax return fees	X			X
1	Costs (other than food) of running the cafeteria for factory personnel				
2	Direct materials used				
3	Clerical staff in administrative offices				
4	Depreciation of factory machinery*				
5	Property taxes on the factory				
6	Insurance premiums on delivery vans				
7	Factory custodian pay				
8	Sales commissions				
9	Rent paid for corporate jet				
10	Transportation-in costs for indirect				

	material				
--	----------	--	--	--	--

*Straight-line depreciation method used.

111. The Torchdown Company began operations several years ago. The company purchased a building and, since only half of the space was needed for operations, the remaining space was rented to another firm for rental revenue of \$20,000 per year. The success of Torchdown Company's product has resulted in the company needing more space. The renter's lease will expire next month and Torchdown will **not** renew the lease in order to use the space to expand operations and meet demand.

The company's product requires direct materials that cost \$25 per unit. The company employs a production supervisor whose salary is \$2,000 per month. Production line workers are paid \$15 per hour to manufacture and assemble the product. The company rents the equipment needed to produce the product at a rental cost of \$1,500 per month. Additional equipment will be needed as production is expanded and the monthly rental charge for this equipment will be \$900 per month. The building is depreciated on a straight-line basis at \$9,000 per year.

The company spends \$40,000 per year to market the product. Shipping costs for each unit are \$20 per unit. The cost of electricity and other utilities used for product is \$2 per unit. The company plans to liquidate several investments in order to expand production. These investments currently earn a return of \$8,000 per year.

Required:

Complete the answer sheet that follows by placing an "X" under each heading that identifies the cost involved. The "X's" can be placed under *more than one heading* for a single cost, e.g., a cost might be a variable cost, and an overhead cost.

	Name of cost	Variable cost	Fixed cost	Direct materials	Direct labor	Mfg overhead	Period cost	Opportunity cost
1	Amount that can be earned renting building							
2	Cost of							

	direct materials							
3	Salary of production supervisor							
4	Cost of direct labor							
5	Equipment rental cost							
6	Depreciation on building							
7	Marketing costs							
8	Shipping costs							
9	Electrical costs							
10	Foregone investment income							

112. The following cost and inventory data were taken from the records of the Flagstaff Company for the year:

Costs incurred:

Depreciation, factory equipment	\$30,000
Depreciation, office equipment	7,000
Supplies, factory	1,500
Maintenance, factory equipment	20,000
Utilities, factory	8,000
Sales commissions	30,000
Indirect labor	54,500
Rent, factory building	70,000
Purchases of direct materials (net)	124,000
Direct labor	80,000
Advertising expense	90,000

Inventories:		
	January 1	December 31
Direct materials	\$9,000	\$11,000
Work in process	6,000	21,000
Finished goods	69,000	24,000

Required:

- (a) Compute the cost of goods manufactured.
- (b) Prepare a cost of goods sold statement.

113. The Foxboro Manufacturing Company provided you with the following information for the fiscal year ended December 31.

Work-in-process inventory, 12/31	\$57,900
Finished goods inventory, 1/1	307,400
Direct labor costs incurred	1,004,300
Manufacturing overhead costs	2,693,400
Direct materials inventory, 1/1	250,800
Finished goods inventory, 12/31	511,000
Direct materials purchased	1,750,200
Work-in-process inventory, 1/1	101,000
Direct materials inventory, 12/31	169,400

Required:

- (a) Compute the total manufacturing costs incurred during the year.
- (b) Compute the total work-in-process during the year.
- (c) Compute the cost of goods manufactured during the year.
- (d) Compute the cost of goods sold during the year.
- (e) Compute the total prime costs for the year.
- (f) Compute the total conversion costs for the year.

114. The cost accountant for the Corner Manufacturing Company has provided you with the following information for the month of July:

	Variable costs Per unit	Total Fixed Costs
Direct labor	\$27.50	
Direct materials	84.75	
Manufacturing overhead	14.25	\$120,000
Marketing costs	5.30	50,000
Administrative costs	2.90	75,000

Required:

Compute the following *per unit* items, assuming the company produced and sold 5,000 units at a price of \$210.00 per unit.

- (a) Total variable cost
- (b) Variable inventoriable cost
- (c) Full absorption cost
- (d) Full cost
- (e) Contribution margin
- (f) Gross margin
- (g) Profit margin

115. The cost accountant for the Friendly Manufacturing Company has provided you with the following information for the month of July:

	Variable costs Per unit	Total Fixed Costs
Direct labor	\$27.50	
Direct materials	84.75	
Manufacturing overhead	14.25	\$120,000
Marketing costs	5.30	50,000
Administrative costs	2.90	75,000
Selling price	210.00	

Required:

Assuming the company produced and sold 5,000 units, and there were no units in inventory on July 1, prepare the following income statements for the month of July:

- (a) Contribution margin income statement.
- (b) Gross margin income statement.

116. Shuster Industries manufactures baseballs and identified the following costs associated with their manufacturing activity (V = Variable; F = Fixed). The following information is available for the month of June when 25,000 baseballs were produced, but only 23,500 baseballs were sold.

Power to run plant equipment (V)	\$25,000
Other selling costs (V)	\$149,150
Indirect labor (F)	\$50,000
Property taxes on building (F)	\$12,500
Marketing costs (V)	\$30,000
Factory Supervisor salaries (F)	\$125,000
Direct materials used (V)	\$500,000
Depreciation on plant equipment (F)	\$68,000
Shipping costs to customer (V)	\$48,800
Indirect material and supplies (V)	\$37,500
Direct labor (V)	\$250,000
Administrative salaries (F)	\$300,000
Insurance on factory building (F)	\$62,500
Utilities, factory (V)	\$50,000
General office costs (F)	\$48,000

Required:

Compute the following amounts for July, assuming 30,000 baseballs were produced and sold:

(Assume normal production ranges from 15,000 to 40,000 baseballs)

- (a) Total manufacturing costs.
- (b) Total conversion costs.
- (c) Period costs per unit.
- (d) Full costs per unit.

117. Each column below is independent and for a different company. Use the data given, which refer to one year for each example, to find the unknown account balances.

	Company Southeast	Central	Northwest
Direct materials inventory, January 1	(a)	\$3,920	\$16,640
Direct materials inventory, December 31	\$4,850	3,248	14,664
Work-in-process inventory, January 1	2,700	7,526	85,696
Work-in-process inventory, December 31	3,800	3,472	79,800
Finished goods inventory, January 1	1,900	(d)	17,888
Finished goods inventory, December 31	300	4,928	29,536
Purchases of direct materials	16,100	13,440	66,768
Cost of goods manufactured during this year	(b)	30,486	326,320
Total manufacturing costs	55,550	26,432	320,424
Cost of goods sold	56,050	30,464	314,673
Gross margin	(c)	18,368	666,931
Direct labor	26,450	4,256	129,688
Direct materials used	15,300	(e)	68,744
Manufacturing	13,800	8,064	(g)

overhead			
Sales revenue	103,300	(f)	981,604

118. The following data appeared in Moline Company's records on December 31:

Direct Materials Inventory, Dec. 31	\$535,500
Direct Materials purchased during the year	2,268,000
Finished Goods Inventory, Dec. 31	567,000
Indirect labor	201,600
Direct labor	2,520,000
Factory heat, light, and power	234,360
Factory depreciation	396,900
Administrative salaries	323,820
Miscellaneous factory cost	200,970
Marketing costs	233,100
Other administrative costs	113,400
Maintenance on factory equipment	76,230
Insurance on factory equipment	119,700
Distribution costs	10,080
Taxes on manufacturing property	82,530
Legal fees on customer complaint	51,660
Direct materials put into production	2,407,230
Work-in-process inventory, Dec. 31	154,980

On January 1 the Finished Goods Inventory account had a balance of \$280,000, and the Work-in-process Inventory account had a balance of \$90,650. Sales revenue for the year was \$6,687,500.

Required:

Prepare a cost of goods sold statement and an income statement.

119. The information below has been taken from the cost records of Gator Corp. for the past year:

Raw materials used in production		\$326
Total manufacturing costs charged to production during the year (includes \$135 of factory overhead)		686
Cost of goods available for sale		826
Selling & administrative expenses		25
Inventories:	Beginning	Ending
Direct materials	75	85
Work in process	80	30
Finished goods	90	110

Required:

- a. Calculate the cost of direct materials purchased during the year.
- b. Calculate the direct labor costs charged to production during the year.
- c. Calculate the cost of goods manufactured during the year.
- d. Calculate the cost of goods sold for the year.

120. Information from the records of the Shawnee Production Company for the month of January is as follows:

Purchases of direct materials	\$18,000	
Indirect labor	5,000	
Direct labor	10,400	
Depreciation on factory machinery	3,000	
Sales	55,300	
Selling and administrative expenses	6,300	
Rent on factory building	7,000	
Inventories:	January 1	January 31
Direct materials	\$8,000	\$8,700
Work-in-process	2,100	3,200
Finished goods	5,000	5,700

Required:

- a. Prepare a statement of cost of goods manufactured for the month of January.
- b. Prepare an income statement for the month of January.

121. The information below has been taken from the cost records of Toro Corp. for the past year:

Raw materials used in production		\$572
Total manufacturing costs charged to production during the year (includes \$255 of factory overhead)		1,095
Cost of goods available for sale		1,415
Selling & administrative expenses		255
Inventories:	Beginning	Ending
Direct materials	175	155
Work in process	220	190
Finished goods	290	310

Required:

- a. Calculate the cost of direct materials purchased during the year.
- b. Calculate the direct labor costs charged to production during the year.
- c. Calculate the cost of goods manufactured during the year.
- d. Calculate the cost of goods sold for the year.

122. Information from the records of the Navaho Industries for the month of July is as follows:

Purchases of direct materials		\$24,000
Indirect labor		6,500
Direct labor		13,200
Depreciation on factory machinery		3,600
Sales		75,300
Selling and administrative expenses		8,900
Rent on factory building		8,400
Inventories:	January 1	January 31
Direct materials	\$8,000	\$6,700
Work-in-process	1,100	1,600
Finished goods	9,000	6,800

123. The Yellville Company provided you with the following information for the fiscal year ended December 31.

Work-in-process inventory, 12/31	\$115,800
Finished goods inventory, 1/1	614,800
Direct labor costs incurred	2,008,600
Manufacturing overhead costs	5,368,800
Direct materials inventory, 1/1	501,600
Finished goods inventory, 12/31	1,022,000
Direct materials purchased	3,500,400
Work-in-process inventory, 1/1	202,000
Direct materials inventory, 12/31	338,800

Required:

- (a) Compute the total manufacturing costs incurred during the year.
- (b) Compute the total work-in-process during the year.
- (c) Compute the cost of goods manufactured during the year.
- (d) Compute the cost of goods sold during the year.
- (e) Compute the total prime costs for the year.
- (f) Compute the total conversion costs for the year.

124. The Younce Equipment Company provided you with the following information for the fiscal year ended December 31.

Work-in-process inventory, 12/31	\$28,950
Finished goods inventory, 1/1	153,700
Direct labor costs incurred	502,150
Manufacturing overhead costs	1,364,700
Direct materials inventory, 1/1	125,400
Finished goods inventory, 12/31	225,500
Direct materials purchased	875,100
Work-in-process inventory, 1/1	50,500
Direct materials inventory, 12/31	84,700

Required:

- (a) Compute the total manufacturing costs incurred during the year.
- (b) Compute the total work-in-process during the year.
- (c) Compute the cost of goods manufactured during the year.
- (d) Compute the cost of goods sold during the year.

125. Mobile Device Retail has collected the following information for May:

Sales revenue	\$1,650,000
Store rent	84,000
Utilities	57,200
Sales commissions	247,500
Merchandise inventory, May 1	118,200
Merchandise inventory, May 31	124,600
Freight-in	54,600
Administrative costs	115,100
Merchandise purchases	1,091,000

Required:

Prepare an income statement for the month of May.

126. Fowler Retail has collected the following information for August:

Sales revenue	\$1,155,000
Store rent	58,800
Utilities	40,400
Sales commissions	173,300
Merchandise inventory, 8/1	87,220
Merchandise inventory, 8/31	82,740
Freight-in	30,300
Administrative costs	80,600
Merchandise purchases	763,700

Required:

Prepare an income statement for the month of August.

127. Zach Hartman has developed a new electronic device that he has decided to produce and market. The production facility will be in a nearby industrial park which Zach will rent for \$4,000 per month. Utilities will cost about \$500 per month. He will use his personal computer, which he purchased for \$2,000 last year, to monitor the production process. The computer will become obsolete before it wears out from use. The computer will be depreciated at the rate of \$1,000 per year. He will rent production equipment at a monthly cost of \$8,000. Zach estimates the material cost per finished unit of product to be \$50, and the labor cost to be \$10. He will hire workers, and spend his time promoting the product. To do this he will quit his job which pays \$4,500 per month. Advertising will cost \$2,000 per month. Zach will **not** draw a salary from the new company until it gets well established.

Required:

Complete the chart below by placing an "X" under each heading that helps to identify the cost involved. There can be "Xs" placed under more than one heading for a single cost; e.g., a cost might be a sunk cost, an overhead cost, and a product cost. There would be an "X" placed under each of these headings opposite the cost.

						Product Cost			
	Opportunity Cost	Sunk Cost	Variable Cost	Fixed Cost	Direct Materials	Direct Labor	Manufacturing Overhead	Selling Cost	Differential Cost
Facility rent									
Utilities									
Personal computer depreciation									
Equipment rent									
Material cost									
Labor cost									
Present									

salary									
Advertising									

128. A manufacturing company, has provided the following data for the month of March:

Inventories:	Beginning	Ending
Raw materials	\$36,000	\$24,000
Finished goods	\$57,000	\$28,000

Raw materials purchased during March totaled \$69,000 and the cost of goods manufactured totaled \$146,000.

Required:

- a. What was the cost of raw materials used in production during March? Show your work.
- b. What was the cost of goods sold for March? Show your work.

129. During the month of June, Bolder Corporation, a manufacturing company, purchased raw materials costing \$76,000. The cost of goods manufactured for the month was \$129,000. The beginning balance in the raw materials account was \$26,000 and the ending balance was \$21,000. The beginning balance in the finished goods account was \$52,000 and the ending balance was \$35,000.

Required:

- a. What was the cost of raw materials used in production during June? Show your work.
- b. What was the cost of goods sold for June? Show your work.

130. A partial listing of costs incurred at Marshall Corporation during August appears below:

Direct materials	\$135,000
Utilities, factory	\$11,000
Sales commissions	\$69,000
Administrative salaries	\$101,000
Indirect labor	\$29,000
Advertising	\$94,000
Depreciation of production equipment	\$31,000
Direct labor	\$73,000
Depreciation of administrative equipment	\$40,000

Required:

- a. What is the total amount of product cost listed above? Show your work.
- b. What is the total amount of period cost listed above? Show your work.

131. Grankowski Corporation has provided the following partial listing of costs incurred during November:

Marketing salaries	\$47,000
Property taxes, factory	\$6,000
Administrative travel	\$113,000
Sales commissions	\$56,000
Indirect labor	\$36,000
Direct materials	\$119,000
Advertising	\$63,000
Depreciation of production equipment	\$56,000
Direct labor	\$117,000

Required:

- a. What is the total amount of product cost listed above? Show your work.
- b. What is the total amount of period cost listed above? Show your work.

132. In October, Youngstown Corporation had sales of \$273,000, selling expenses of \$26,000, and administrative expenses of \$47,000. The cost of goods manufactured was \$183,000. The beginning balance in the finished goods inventory account was \$45,000 and the ending balance was \$34,000.

Required:

Prepare an Income Statement in good form for October.

133. In July, Mountain Life, Inc., a merchandising company, had sales of \$295,000, selling expenses of \$24,000, and administrative expenses of \$29,000. The cost of merchandise purchased during the month was \$215,000. The beginning balance in the merchandise inventory account was \$25,000 and the ending balance was \$30,000.

Required:

Prepare an Income Statement in good form for July.

134.A number of costs and measures of activity are listed below.

	Cost Description	Possible Measure of Activity
1.	Cost of heating a hardware store	Dollar sales
2.	Windshield wiper blades installed on autos at an auto assembly plant	Number of autos assembled
3.	Cost of tomato sauce used at a pizza shop	Pizzas cooked
4.	Cost of shipping bags of fertilizer to a customer at a chemical plant	Bags shipped
5.	Cost of electricity for production equipment at a snowboard manufacturer	Snowboards produced
6.	Cost of renting production equipment on a monthly basis at a snowboard manufacturer	Snowboards produced
7.	Cost of vaccine used at a clinic	Vaccines administered
8.	Cost of sales at a hardware store	Dollar sales
9.	Receptionist's wages at dentist's office	Number of patients
10.	Salary of production manager at a snowboard manufacturer	Snowboards produced

Required:

For each item above, indicate whether the cost is MAINLY fixed or variable with respect to the

possible measure of activity listed next to it.

135.A number of costs and measures of activity are listed below.

	Cost Description	Possible Measure of Activity
1.	Cost of renting production equipment on a monthly basis at a surfboard manufacturer	Surfboards produced
2.	Pilot's salary on a regularly scheduled commuter airline	Number of passengers
3.	Cost of dough used at a pizza shop	Pizzas cooked
4.	Janitorial wages at a surfboard manufacturer	Surfboards produced
5.	Cost of shipping bags of garden mulch to a retail garden store	Bags shipped
6.	Salary of production manager at a surfboard manufacturer	Surfboards produced
7.	Property tax on corporate headquarters building	Dollar sales
8.	Cost of heating an electronics store	Dollar sales
9.	Shift manager's wages at a coffee shop	Dollar sales
10.	Cost of bags used in packaging chickens for shipment to grocery stores	Crates of chicken shipped

Required:

For each item above, indicate whether the cost is MAINLY fixed or variable with respect to the possible measure of activity listed next to it.

136.A number of costs are listed below.

	Cost Description	Cost Object
1.	Supervisor's wages in a computer manufacturing facility	A particular personal computer
2.	Salary of the president of a home construction company	A particular home
3.	Cost of tongue depressors used in an outpatient clinic at a hospital	The outpatient clinic
4.	Cost of lubrication oil used at the auto repair shop of an automobile dealer	The auto repair shop
5.	Manger's salary at a hotel run by a chain of hotels	The particular hotel
6.	Cost of screws used to secure wood trim in a yacht at a yacht manufacturer	A particular yacht
7.	Accounting professor's salary	The Accounting Department
8.	Cost of a measles vaccine administered at an outpatient clinic at a hospital	A particular patient
9.	Cost of electronic navigation system installed in a yacht at a yacht manufacturer	A particular yacht
10.	Wood used to build a home	A particular home

Required:

For each item above, indicate whether the cost is direct or indirect with respect to the cost object

listed next to it.

137. The following data relates to the Sunshine Company:

Direct Materials Inventory, Beginning	\$40
Direct Materials Inventory, Ending	50
Direct Materials Purchases	210
Direct Labor	350
Finished Goods Inventory, Beginning	100
Finished Goods Inventory, Ending	95
Factory overhead	153
Work-in-Process Inventory, Beginning	65
Work-in-Process Inventory, Ending	80

Required:

Calculate direct materials purchased, direct labor costs, and cost of goods sold.

138.A computer virus destroyed some of the accounting records for Dorchester Antique Remodeling Company for the periods of 2016-2018. The following information was salvaged from the computer system.

Required:

Determine the correct amounts for A through P.

	12/31/16	12/31/17	12/31/18
Beginning direct materials	\$50,250	F	\$45,210
Purchases of direct materials	A	65,250	70,125
Ending direct materials	34,165	45,210	L
Direct materials used	91,385	54,205	M
Direct labor	B	155,050	162,000
Manufacturing overhead	115,325	G	127,145
Total manufacturing costs	C	319,255	364,130
Beginning work-in-process inventory	36,450	H	29,635
Ending work-in-process inventory	21,985	29,635	N
Costs of goods manufactured	386,700	I	362,920
Beginning finished goods inventory	37,000	J	42,500
Ending finished goods inventory	D	42,500	39,550
Cost of goods sold	377,500	315,755	O
Net sales	550,000	495,000	P

Selling and Administrative Expenses	135,950	K	130,130
Net income	E	46,250	39,000

139. Ryan's Lazer Lighting Inc. produces lamps. During 2016, the company incurred the following costs:

Factory rent	\$80,000
Direct labor used	425,000
Factory utilities	50,000
Direct materials purchases	600,000
Indirect materials	150,000
Indirect labor	90,000

Inventories for the year were:

	January 1	December 31
Direct materials	\$100,000	\$75,000
Work in process	20,000	10,000
Finished goods	250,000	215,000

Required:

Prepare a statement of cost of goods manufactured and cost of goods sold.

140.Explain the difference between an outlay cost, and expense, and an opportunity cost.

141.Explain the difference between a cost, a cost object, and a cost pool.

142.Explain the difference between direct materials inventory, work in process inventory, finished goods inventory and cost of goods sold.

143. Explain the difference between cost of goods manufactured and cost of goods sold.

144. Explain the difference between a direct cost and an indirect cost.

145. The following information applies to the Jamison Tools Company for the year ended December 31, 2016:

Factory Rent	\$330,000
Direct Materials Inventory, Beginning	96,000
Direct Materials Inventory, Ending	87,000
Direct Materials Purchases	654,000
Direct Labor-Wages	425,000
Indirect Labor-Wages	28,000
Finished Goods Inventory, Beginning	25,000
Finished Goods Inventory, Ending	44,000
Indirect Materials	66,000
Plant Utilities	40,000
General and Administrative	101,350
Work-in-Process Inventory, Beginning	27,000
Work-in-Process Inventory, Ending	33,000
Marketing Expenses	225,000
Sales Revenue	2,550,000

Required:

Prepare a statement of cost of goods manufactured and an income statement for the year ended December 31, 2016.

146. The following information applies to the Garden Master Company for the year ended December 31, 2016:

Factory Rent	\$80,000
Direct Materials Inventory, Beginning	50,000
Direct Materials Inventory, Ending	45,000
Direct Materials Purchases	325,000
Direct Labor-Wages	550,000
Indirect Labor-Wages	25,000
Finished Goods Inventory, Beginning	50,000
Finished Goods Inventory, Ending	75,000
Indirect Materials	50,000
Plant Utilities	25,000
General and Administrative	130,000
Work-in-Process Inventory, Beginning	50,000
Work-in-Process Inventory, Ending	55,000
Marketing Expenses	180,000
Sales Revenue	1,825,000

Required:

Prepare a statement of cost of goods manufactured and an income statement for the year ended December 31, 2016.

147. Michael Corporation has provided the following data for the month of July:

Sales		\$280,000
Raw materials purchases		76,000
Direct labor cost		42,000
Manufacturing overhead		77,000
Selling expenses		20,000
Administrative expense		35,000
Inventories:	Beginning	Ending
Raw materials	\$22,000	\$33,000
Work-in-process	15,000	23,000
Finished goods	52,000	43,000

148. The following information is available, regarding the Crossover Company:

Sales 25,000 units per year at \$45 per unit

Production 30,000 units in 2016 and 20,000 units in 2017

At the beginning of 2016 there was no inventory

Variable manufacturing costs are \$30.00 per unit

Fixed manufacturing costs are \$150,000 per year

Marketing costs are all fixed at \$75,000 per year

Required:

- (a) Prepare an income statement under absorption costing for 2016 and 2017. Include a column for both years taken together.
- (b) Prepare an income statement under variable costing for 2016 and 2017. Include a column for both years taken together.
- (c) Comment on the results and reconcile any differences in income.

149. Razor Corporation produces and sells a single product at \$40 per unit. During 2016, the company produced 200,000 units, 160,000 of which were sold during the year. All ending inventory was in finished goods inventory; there was no inventory on hand at the beginning of the year. The following data relate to the company's production process:

Direct materials	\$550,000
Direct labor	400,000
Variable Manufacturing overhead	100,000
Fixed Manufacturing overhead	300,000
Variable marketing and administrative	160,000
Fixed marketing and administrative	110,000

Required:

Calculate the following.

- (a) The unit cost of ending inventory on the balance sheet prepared for stockholders.
- (b) The unit cost of ending inventory on a variable cost balance sheet.
- (c) The operating income using absorption costing.
- (d) The operating income using variable costing.
- (e) The ending inventory using absorption costing.
- (f) The ending inventory using variable costing.
- (g) A reconciliation of the difference in operating income between absorption costing and variable costing using the shortcut method.

150. Consider the following cost and production information for Barnard Steel Building Company, Inc.

	Part C-2472		Part D-1340		All other parts	
Quantity	144		120		1140	
	Subtotal	Average/unit	Subtotal	Average/unit	Subtotal	Average/unit
Direct costs						
Materials cost	\$180,000	\$1,250	\$405,000	\$3,375	\$2,446,440	\$2,146
Conversion cost	<u>72,000</u>	<u>500</u>	<u>129,000</u>	<u>1,075</u>	<u>974,700</u>	<u>855</u>
Total direct costs	\$252,000	\$1,750	\$534,000	\$4,450	\$3,421,140	\$3,001
Indirect costs						
Indirect production cost	885,600	6,150	738,000	6,150	7,011,000	6,150
Indirect operating cost	<u>723,600</u>	<u>5,025</u>	<u>603,000</u>	<u>5,025</u>	<u>5,728,480</u>	<u>5,025</u>
Total indirect costs	<u>\$1,609,200</u>	<u>\$11,175</u>	<u>\$1,341,000</u>	<u>\$11,175</u>	<u>\$12,739,480</u>	<u>\$11,175</u>
Total costs	<u>\$1,861,200</u>	<u>\$12,925</u>	<u>\$1,875,000</u>	<u>\$15,625</u>	<u>\$16,160,620</u>	<u>\$14,176</u>

Additional information:

- Sales revenue: \$20,000,000
- Beginning inventory: \$1,150,000
- Sales of part D-1340: 80 units
- Sales of all other parts are the same as the number of units produced.

- Sales price of part D-1340: \$35,500 per unit
- The only spending increase was for material cost due to increased production. All other spending as shown above was unchanged.

Barnard Steel Building Company uses the variable costing method.

Required:

- (a) Compute the contribution margin, operating income, and ending inventory for Barnard Steel Building Company.
- (b) Assume that sales of part D-1340 increases by 30 units to 110 units during the given period (production remains constant). Re-compute the above figures.
- (c) Jaime Porter, the controller of Barnard Steel Building Company, is considering the use of absorption costing instead of variable costing to be in line with financial reporting requirements. She knows that the use of a different costing method will give rise to different incentives. Explain to her how alternative methods of calculating product costs create different incentives.

151. Consider the following cost and production information for Darrell Building Components, Inc.

	Part C-1849		Part D-1251		All other parts	
Quantity	72		60		570	
	Subtotal	Average Per unit	Subtotal	Average Per unit	Subtotal	Average Per unit
Direct costs						
Materials cost	\$45,000	\$625	\$101,400	\$1,690	\$611,610	\$1,073
Conversion cost	<u>18,000</u>	<u>250</u>	<u>32,400</u>	<u>540</u>	<u>243,960</u>	<u>428</u>
Total direct costs	\$63,000	\$875	\$133,800	\$2,230	\$855,570	\$1,501
Indirect costs						
Indirect manufacturing cost	221,400	3,075	184,500	3,075	1,752,750	3,075
Indirect operating cost	<u>181,080</u>	<u>2,515</u>	<u>150,900</u>	<u>2,515</u>	<u>1,433,550</u>	<u>2,515</u>
Total indirect costs	<u>\$402,480</u>	<u>\$5,590</u>	<u>\$335,400</u>	<u>\$5,590</u>	<u>\$3,186,300</u>	<u>\$5,590</u>
Total costs	\$465,480	\$6,465	\$469,200	\$7,820	\$4,041,870	\$7,091

Additional information:

- Sales revenue: \$5,200,000
- Beginning inventory: \$275,000
- The only spending increase was for material cost due to increased production. All other spending as shown above was unchanged.
- Sales of all parts are the same as the number of units produced.

Darrell Building Components, Inc. uses the absorption costing method.

Required:

- (a) Compute the gross margin, operating income, and ending inventory for Darrell Building Components, Inc.
- (b) Assume that production of part D-1251 increases by 25 units during the given period (sales remain constant). Re-compute the above figures.
- (c) Thane Smith, the cost manager of Darrell Building Components, argues with the controller that variable costing is a better method for product costing. Using the information in part b above, re-compute the operating income for Darrell Building Components using variable costing. Explain any differences in the operating incomes obtained under the two different methods.

152. Hurwitz Corporation had the following activities during 2016:

Raw Materials:	
Inventory, Jan. 1, 2016	\$200,000
Purchases of Raw Materials	318,000
Inventory, Dec. 31, 2016	210,000
Direct Manufacturing Labor	180,000
Utilities: Plant	50,000
Depreciation: Plant and Equipment	40,000
Indirect Materials	30,000
Indirect Labor	150,000
Other Manufacturing Overhead	60,000
Sales Revenues	1,250,000
Selling and Administrative Expenses	150,000
Income Tax Rate	30%
Work-in-process Inventory, Dec. 31, 2016	120,000
Work-in-process Inventory, Jan. 1, 2016	64,000
Finished Goods Inventory, Jan. 1, 2016	80,000
Finished Goods Inventory, Dec. 31, 2016	150,000

Required:

- (a) Prepare a schedule of cost of goods manufactured for 2016.
- (b) Prepare a schedule of cost of goods sold for 2016.
- (c) Prepare an income statement for 2016.

153. Styling Toys, Inc. (STI) manufactures a variety of electronic toys for children aged 3 to 14 years.

The company started as a Ma & Pa basement operation, and grew steadily over the last nine years. It now employs over 100 people and has sales revenue of over \$250 million. Samantha Marks, the CEO of STI also recognizes that competition has increased during this period; therefore future growth will **not** be easy.

Marks recognizes that one of the areas of weakness is the accounting and costing system. Marks' maternal uncle, Zack, had maintained the accounts for the company. He meticulously kept track of all the invoices that were received, payments made, and painstakingly prepared crude annual reports. With Zack passing away at the age of 85, Marks decided to hire a professional cost management expert to keep track of the company's costs. She hired Dona FalconWright, who had just completed her CMA.

After acquainting Falcon with the company and its people, Marks decided to get down to business. She called Falcon to her office to have a serious conversation about accounting and costing, in particular.

Marks: Dona, I would like you to pay particular attention to developing an official costing system. Currently, we don't have one. I believe this should be your first priority because competition is rising and if we do **not** understand our costs, we might start losing to our rivals.

Falcon: I understand your point very well, Ms. Marks.

Marks: Call me Sam.

Falcon: Very well, Sam. I have a few ideas that I picked up from my CMA courses that I think are worth implementing. However, it looks like we need to start with the basics.

Required:

Assume the role of Dona Falcon. Write a brief report outlining the basics of a cost management information system. Include in your report the following:

- Resources and costs
- Supply of resources vs. the use of resources
- Classification of costs (three dimensions of resources)
- Alternative costing systems

Chapter 02 Cost Concepts and Behavior **Answer Key**

True / False Questions

1. The cost of an item is the sacrifice of resources made to acquire it.

TRUE

This statement is the definition of cost.

AACSB: Analytical Thinking

AICPA: FN Measurement

Accessibility: Keyboard Navigation

Blooms: Understand

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-01 Explain the basic concept of "cost".

Topic: What is a Cost?

2. An expense is a cost charged against revenue in an accounting period.

TRUE

This statement is the definition of expense.

AACSB: Analytical Thinking

AICPA: FN Measurement

Accessibility: Keyboard Navigation

Blooms: Understand

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-01 Explain the basic concept of "cost".

Topic: What is a Cost?

3. If a cost is recorded as an asset (for example, prepaid rent for an office building), it becomes an expense when the asset has been consumed.

TRUE

This statement describes the appropriate transition between assets and expenses.

AACSB: Analytical Thinking

AICPA: FN Measurement

Accessibility: Keyboard Navigation

Blooms: Understand

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-01 Explain the basic concept of "cost".

Topic: What is a Cost?

4. Accounting systems typically record opportunity costs as assets and treat them as intangible items on the financial statements.

FALSE

Opportunity costs are not reflected in the accounting system- they are what did not happen.

AACSB: Analytical Thinking

AICPA: FN Measurement

Accessibility: Keyboard Navigation

Blooms: Remember

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-01 Explain the basic concept of "cost".

Topic: What is a Cost?

5. Total cost of goods purchased minus beginning merchandise inventory plus ending merchandise inventory equals cost of goods sold.

FALSE

Purchases plus beginning inventory minus ending inventory equals cost of goods sold.

AACSB: Analytical Thinking

AICPA: FN Measurement

Accessibility: Keyboard Navigation

Blooms: Remember

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-02 Explain how costs are presented in financial statements.

Topic: Presentation of Costs in Financial Statements

6. Cost of goods sold includes the actual costs of the goods sold and the costs required to sell them to the customer.

FALSE

Cost of goods sold does not include selling costs.

AACSB: Analytical Thinking

AICPA: FN Measurement

Blooms: Remember

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-02 Explain how costs are presented in financial statements.

Topic: Presentation of Costs in Financial Statements

7. Period costs are those costs assigned to units of production in the period in which they are incurred.

FALSE

This statement describes product costs, not period costs.

AACSB: Analytical Thinking

AICPA: FN Measurement

Accessibility: Keyboard Navigation

Blooms: Remember

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-02 Explain how costs are presented in financial statements.

Topic: Presentation of Costs in Financial Statements

8. Only direct costs can be classified as product costs; indirect costs are classified as period costs.

FALSE

Product costs can include both direct and indirect costs.

AACSB: Analytical Thinking

AICPA: FN Measurement

Accessibility: Keyboard Navigation

Blooms: Remember

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-02 Explain how costs are presented in financial statements.

Topic: Presentation of Costs in Financial Statements

9. The three categories of product costs are direct materials, direct labor, and manufacturing overhead.

TRUE

This statement is the definition of product cost.

AACSB: Analytical Thinking

AICPA: FN Measurement

Accessibility: Keyboard Navigation

Blooms: Understand

Difficulty: 1 Easy

Gradable: automatic

Learning Objective: 02-02 Explain how costs are presented in financial statements.

Topic: Presentation of Costs in Financial Statements

10. The first step in determining whether a cost is direct or indirect is to specify the cost allocation rule.

FALSE

This is the first step to define the cost object.

AACSB: Analytical Thinking

AICPA: FN Measurement

Accessibility: Keyboard Navigation

Blooms: Remember

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-03 Explain the process of cost allocations.

Topic: Cost Allocation

11. Total work-in-process during the period is the sum of the beginning work-in-process inventory and the total manufacturing costs incurred during the period.

TRUE

This is the correct formula for total work-in-process.

AACSB: Analytical Thinking

AICPA: FN Measurement

Accessibility: Keyboard Navigation

Blooms: Remember

Difficulty: 2 Medium

Gradable: automatic

Learning Objective: 02-04 Understand how material, labor, and overhead costs are added to a product at each stage of the production process.

Topic: How Costs Flow through the Statements

12. Cost of goods sold plus the ending finished goods inventory minus the beginning finished goods inventory equals the cost of goods manufactured.

TRUE

This statement works backwards from cost of goods sold to cost of goods manufactured.

AACSB: Analytical Thinking

AICPA: FN Measurement

Accessibility: Keyboard Navigation

Blooms: Remember

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-04 Understand how material, labor, and overhead costs are added to a product at each stage of the production process.

Topic: How Costs Flow through the Statements

13. If the cost of goods manufactured during the period exceeds the cost of goods sold, the ending balance of Finished Goods Inventory account increased.

TRUE

Cost of goods sold = cost of goods manufactured + beginning finished goods inventory - ending finished goods inventory.

AACSB: Analytical Thinking

AICPA: FN Measurement

Accessibility: Keyboard Navigation

Blooms: Remember

Difficulty: 3 Hard

Gradable: automatic

Learning Objective: 02-04 Understand how material, labor, and overhead costs are added to a product at each stage of the production process.

Topic: How Costs Flow through the Statements

14. Total variable costs change inversely with changes in the volume of activity.

FALSE

Total variable costs are linear and vary directly with changes in the volume of activity, fixed costs vary inversely.

63. A company had beginning inventories as follows: Direct Materials, \$300; Work-in-Process, \$500; Finished Goods, \$700. It had ending inventories as follows: Direct Materials, \$400; Work-in-Process, \$600; Finished Goods, \$800. Material Purchases (net including freight) were \$1,400, Direct Labor \$1,500, and Manufacturing Overhead \$1,600. What is the Cost of Goods Sold for the period?
- A. \$4,100.
B. \$4,200.
C. \$4,300.
D. \$4,400.

$\$300 + \$1,400 - \$400 = \$1,300$ (Direct materials used in production)

$\$500 + \$1,300 + \$1,500 + \$1,600 - \$600 = \$4,300$ (COGM)

$\$700 + \$4,300 - \$800 = \$4,200$ (COGS)

Topic: Details of Manufacturing Cost Flows

64. Compute the Cost of Goods Sold for 2016 using the following information:

Direct Materials, Jan. 1, 2016	\$40,000
Work-in-Process, Dec. 31, 2016	69,000
Direct Labor	48,500
Finished Goods, Dec. 31, 2016	105,000
Finished Goods, Jan. 1, 2016	128,000
Manufacturing Overhead	72,500
Direct Materials, Dec. 31, 2016	43,000
Work-in Process, Jan. 1, 2016	87,000
Purchases of Direct Material	75,000

- A. \$244,000
- B. \$234,000**
- C. \$211,000
- D. \$198,000

$\$40,000 + \$75,000 - \$43,000 = \$72,000$ (Direct materials used in production)

$\$87,000 + \$72,000 + \$48,500 + \$72,500 - \$69,000 = \$211,000$ (COGM)

$\$128,000 + \$211,000 - \$105,000 = \$234,000$ (COGS)

92. Ramos Company has the following unit costs:

Variable manufacturing overhead	\$13
Direct materials	12
Direct labor	17
Fixed manufacturing overhead	10
Fixed marketing and administrative	8

What cost per unit would be used for product costing under full absorption costing?

- A. \$29
- B. \$42
- C. \$52**
- D. \$60

$$\$13 + \$12 + \$17 + \$10 = \$52$$

Essay Questions

107. The following information is available for the Weston Consulting Company for the fiscal year ended December 31.

Gross margin	\$170,000
Operating profit	\$65,500
Revenues	\$809,000
Income tax rate	34%

Required:

- (a) Compute the cost of services sold.
- (b) Compute the total marketing and administrative costs.
- (c) Compute net income.

(a) $\$809,000 - x = \$170,000$; $x = \underline{\$639,000}$

(b) $\$170,000 - x = \$65,500$; $x = \underline{\$104,500}$

(c) $\$65,500 - [(.34(\$65,500))] = x$; $x = \underline{\$43,230}$

110. **Required:**

For each of the following costs incurred in a manufacturing company, indicate whether the costs are (a) fixed or variable and (b) product costs or period costs.

	Cost Item	Fixed	Variable	Product	Period
0	Annual audit and tax return fees	X			X
1	Costs (other than food) of running the cafeteria for factory personnel				
2	Direct materials used				
3	Clerical staff in administrative offices				
4	Depreciation of factory machinery*				
5	Property taxes on the factory				
6	Insurance premiums on delivery vans				
7	Factory custodian pay				
8	Sales commissions				
9	Rent paid for				

	corporate jet				
10	Transportation- in costs for indirect material				

*Straight-line depreciation method used.

	Cost Item	Fixed	Variable	Product	Period
1	Costs (other than food) of running the cafeteria for factory personnel	X		X	
2	Direct materials used		X	X	
3	Clerical staff in administrative offices	X			X
4	Depreciation of factory machinery*	X		X	
5	Property taxes on the factory	X		X	
6	Insurance premiums on delivery vans	X			X
7	Factory custodian pay	X		X	
8	Sales		X		X

Learning Objective: 02-04 Understand how material, labor, and overhead costs are added to a product at each stage of the production process.

Learning Objective: 02-05 Define basic cost behaviors, including fixed, variable, semivariable, and step costs.

Topic: Cost Behavior

111. The Torchdown Company began operations several years ago. The company purchased a building and, since only half of the space was needed for operations, the remaining space was rented to another firm for rental revenue of \$20,000 per year. The success of Torchdown Company's product has resulted in the company needing more space. The renter's lease will expire next month and Torchdown will **not** renew the lease in order to use the space to expand operations and meet demand.

The company's product requires direct materials that cost \$25 per unit. The company employs a production supervisor whose salary is \$2,000 per month. Production line workers are paid \$15 per hour to manufacture and assemble the product. The company rents the equipment needed to produce the product at a rental cost of \$1,500 per month. Additional equipment will be needed as production is expanded and the monthly rental charge for this equipment will be \$900 per month. The building is depreciated on a straight-line basis at \$9,000 per year.

The company spends \$40,000 per year to market the product. Shipping costs for each unit are \$20 per unit. The cost of electricity and other utilities used for product is \$2 per unit. The company plans to liquidate several investments in order to expand production. These investments currently earn a return of \$8,000 per year.

Required:

Complete the answer sheet that follows by placing an "X" under each heading that identifies the cost involved. The "X's" can be placed under *more than one heading* for a single cost, e.g., a cost might be a variable cost, and an overhead cost.

	Name of cost	Variable cost	Fixed cost	Direct materials	Direct labor	Mfg overhead	Period cost	Opportunity cost
1	Amount that can be earned renting building							
2	Cost of							

	direct materials							
3	Salary of production supervisor							
4	Cost of direct labor							
5	Equipment rental cost							
6	Depreciation on building							
7	Marketing costs							
8	Shipping costs							
9	Electrical costs							
10	Foregone investment income							

	Name of cost	Variable cost	Fixed cost	Direct materials	Direct labor	Mfg overhead	Period cost	Opportunity cost
1	Amount that can be earned renting building							X

2	Cost of direct materials	X		X				
3	Salary of production supervisor		X			X		
4	Cost of direct labor	X			X			
5	Equipment rental cost		X			X		
6	Depreciation on building		X			X		
7	Marketing costs		X				X	
8	Shipping costs	X					X	
9	Electrical costs	X				X		
10	Foregone investment income							X

Topic: Details of Manufacturing Cost Flows

114. The cost accountant for the Corner Manufacturing Company has provided you with the following information for the month of July:

	Variable costs Per unit	Total Fixed Costs
Direct labor	\$27.50	
Direct materials	84.75	
Manufacturing overhead	14.25	\$120,000
Marketing costs	5.30	50,000
Administrative costs	2.90	75,000

Required:

Compute the following *per unit* items, assuming the company produced and sold 5,000 units at a price of \$210.00 per unit.

- (a) Total variable cost
- (b) Variable inventoriable cost
- (c) Full absorption cost
- (d) Full cost
- (e) Contribution margin
- (f) Gross margin
- (g) Profit margin

(a) $\$84.75 + 27.50 + 14.25 + 5.30 + 2.90 = x$; $x = \underline{\$134.70}$

(b) $\$84.75 + 27.50 + 14.25 = x$; $x = \underline{\$126.50}$

(c) $\$84.75 + 27.50 + 14.25 + (\$120,000/5,000) = x$; $x = \underline{\$150.50}$

(d) $\$84.75 + 27.50 + 14.25 + 5.30 + 2.90 + [(\$120,000 + 50,000 + 75,000)/5,000] = x$; $x = \underline{\$183.70}$

$$(e) \$210.00 - (84.75 + 27.50 + 14.25 + 5.30 + 2.90) = x; x = \underline{\$75.30}$$

$$(f) \$210.00 - [84.75 + 27.50 + 14.25 + (120,000/5,000)] x; x = \underline{\$59.50}$$

$$(g) \$210.00 - [\$84.75 + 27.50 + 14.25 + 5.30 + 2.90 + [(120,000 + 50,000 + 75,000)/5,000]] = x; x = \underline{\$26.30}$$

AACSB: Analytical Thinking

AICPA: FN Measurement

Blooms: Analyze

Difficulty: 2 Medium

Gradable: manual

Learning Objective: 02-04 Understand how material, labor, and overhead costs are added to a product at each stage of the production process.

Learning Objective: 02-05 Define basic cost behaviors, including fixed, variable, semivariable, and step costs.

Topic: Details of Manufacturing Cost Flows

115. The cost accountant for the Friendly Manufacturing Company has provided you with the following information for the month of July:

	Variable costs Per unit	Total Fixed Costs
Direct labor	\$27.50	
Direct materials	84.75	
Manufacturing overhead	14.25	\$120,000
Marketing costs	5.30	50,000
Administrative costs	2.90	75,000
Selling price	210.00	

Required:

Assuming the company produced and sold 5,000 units, and there were no units in inventory on July 1, prepare the following income statements for the month of July:

- (a) Contribution margin income statement.
 (b) Gross margin income statement.

(a)

Revenues		\$1,050,000
Variable costs:		
Direct materials	\$423,750	
Direct labor	137,500	
Manufacturing overhead	71,250	

Marketing costs	26,500	
Administrative costs	<u>14,500</u>	
Total variable costs		<u>673,500</u>
Contribution margin		376,500
Fixed costs:		
Manufacturing overhead	120,000	
Marketing costs	50,000	
Administrative costs	<u>75,000</u>	
Total fixed costs		<u>245,000</u>
Operating profits		<u>\$131,500</u>

(b)

Revenues		\$1,050,000
Cost of goods sold:		
Direct materials	\$423,750	
Direct labor	137,500	
Mfg overhead	<u>191,250</u>	
Cost of goods sold		<u>752,500</u>
Gross margin		297,500
Expenses:		
Marketing costs	76,500	
Administrative costs	<u>89,500</u>	
Total expenses		<u>166,000</u>
Operating profits		<u>\$131,500</u>

AACSB: Analytical Thinking

AICPA: FN Measurement

Difficulty: 2 Medium

Gradable: manual

Learning Objective: 02-07 Understand the distinction between financial and contribution margin income statements.

Topic: How to Make Cost Information More Useful to Managers

116. Shuster Industries manufactures baseballs and identified the following costs associated with their manufacturing activity (V = Variable; F = Fixed). The following information is available for the month of June when 25,000 baseballs were produced, but only 23,500 baseballs were sold.

Power to run plant equipment (V)	\$25,000
Other selling costs (V)	\$149,150
Indirect labor (F)	\$50,000
Property taxes on building (F)	\$12,500
Marketing costs (V)	\$30,000
Factory Supervisor salaries (F)	\$125,000
Direct materials used (V)	\$500,000
Depreciation on plant equipment (F)	\$68,000
Shipping costs to customer (V)	\$48,800
Indirect material and supplies (V)	\$37,500
Direct labor (V)	\$250,000
Administrative salaries (F)	\$300,000
Insurance on factory building (F)	\$62,500
Utilities, factory (V)	\$50,000
General office costs (F)	\$48,000

Required:

Compute the following amounts for July, assuming 30,000 baseballs were produced and sold:
(Assume normal production ranges from 15,000 to 40,000 baseballs)

- (a) Total manufacturing costs.
- (b) Total conversion costs.
- (c) Period costs per unit.
- (d) Full costs per unit.

(a) $[(\$500,000 + 250,000 + 25,000 + 37,500 + 50,000)/25,000]$ = Variable costs per unit

Variable cost per unit = \$34.50

$(\$34.50 \times 30,000) + (50,000 + 12,500 + 125,000 + 68,000 + 62,500)$ = Total mfg. costs

Total manufacturing costs = \$1,035,000 + 318,000 = \$1,353,000

(b) $[(\$250,000 + 25,000 + 37,500 + 50,000)/25,000]$ = Conversion costs per unit

Conversion costs per unit = \$14.50

$(14.50 \times 30,000) + (50,000 + 12,500 + 125,000 + 68,000 + 62,500)$ = Total costs

Total conversion costs = \$435,000 + 318,000 = \$753,000

(c) $(\$149,150 + 30,000 + 48,800)/23,500$ = Period costs per unit

Period costs per unit = \$9.70

$(\$9.70 \times 30,000) + (300,000 + 48,000)$ = Total period costs

Total period costs = \$639,000

$\$639,000/30,000$ = Period costs per unit

Period costs per unit = \$21.30

(d) $(\$1,353,000/30,000) + \21.30 = Full costs per unit

Full costs per unit = \$66.40

118. The following data appeared in Moline Company's records on December 31:

Direct Materials Inventory, Dec. 31	\$535,500
Direct Materials purchased during the year	2,268,000
Finished Goods Inventory, Dec. 31	567,000
Indirect labor	201,600
Direct labor	2,520,000
Factory heat, light, and power	234,360
Factory depreciation	396,900
Administrative salaries	323,820
Miscellaneous factory cost	200,970
Marketing costs	233,100
Other administrative costs	113,400
Maintenance on factory equipment	76,230
Insurance on factory equipment	119,700
Distribution costs	10,080
Taxes on manufacturing property	82,530
Legal fees on customer complaint	51,660
Direct materials put into production	2,407,230
Work-in-process inventory, Dec. 31	154,980

On January 1 the Finished Goods Inventory account had a balance of \$280,000, and the Work-in-process Inventory account had a balance of \$90,650. Sales revenue for the year was \$6,687,500.

Required:

Prepare a cost of goods sold statement and an income statement.

Panel A:

Beginning Work-in-process inventory			\$90,650
Manufacturing costs during the year:			
Direct materials:			
Beginning inventory (not given)	\$674,730		
Purchases (net)	<u>2,268,000</u>		
Direct materials available	2,942,730		
Ending inventory	<u>-535,500</u>		
Direct materials put into production		2,407,230	
Direct labor		2,520,000	
Manufacturing overhead:			
Depreciation	\$396,900		
Insurance	119,700		
Maintenance	76,230		
Plant heat, light, and power	234,360		
Indirect labor	201,600		
Property taxes	82,530		

Miscellaneous	<u>200,970</u>		
Total manufacturing overhead		<u>1,312,290</u>	
Total manufacturing costs incurred			<u>6,239,520</u>
Total work in process during the year			6,330,170
Ending Work-in-process inventory			<u>-154,980</u>
Cost of goods manufactured			<u>\$6,175,190</u>

Panel B:

Beginning Finished goods inventory	\$280,000
Cost of goods manufactured	<u>6,175,190</u>
Cost of goods available for sale	6,455,190
Ending Finished goods inventory	<u>-567,000</u>
Cost of goods sold	<u>\$5,888,190</u>

Panel C:

Revenues	\$6,687,500
Cost of goods sold	<u>5,888,190</u>
Gross margin	799,310

Expenses:

Marketing costs [\$233,100 +	243,180	
------------------------------	---------	--

10,080]		
Administrative costs [\$113,400 + 323,820 + 51,660]	<u>488,880</u>	
Total expenses		<u>732,060</u>
Operating profit		<u>\$67,250</u>

119. The information below has been taken from the cost records of Gator Corp. for the past year:

Raw materials used in production		\$326
Total manufacturing costs charged to production during the year (includes \$135 of factory overhead)		686
Cost of goods available for sale		826
Selling & administrative expenses		25
Inventories:	Beginning	Ending
Direct materials	75	85
Work in process	80	30
Finished goods	90	110

Required:

- Calculate the cost of direct materials purchased during the year.
- Calculate the direct labor costs charged to production during the year.
- Calculate the cost of goods manufactured during the year.
- Calculate the cost of goods sold for the year.

a. $\$75 + x - 85 = 326$; $x = \underline{\$336}$

b. $\$326 + x + 135 = \686 ; $x = \underline{\$225}$

c. $\$80 + 686 - 30 = \underline{\$736}$

d. $\$826 - 110 = \underline{\$716}$

120. Information from the records of the Shawnee Production Company for the month of January is as follows:

Purchases of direct materials	\$18,000	
Indirect labor	5,000	
Direct labor	10,400	
Depreciation on factory machinery	3,000	
Sales	55,300	
Selling and administrative expenses	6,300	
Rent on factory building	7,000	
Inventories:	January 1	January 31
Direct materials	\$8,000	\$8,700
Work-in-process	2,100	3,200
Finished goods	5,000	5,700

Required:

- a. Prepare a statement of cost of goods manufactured for the month of January.
- b. Prepare an income statement for the month of January.

a.

Beginning direct materials	\$8,000	
Purchases of direct materials	18,000	
Less ending direct materials	<u>-8,700</u>	
Direct materials used		17,300
Direct labor		10,400

Overhead:

Indirect labor	5,000	
Depreciation on machinery	3,000	
Rent on building	<u>7,000</u>	
Total overhead		<u>15,000</u>
Costs added during month		42,700
Beginning work in process		2,100
Less ending work in process		<u>-3,200</u>

127. Zach Hartman has developed a new electronic device that he has decided to produce and market. The production facility will be in a nearby industrial park which Zach will rent for \$4,000 per month. Utilities will cost about \$500 per month. He will use his personal computer, which he purchased for \$2,000 last year, to monitor the production process. The computer will become obsolete before it wears out from use. The computer will be depreciated at the rate of \$1,000 per year. He will rent production equipment at a monthly cost of \$8,000. Zach estimates the material cost per finished unit of product to be \$50, and the labor cost to be \$10. He will hire workers, and spend his time promoting the product. To do this he will quit his job which pays \$4,500 per month. Advertising will cost \$2,000 per month. Zach will **not** draw a salary from the new company until it gets well established.

Required:

Complete the chart below by placing an "X" under each heading that helps to identify the cost involved. There can be "Xs" placed under more than one heading for a single cost; e.g., a cost might be a sunk cost, an overhead cost, and a product cost. There would be an "X" placed under each of these headings opposite the cost.

						Product Cost			
	Opportunity Cost	Sunk Cost	Variable Cost	Fixed Cost	Direct Materials	Direct Labor	Manufacturing Overhead	Selling Cost	Differential Cost
Facility rent									
Utilities									
Personal computer depreciation									
Equipment rent									
Material cost									
Labor cost									
Present

128. A manufacturing company, has provided the following data for the month of March:

Inventories:	Beginning	Ending
Raw materials	\$36,000	\$24,000
Finished goods	\$57,000	\$28,000

Raw materials purchased during March totaled \$69,000 and the cost of goods manufactured totaled \$146,000.

Required:

- a. What was the cost of raw materials used in production during March? Show your work.
- b. What was the cost of goods sold for March? Show your work.

a.

Beginning materials inventory	\$36,000
Add: Purchases of raw materials	<u>69,000</u>
Raw materials available for use	105,000
Deduct: Ending raw materials inventory	<u>24,000</u>
Raw materials used in production	<u>\$81,000</u>

b.

Cost of goods manufactured	\$146,000
Add: Beginning finished goods inventory	<u>57,000</u>
Goods available for sale	203,000
Deduct: Ending finished goods inventory	<u>28,000</u>
Cost of goods sold	<u>\$175,000</u>

AICPA: BB Critical Thinking

AICPA: FN Measurement

Blooms: Analyze

Difficulty: 2 Medium

Gradable: manual

Learning Objective: 02-04 Understand how material, labor, and overhead costs are added to a product at each stage of the production process.

Topic: How Costs Flow through the Statements

140. Explain the difference between an outlay cost, and expense, and an opportunity cost.

An outlay cost is any cash outflow, either past, present or future. An expense is a cost that is charged against revenue in an accounting period. **Not** all outlay costs are expense—they may have future benefit in which case they are assets. An opportunity cost is **not** an outlay—it is the benefit that is forgone or **not** being received by choosing one alternative over another.

AACSB: Analytical Thinking

AICPA: FN Measurement

Blooms: Remember

Difficulty: 2 Medium

Gradable: manual

Learning Objective: 02-01 Explain the basic concept of "cost".

Topic: What is a Cost?

141. Explain the difference between a cost, a cost object, and a cost pool.

A cost is a sacrifice of resources. It may be either an outlay cost or an opportunity cost. A cost object is any end for which we want to know the cost. A cost pool is a collection of costs to be assigned to the cost objects.

AACSB: Analytical Thinking

AICPA: FN Measurement

Blooms: Remember

Difficulty: 2 Medium

Gradable: manual

Learning Objective: 02-03 Explain the process of cost allocations.

Topic: Cost Allocation

142. Explain the difference between direct materials inventory, work in process inventory, finished goods inventory and cost of goods sold.

Direct materials inventory contains the raw materials (or the costs of the materials) that will be used in production. Work in process contains the product (or the accumulated costs) that has been started into production but are **not** yet completed. Finished goods contains the completed product (or the cost of it) but **not** yet sold. Cost of goods sold contains the costs associated with the product that has been sold.

AACSB: Analytical Thinking

AICPA: FN Measurement

Blooms: Remember

Difficulty: 2 Medium

Gradable: manual

Learning Objective: 02-04 Understand how material, labor, and overhead costs are added to a product at each stage of the production process.

Topic: Details of Manufacturing Cost Flows

143. Explain the difference between cost of goods manufactured and cost of goods sold.

Cost of goods manufactured consists of all the costs attached to the production completed during the period. Cost of goods manufactured is removed from the work in process account and added to the finished goods account. Cost of goods sold consists of the costs of the goods that are sold during the period. Cost of goods sold is removed from the finished goods account and expensed on the income statement.

AACSB: Analytical Thinking

AICPA: FN Measurement

Blooms: Remember

Difficulty: 2 Medium

Gradable: manual

Learning Objective: 02-04 Understand how material, labor, and overhead costs are added to a product at each stage of the production process.

Topic: Details of Manufacturing Cost Flows

144. Explain the difference between a direct cost and an indirect cost.

A direct cost is any cost that can be directly and unambiguously related to a cost object in an economic fashion. An indirect cost is any cost that **cannot** be directly related to a cost object.

AACSB: Analytical Thinking

AICPA: FN Measurement

Blooms: Remember

Difficulty: 2 Medium

146. The following information applies to the Garden Master Company for the year ended December 31, 2016:

Factory Rent	\$80,000
Direct Materials Inventory, Beginning	50,000
Direct Materials Inventory, Ending	45,000
Direct Materials Purchases	325,000
Direct Labor-Wages	550,000
Indirect Labor-Wages	25,000
Finished Goods Inventory, Beginning	50,000
Finished Goods Inventory, Ending	75,000
Indirect Materials	50,000
Plant Utilities	25,000
General and Administrative	130,000
Work-in-Process Inventory, Beginning	50,000
Work-in-Process Inventory, Ending	55,000
Marketing Expenses	180,000
Sales Revenue	1,825,000

Required:

Prepare a statement of cost of goods manufactured and an income statement for the year ended December 31, 2016.

Garden Master Company Statement of Cost of Goods Manufactured For the Year Ended December 31, 2016	
Direct	

Materials Used			
	Direct Materials Inventory, Beginning	\$50,000	
	Direct Materials Purchases	<u>325,000</u>	
	Total Direct Materials Available	\$375,000	
	Direct Materials Inventory, Ending	<u>45,000</u>	
Direct Materials Used			\$330,000
Direct Labor			550,000
Factory Overhead			
	Indirect Materials	\$50,000	
	Utilities for Plant	25,000	
	Indirect Labor	25,000	
	Factory Rent	<u>80,000</u>	
Total Factory Overhead			<u>\$180,000</u>

147. Michael Corporation has provided the following data for the month of July:

Sales		\$280,000
Raw materials purchases		76,000
Direct labor cost		42,000
Manufacturing overhead		77,000
Selling expenses		20,000
Administrative expense		35,000
Inventories:	Beginning	Ending
Raw materials	\$22,000	\$33,000
Work-in-process	15,000	23,000
Finished goods	52,000	43,000

a. Schedule of Cost of Goods Manufactured for July

Direct Materials:		
Beginning materials inventory	\$22,000	
Add: Purchases of raw materials	<u>76,000</u>	
Raw materials available for use	98,000	
Deduct: Ending raw materials inventory	<u>33,000</u>	
Raw materials used in production		\$65,000
Direct labor		42,000
Manufacturing overhead		<u>77,000</u>
Total manufacturing costs		184,000

Add: Beginning work in process inventory		<u>15,000</u>
		199,000
Deduct: Ending work in process inventory		<u>23,000</u>
Cost of goods manufactured		<u>\$176,000</u>

b. Income Statement for July

Sales		\$280,000
Cost of goods sold:		
Beginning finished goods inventory	\$52,000	
Add: Cost of goods manufactured	<u>176,000</u>	
Goods available for sale	228,000	
Deduct: Ending finished goods inventory	<u>43,000</u>	<u>185,000</u>
Gross margin		95,000
Selling and administrative expenses:		
Selling expenses	20,000	
Administrative expenses	<u>35,000</u>	<u>55,000</u>
Net operating income		<u>\$40,000</u>

Learning Objective: 02-04 Understand how material, labor, and overhead costs are added to a product at each stage of the production process.

Learning Objective: 02-07 Understand the distinction between financial and contribution margin income statements.

Topic: How Costs Flow through the Statements

148. The following information is available, regarding the Crossover Company:

Sales 25,000 units per year at \$45 per unit

Production 30,000 units in 2016 and 20,000 units in 2017

At the beginning of 2016 there was no inventory

Variable manufacturing costs are \$30.00 per unit

Fixed manufacturing costs are \$150,000 per year

Marketing costs are all fixed at \$75,000 per year

Required:

(a) Prepare an income statement under absorption costing for 2016 and 2017. Include a column for both years taken together.

(b) Prepare an income statement under variable costing for 2016 and 2017. Include a column for both years taken together.

(c) Comment on the results and reconcile any differences in income.

(a)

Crossover Company			
Income Statement			
Absorption Costing			
	2016	2017	Total
Sales (25,000 × \$45)	\$1,125,000	\$1,125,000	\$2,250,000
Cost of Goods Sold:			
Beginning Inventory	\$0	\$175,000	\$0
Current	1,050,000	750,000	1,800,000

Production			
Ending Inventory	<u>(175,000)</u>	<u>0</u>	<u>0</u>
Cost of Goods Sold	<u>875,000</u>	<u>925,000</u>	1,800,000
Gross Margin	250,000	200,000	450,000
Marketing Costs	<u>75,000</u>	<u>75,000</u>	<u>150,000</u>
Operating Income	<u>\$175,000</u>	<u>\$125,000</u>	<u>\$300,000</u>

(b)

Crossover Company			
Income Statement			
Variable Costing			
	2016	2017	Total
Sales (25,000 × \$45)	\$1,125,000	\$1,125,000	\$2,250,000
Variable Costs (25,000 × \$30)	<u>750,000</u>	<u>750,000</u>	<u>1,500,000</u>
Contribution Margin	375,000	375,000	750,000
Fixed Manufacturing Costs	150,000	150,000	300,000
Fixed Marketing Costs	<u>75,000</u>	<u>75,000</u>	<u>150,000</u>
Operating Income	<u>\$150,000</u>	<u>\$150,000</u>	<u>\$300,000</u>

(c) In 2016, production exceeded sales by 5,000 units. \$25,000 of committed production costs

($150,000/30,000 = \$5$ per unit \times 5,000 units) are inventoried under absorption costing but expensed under variable costing. This gives the appearance of a higher profit in 2016 for absorption costing. In 2017, the sales exceeded production. The inventoried costs from 2016 flow through to cost of goods sold in 2017 under absorption costing. These same costs had already been expensed in 2016 under variable costing. This gives variable costing the higher income. The total for both methods is the same for both years, since all revenues and costs are the same and no inventory remains at the end of 2017.

AACSB: Analytical Thinking

AICPA: FN Measurement

Blooms: Analyze

Difficulty: 2 Medium

Gradable: manual

Learning Objective: 02-07 Understand the distinction between financial and contribution margin income statements.

Topic: How to Make Cost Information More Useful to Managers

149. Razor Corporation produces and sells a single product at \$40 per unit. During 2016, the company produced 200,000 units, 160,000 of which were sold during the year. All ending inventory was in finished goods inventory; there was no inventory on hand at the beginning of the year. The following data relate to the company's production process:

Direct materials	\$550,000
Direct labor	400,000
Variable Manufacturing overhead	100,000
Fixed Manufacturing overhead	300,000
Variable marketing and administrative	160,000
Fixed marketing and administrative	110,000

Required:

Calculate the following.

- The unit cost of ending inventory on the balance sheet prepared for stockholders.
- The unit cost of ending inventory on a variable cost balance sheet.
- The operating income using absorption costing.
- The operating income using variable costing.
- The ending inventory using absorption costing.
- The ending inventory using variable costing.
- A reconciliation of the difference in operating income between absorption costing and variable costing using the shortcut method.

- $\$6.75$ ($\$550,000 + \$400,000 + \$100,000 + \$300,000 = \$1,350,000/200,000 = \6.75)
- $\$5.25$ ($\$550,000 + \$400,000 + \$100,000 = \$1,050,000/200,000 = \$5.25$)
- $\$5,050,000$ (Sales ($\$6,400,000$) - Cost of goods sold ($\$1,080,000$) - Marketing ($\$270,000$))
- $\$4,990,000$ (Sales ($\$6,400,000$) - Variable cost of goods sold ($\$840,000$) - Committed overhead ($\$300,000$) - Marketing ($270,000$))
- $\$270,000$ ($40,000$ units \times $\$6.75$)

(f) \$210,000 (40,000 units × \$5.25)

(g)

Operating income, absorption costing	\$5,050,000
Operating income, variable costing	<u>4,990,000</u>
Excess of absorption operating income over variable operating income	\$60,000

Difference in fixed overhead	Change in inventory	Fixed-overhead
Expensed under absorption costing	= in units	× rate per unit
Costing and variable costing		

Fixed manufacturing overhead:	\$300,000	= \$1.50 per unit (absorption costing)
Units produced	200,000	

Change in inventory	Fixed-Overhead	Difference in Fixed Overhead
	Rate	Expensed
40,000 units	× \$1.50	= \$60,000

Topic: How to Make Cost Information More Useful to Managers

150. Consider the following cost and production information for Barnard Steel Building Company, Inc.

	Part C-2472		Part D-1340		All other parts	
Quantity	144		120		1140	
	Subtotal	Average/unit	Subtotal	Average/unit	Subtotal	Average/unit
Direct costs						
Materials cost	\$180,000	\$1,250	\$405,000	\$3,375	\$2,446,440	\$2,146
Conversion cost	<u>72,000</u>	<u>500</u>	<u>129,000</u>	<u>1,075</u>	<u>974,700</u>	<u>855</u>
Total direct costs	\$252,000	\$1,750	\$534,000	\$4,450	\$3,421,140	\$3,001
Indirect costs						
Indirect production cost	885,600	6,150	738,000	6,150	7,011,000	6,150
Indirect operating cost	<u>723,600</u>	<u>5,025</u>	<u>603,000</u>	<u>5,025</u>	<u>5,728,480</u>	<u>5,025</u>
Total indirect costs	<u>\$1,609,200</u>	<u>\$11,175</u>	<u>\$1,341,000</u>	<u>\$11,175</u>	<u>\$12,739,480</u>	<u>\$11,175</u>
Total costs	<u>\$1,861,200</u>	<u>\$12,925</u>	<u>\$1,875,000</u>	<u>\$15,625</u>	<u>\$16,160,620</u>	<u>\$14,176</u>

Additional information:

- Sales revenue: \$20,000,000
- Beginning inventory: \$1,150,000
- Sales of part D-1340: 80 units

- Sales of all other parts are the same as the number of units produced.
- Sales price of part D-1340: \$35,500 per unit
- The only spending increase was for material cost due to increased production. All other spending as shown above was unchanged.

Barnard Steel Building Company uses the variable costing method.

Required:

(a) Compute the contribution margin, operating income, and ending inventory for Barnard Steel Building Company.

(b) Assume that sales of part D-1340 increases by 30 units to 110 units during the given period (production remains constant). Re-compute the above figures.

(c) Jaime Porter, the controller of Barnard Steel Building Company, is considering the use of absorption costing instead of variable costing to be in line with financial reporting requirements. She knows that the use of a different costing method will give rise to different incentives. Explain to her how alternative methods of calculating product costs create different incentives.

(a)

Sales revenue		\$20,000,000
Variable cost of goods sold:		
Materials	\$2,896,440	
Variable conversion	<u>1,132,700</u>	<u>\$4,029,140</u>
Contribution margin		\$15,970,860
Operating expense:		
Indirect manufacturing costs	8,634,600	

Indirect operating costs	<u>7,055,080</u>	<u>\$15,689,680</u>
Operating income		<u>\$281,180</u>
Inventory:		
Beginning inventory	\$1,150,000	
+ Cost of goods manufactured	4,207,140	
- Cost of goods sold	<u>4,029,140</u>	
Ending inventory	<u>\$1,328,000</u>	

Note: Variable cost of goods sold is based on 144 units of part C-2472, 80 units of part D-1340 and 570 units of all other parts. The increase in inventory from \$1,150,000 to \$1,328,000 (\$178,000) equals 40 units of part D-1340 × variable cost per unit of \$4,450.

(b)

Sales revenue		\$21,065,000
Variable cost of goods sold:		
Materials	\$2,997,690	
Variable conversion	<u>1,164,950</u>	<u>\$4,162,640</u>
Contribution margin		\$16,902,360
Operating expense:		
Indirect manufacturing costs	8,634,600	
Indirect operating costs	<u>7,055,080</u>	<u>\$15,689,680</u>
Operating income		<u>\$1,212,680</u>
Inventory:		
Beginning inventory	\$1,150,000	
+ Cost of goods manufactured	4,207,140	
- Cost of goods sold	<u>4,162,140</u>	

Ending inventory	\$1,194,500	
------------------	-------------	--

Note: Variable cost of goods sold is based on 144 units of part C-2472, 110 units of part D-1340 and 1,140 units of all other parts. Notice also that revenues have increased by \$1,065,000 for 30 additional units of part D-1340 at \$35,500 per unit. Variable expenses have increased by \$133,500 for the additional 30 units of part D-1340 at \$4,450 per unit. Overall, the contribution margin and operating income are \$931,500 higher than in requirement a ($\$1,065,000 - \$133,500 = \$931,500$).

(c) Alternative costing methods typically result in different income numbers. Why?

- Because of the way in which resource costs are included in determining the income numbers.
- Variable and absorption costing add costs of resources used to products without considering whether spending to supply resources is affected.
- Some resources are unaffected by how those resources are used.
- Producing more hides these costs in inventory.

Why are these differences important?

- Because managers are typically rewarded on the basis of income.
- Managers want to maximize income.

What are the problems in managers trying to maximize income?

- Sometimes the actions managers may take to maximize income may not be in the long-term best interests of the company.
- Absorption costing and also variable costing, to some extent, will motivate the manager to produce more in order to reduce the average costs.

Topic: How to Make Cost Information More Useful to Managers

151. Consider the following cost and production information for Darrell Building Components, Inc.

	Part C-1849		Part D-1251		All other parts	
Quantity	72		60		570	
	Subtotal	Average Per unit	Subtotal	Average Per unit	Subtotal	Average Per unit
Direct costs						
Materials cost	\$45,000	\$625	\$101,400	\$1,690	\$611,610	\$1,073
Conversion cost	<u>18,000</u>	<u>250</u>	<u>32,400</u>	<u>540</u>	<u>243,960</u>	<u>428</u>
Total direct costs	\$63,000	\$875	\$133,800	\$2,230	\$855,570	\$1,501
Indirect costs						
Indirect manufacturing cost	221,400	3,075	184,500	3,075	1,752,750	3,075
Indirect operating cost	<u>181,080</u>	<u>2,515</u>	<u>150,900</u>	<u>2,515</u>	<u>1,433,550</u>	<u>2,515</u>
Total indirect costs	<u>\$402,480</u>	<u>\$5,590</u>	<u>\$335,400</u>	<u>\$5,590</u>	<u>\$3,186,300</u>	<u>\$5,590</u>
Total costs	\$465,480	\$6,465	\$469,200	\$7,820	\$4,041,870	\$7,091

Additional information:

- Sales revenue: \$5,200,000
- Beginning inventory: \$275,000
- The only spending increase was for material cost due to increased production. All other spending as shown above was unchanged.
- Sales of all parts are the same as the number of units produced.

Darrell Building Components, Inc. uses the absorption costing method.

Required:

(a) Compute the gross margin, operating income, and ending inventory for Darrell Building Components, Inc.

(b) Assume that production of part D-1251 increases by 25 units during the given period (sales remain constant). Re-compute the above figures.

(c) Thane Smith, the cost manager of Darrell Building Components, argues with the controller that variable costing is a better method for product costing. Using the information in part b above, re-compute the operating income for Darrell Building Components using variable costing. Explain any differences in the operating incomes obtained under the two different methods.

(a)

Sales revenue		\$5,200,000
Absorption cost of goods sold:		
Materials	\$758,010	
Variable conversion	294,360	
Indirect manufacturing	<u>2,158,650</u>	<u>\$3,211,020</u>
Gross margin		\$1,988,980
Operating expense:		
Indirect operating costs	1,765,530	<u>\$1,765,530</u>
Operating income		<u>\$223,450</u>
Inventory:		
Beginning inventory	\$275,000	
+ Cost of goods manufactured	3,211,020	
- Cost of goods sold	<u>3,211,020</u>	

Ending inventory	<u>\$275,000</u>	
------------------	------------------	--

Note: Absorption cost of goods sold is based on 72 units of part C-1849, 60 units of part D-1251 and 570 units of all other parts.

(b)

Sales revenue		\$5,200,000
Absorption cost of goods sold:		
Materials	\$758,010	
Variable conversion	294,360	
Indirect manufacturing	<u>2,071,384</u>	<u>\$3,123,754</u>
Gross margin		\$2,076,246
Operating expense:		
Indirect operating costs	1,765,530	<u>\$1,765,530</u>
Operating income		<u>\$310,716</u>
Inventory:		
Beginning inventory	\$275,000	
+ Cost of goods manufactured	3,253,270	(increases by \$42,250 for the materials costs Incurred for the 25 additional units of part D-1251 produced, at \$1,690 per unit)

- Cost of goods sold	<u>3,123,754</u>	
Ending inventory	<u>\$404,516</u>	

Note: Absorption cost of goods sold is based on 72 units of part C-1849, 60 units of part D-1251 and 570 units of all other parts. Indirect production cost has changed from \$2,158,650 to \$2,071,384 as follows:

$\$2,158,650 - \$13,500 = \$2,145,150$; $\$2,145,150 / 727 \text{ units} = \$2,950.69 \text{ per unit}$; $= \$2,950.69 \times 702 \text{ units} = \$2,071,384$.

The amount of \$13,500 is the variable conversion cost assigned to the 25 additional units of part D-1251 that are produced ($\$540 \times 25 \text{ units} = \$13,500$); this amount is deducted from indirect production costs.

(c)

Sales revenue		\$5,200,000
Variable cost of goods sold:		
Materials:	\$758,010	
Variable conversion:	<u>294,360</u>	<u>\$1,052,370</u>
Contribution margin:		\$4,147,630
Operating expense:		
Indirect manufacturing:	2,145,150	
Indirect operating costs:	<u>1,765,530</u>	<u>\$3,910,680</u>
Operating income	<u>\$236,950</u>	

Inventory:		
Beginning inventory	\$275,000	
+ Cost of goods manufactured	1,108,120	(includes an additional \$42,250 for the materials costs and \$13,500 for the variable conversion costs incurred for the 25 additional units of part D-1251)
- Cost of goods sold	<u>1,052,370</u>	
Ending inventory	<u>\$330,750</u>	

Note: Variable cost of goods sold is based on 72 units of part C-1849, 60 units of part D-1251 and 570 units of all other parts. Indirect production cost has changed from \$2,158,650 to \$2,145,150 as follows:

$\$2,158,650 - \$13,500 = \$2,145,150$. The amount of \$13,500 is the variable conversion cost assigned to the 25 additional units of part D-1251 that are produced ($\$540 \times 25 \text{ units} = \$13,500$); this amount is deducted from indirect production costs.

The difference in operating income from the use of variable versus absorption costing is \$73,766, which comes entirely from the amount of indirect production costs considered in the two methods ($\$2,145,150 - \$2,071,384$). Under absorption costing, this amount is carried to inventory as the indirect production costs for the 25 additional units produced ($\$2,145,150/727 \text{ units} = \$2,950.69$; $\$2,950.69 \times 25 \text{ units} \times \$73,767$).

Topic: How to Make Cost Information More Useful to Managers

152. Hurwitz Corporation had the following activities during 2016:

Raw Materials:	
Inventory, Jan. 1, 2016	\$200,000
Purchases of Raw Materials	318,000
Inventory, Dec. 31, 2016	210,000
Direct Manufacturing Labor	180,000
Utilities: Plant	50,000
Depreciation: Plant and Equipment	40,000
Indirect Materials	30,000
Indirect Labor	150,000
Other Manufacturing Overhead	60,000
Sales Revenues	1,250,000
Selling and Administrative Expenses	150,000
Income Tax Rate	30%
Work-in-process Inventory, Dec. 31, 2016	120,000
Work-in-process Inventory, Jan. 1, 2016	64,000
Finished Goods Inventory, Jan. 1, 2016	80,000
Finished Goods Inventory, Dec. 31, 2016	150,000

Required:

- (a) Prepare a schedule of cost of goods manufactured for 2016.
- (b) Prepare a schedule of cost of goods sold for 2016.
- (c) Prepare an income statement for 2016.

(a)

Hurwitz Corporation		
Statement of Cost of Goods Manufactured		
For the Year Ended December 31, 2016

Learning Objective: 02-07 Understand the distinction between financial and contribution margin income statements.

Topic: How to Make Cost Information More Useful to Managers

153. Styling Toys, Inc. (STI) manufactures a variety of electronic toys for children aged 3 to 14 years. The company started as a Ma & Pa basement operation, and grew steadily over the last nine years. It now employs over 100 people and has sales revenue of over \$250 million. Samantha Marks, the CEO of STI also recognizes that competition has increased during this period; therefore future growth will **not** be easy.

Marks recognizes that one of the areas of weakness is the accounting and costing system. Marks' maternal uncle, Zack, had maintained the accounts for the company. He meticulously kept track of all the invoices that were received, payments made, and painstakingly prepared crude annual reports. With Zack passing away at the age of 85, Marks decided to hire a professional cost management expert to keep track of the company's costs. She hired Dona FalconWright, who had just completed her CMA.

After acquainting Falcon with the company and its people, Marks decided to get down to business. She called Falcon to her office to have a serious conversation about accounting and costing, in particular.

Marks: Dona, I would like you to pay particular attention to developing an official costing system. Currently, we don't have one. I believe this should be your first priority because competition is rising and if we do **not** understand our costs, we might start losing to our rivals.

Falcon: I understand your point very well, Ms. Marks.

Marks: Call me Sam.

Falcon: Very well, Sam. I have a few ideas that I picked up from my CMA courses that I think are worth implementing. However, it looks like we need to start with the basics.

Required:

Assume the role of Dona Falcon. Write a brief report outlining the basics of a cost management information system. Include in your report the following:

- Resources and costs
- Supply of resources vs. the use of resources
- Classification of costs (three dimensions of resources)
- Alternative costing systems

A cost manager implementing a costing system must make other individuals aware of the following basics of cost management systems.

Resources and costs

- Resources are consumed by organizations to transform inputs into outputs
- Resources are not free

Supply versus use of resources

- A distinction must be made between resources acquired and resources used
- Some resources are acquired in advance, whereas others are acquired as needed
- The resources acquired may not all be used, thereby creating excess capacity
- Additional demand may require acquiring additional resources.

The dimensions of resources

- Resources are identified by three dimensions:
- type of resource acquired (material, conversion, operating)
- how the resource is used (production, non-production)
- how traceable a resource is to a particular decision (direct, indirect)

Alternative costing systems

- The nature of supply and use of resources gives rise to different costing systems
- Three alternative costing systems exist:
- Variable costing
- Absorption costing
