### Chapter 1 Business Decisions and Financial Accounting

#### **ANSWERS TO QUESTIONS**

- 1. Accounting is a system of analyzing, recording, and summarizing the results of a business's activities and then reporting them to decision makers.
- 2. An advantage of operating as a sole proprietorship, rather than a corporation, is that it is easy to establish. Another advantage is that income from a sole proprietorship is taxed only once in the hands of the individual proprietor (income from a corporation is taxed in the corporation and then again in the hands of the individual proprietor). A disadvantage of operating as a sole proprietorship, rather than a corporation, is that the individual proprietor can be held responsible for the debts of the business.
- 3. Financial accounting focuses on preparing and using the financial statements that are made available to owners and external users such as customers, creditors, and potential investors who are interested in reading them. Managerial accounting focuses on other accounting reports that are not released to the general public, but instead are prepared and used by employees, supervisors, and managers who run the company.
- 4. Financial reports are used by both internal and external groups and individuals. The internal groups are comprised of the various managers of the business. The external groups include investors, creditors, governmental agencies, other interested parties, and the public at large.
- 5. The business itself, not the individual stockholders who own the business, is viewed as owning the assets and owing the liabilities on its balance sheet. A business's balance sheet includes the assets, liabilities, and stockholders' equity of only that business and not the personal assets, liabilities, and equity of the stockholders. The financial statements of a company show the results of the business activities of only that company.

- (a) Operating These activities are directly related to earning profits. They include buying supplies, making products, serving customers, cleaning the premises, advertising, renting a building, repairing equipment, and obtaining insurance coverage.
  - (b) Investing These activities involve buying and selling productive resources with long lives (such as buildings, land, equipment, and tools), purchasing investments, and lending to others.
  - (c) Financing Any borrowing from banks, repaying bank loans, receiving contributions from stockholders, or paying dividends to stockholders are considered financing activities.
- 7. The heading of each of the four primary financial statements should include the following:
  - (a) Name of the business
  - (b) Name of the statement
  - (c) Date of the statement, or the period of time
- 8. (a) The purpose of the balance sheet is to report the financial position (assets, liabilities and stockholders' equity) of a business at a point in time.
  - (b) The purpose of the income statement is to present information about the revenues, expenses, and net income of a business for a specified period of time.
  - (c) The statement of retained earnings reports the way that net income and the distribution of dividends affected the financial position of the company during the period.
  - (d) The purpose of the statement of cash flows is to summarize how a business's operating, investing, and financing activities caused its cash balance to change over a particular period of time.
- 9. The income statement, statement of retained earnings, and statement of cash flows would be dated "For the Year Ended December 31, 2012," because they report the inflows and outflows of resources during a period of time. In contrast, the balance sheet would be dated "At December 31, 2012," because it represents the assets, liabilities and stockholders' equity at a specific date.
- 10. Net income is the excess of total revenues over total expenses. A net loss occurs if total expenses exceed total revenues.
- 11. The accounting equation for the balance sheet is: Assets = Liabilities + Stockholders' Equity. Assets are the economic resources controlled by the company. Liabilities are amounts owed by the business. Stockholders' equity is the owners' claims to the business. It includes amounts contributed to the business (by investors through purchasing the company's stock) and the amounts earned and accumulated through profitable business operations.

1-2 Solutions Manual

- 12. The equation for the income statement is Revenues Expenses = Net Income. Revenues are increases in a company's resources, arising primarily from its operating activities. Expenses are decreases in a company's resources, arising primarily from its operating activities. Net Income is equal to revenues minus expenses. (If expenses are greater than revenues, the company has a Net Loss.)
- 13. The equation for the statement of retained earnings is: Beginning Retained Earnings + Net Income Dividends = Ending Retained Earnings. It begins with beginning-of-the-year retained earnings which is the prior year's ending retained earnings reported on the prior year's balance sheet. The current year's net income reported on the income statement is added and the current year's dividends are subtracted from this amount. The ending retained earnings amount is reported on the end-of-year balance sheet.
- 14. The equation for the statement of cash flows is: Cash flows from operating activities + Cash flows from investing activities + Cash flows from financing activities = Change in cash for the period. Change in cash for the period + Beginning cash balance = Ending cash balance. The net cash flows for the period represent the increase or decrease in cash that occurred during the period. Cash flows from operating activities are cash flows directly related to earning income (normal business activity). Cash flows from investing activities include cash flows that are related to the acquisition or sale of the company's long-term assets. Cash flows from financing activities are directly related to the financing of the company.
- 15. Currently, the Financial Accounting Standards Board (FASB) is given the primary responsibility for setting the detailed rules that become Generally Accepted Accounting Principles (GAAP) in the United States. (Internationally, the International Accounting Standards Board (IASB) has the responsibility for setting accounting rules known as International Financial Reporting Standards (IFRS).)
- 16. The main goal of accounting rules is to ensure that companies produce useful financial information for present and potential investors, lenders, and other creditors in making decisions in their capacity as capital providers. Financial information must show relevance and faithful representation, as well as be comparable, verifiable, timely, and understandable.
- 17. An ethical dilemma is a situation where following one moral principle would result in violating another. Three steps that should be considered when evaluating ethical dilemmas are:
  - (a) Identify who will benefit from the situation (often, the manager or employee) and how others will be harmed (other employees, the company's reputation, owners, creditors, and the public in general).
  - (b) Identify the alternative courses of action.
  - (c) Choose the alternative that is the most ethical that which you would be proud to have reported in the news media. Often, there is no one right answer and hard choices will need to be made. Following strong ethical practices is a key part of ensuring good financial reporting by businesses of all sizes.

18. Accounting frauds and cases involving academic dishonesty are similar in many respects. Both involve deceiving others in an attempt to influence their actions or decisions, often resulting in temporary personal gain for the deceiver. For example, when an accounting fraud is committed, financial statement users may be misled into making decisions they wouldn't have made had the fraud not occurred (e.g., creditors might loan money to the company, investors might invest in the company, or stockholders might reward top managers with big bonuses). When academic dishonesty is committed, instructors might assign a higher grade than is warranted by the student's individual contribution. Another similarity is that, as a consequence of the deception, innocent bystanders may be adversely affected by fraud and academic dishonesty. Fraud may require the company to charge higher prices to customers to cover costs incurred as a result of the fraud. Academic dishonesty may lead to stricter grading standards, with significant deductions taken for inadequate documentation of sources referenced. A final similarity is that if fraud and academic dishonesty are ultimately uncovered, both are likely to lead to adverse long-term consequences for the perpetrator. Fraudsters may be fined, imprisoned, and encounter an abrupt end to their careers. Students who cheat may be penalized through lower course grades or expulsion, and might find it impossible to obtain academic references for employment applications.

<sup>\*</sup> Due to the nature of cases, it is very difficult to estimate the amount of time students will need to complete them. As with any open-ended project, it is possible for students to devote a large amount of time to these assignments. While students often benefit from the extra effort, we find that some become frustrated by the perceived difficulty of the task. You can reduce student frustration and anxiety by making your expectations clear, and by offering suggestions (about how to research topics or what companies to select). The skills developed by these cases are indicated below.

### M1-15

(a) (300) (b) 70 (c) 3,900. Electronic Arts was not profitable because its expenses (\$3,900) were greater than its revenues (\$3,600), resulting in the net loss of \$300 reported on the income statement.

The above amounts are determined using the various relationships that exist in the financial statements. Because this exercise excludes two pieces of information from both the income statement and statement of retained earnings, students must first work backwards from the balance sheet to the statement of retained earnings to the income statement. Although not required, the following statements show the given and missing information. The ?s in the balance sheet are determined from A = L + SE.

Income Statement For the Year Ended xxxx			
Revenues	\$3,600		
Expenses	<u>(c)</u>

Total Stockholders' Equity	6	,237
Total Liabilities and Stockholders' Equity	\$ 15	,463

### Req. 4

Southwest Airlines financed its assets primarily with liabilities (\$9,226) as opposed to stockholders' equity (\$6,237).

### **ANSWERS TO EXERCISES**

### E1-1

- a) Assets = Liabilities + Stockholders' Equity
  - = \$13,750 + \$4,450
  - = \$18,200
  - = Assets reported on the balance sheet
- b) Net Income = Revenue Expenses
  - = \$10,500 \$9,200
  - = \$1,300
  - = Net income reported on the income statement
- c) Beginning Retained Earnings (R/E) + Net Income Dividends = Ending R/E \$3,500 + \$1,300 \$500 = \$4,300
- d) Beginning Cash + Cash Flows from Operating Activities + Cash Flows from (Used in) Investing Activities + Cash Flows from (Used in) Financing Activities = Ending Cash

$$1,000 + 1,600 + (1,000) + (900) = 700$$

### E1-2

- a) Assets = Liabilities + Stockholders' Equity
  - = \$18,500 + \$61,000
  - = \$79.500
  - = Assets reported on the balance sheet
- b) Net Income = Revenue Expenses
  - = \$32,100 \$18,950
  - = \$13,150
  - = Net income reported on the income statement
- c) Beginning Retained Earnings (R/E) + Net Income Dividends = Ending R/E \$20,500 + \$13,150 \$4,900 = \$28,750
- d) Beginning Cash + Cash Flows from Operating Activities + Cash Flows from (Used in) Investing Activities + Cash Flows from (Used in) Financing Activities = Ending Cash

$$33,200 + 15,700 + (57,200) + (55,300) = 64,00$$

### E1-3

### Req. 1

DSW, Inc. Balance Sheet At January 29, 2011 (in thousands)

ASSETS	
Cash	\$ 93,617
Accounts Receivable	12,514
Property, Plant, and Equipment	210,391
Other Assets	692,375
Total Assets	<u>\$1,008,897</u>

Liabilities	
Accounts Payable	\$149,722
Notes Payable	95,589
Other Liabilities	122,822
Total Liabilities	368,133
Stockholders' Equity	

Stockholders Equity	
Contributed Capital	314,382
Retained Earnings	326,382
Total Stockholders' Equity	640,764
Total Liabilities and Stockholders' Equity	\$1,008,897

### Req. 2

Most of the financing as of January 29 came from stockholders. The stockholders have financed \$640,764 of the total assets and creditors have financed only \$368,133 of the total assets of the company.

Req. 1

READER DIRECT Balance Sheet At December 31, 2012

Liabilities

Cash Accounts Receivable Property and Equipment	\$ 47,500 Accounts Payable 26,900 Note Payable 48,000	\$ 8,000 <u>2,850</u>
	Total Liabilities	<u> 10,850</u>
	Stockholders' Equity	
	Contributed Capital	98,000
	Retained Earnings	13,550
	Total Stockholders' Equity	<u> 111,550</u>
	Total Liabilities and	
Total Assets	\$122,400 Stockholders' Equity	<b>\$122,400</b>

### Req. 2

Beginning Retained Earnings (R/E) + Net Income – Dividends = Ending R/E, so Net Income = Ending R/E + Dividends - Beginning R/E

= \$13,550 + 0 - 0= \$13,550

Net income for the year was \$13,550. This is the first year of operations and no dividends were declared or paid to stockholders; therefore, retained earnings is \$13,550 (which represents income for one year).

### Req. 3

Most of the financing as of December 31, 2012 came from stockholders. The stockholders have financed \$111,550 of the total assets and creditors have financed only \$10,850 of the total assets of the company.

### Req.4

Beginning Retained Earnings (R/E) + Net Income – Dividends = Ending R/E, so Ending R/E = \$13,550 + 3,000 - 2,000 = \$14,550

Retained Earnings at December 31, 2013 would be \$14,550.

### Req. 1

### CINEMARK HOLDINGS, INC Income Statement For the Quarter Ended March 31, 2011 (in thousands)

Revenues	
Admissions Revenues	\$311,692
Concessions Revenues	146,681
Other Revenues	<u> 24,763</u>
Total Revenues	483,136
Expenses	
General and Administrative Expenses	179,047
Film Rental Expenses	165,153
Rent Expense	66,426
Concessions Expenses	23,282
Other Expenses	<u>24,265</u>
Total Expenses	<u>458,173</u>
Net Income	<u>\$24,963</u>

The question marks in the exercise correspond to Total Expenses of \$458,173 and Net Income of \$24,963, as determined above.

### Req. 2

Cinemark's main source of revenue is theater admissions and its biggest expenses are general and administrative expenses and film rental expenses.

### HOME REALTY, INCORPORATED Income Statement For the Year Ended December 31, 2012

Revenue:	
Sales Revenue	<u>\$166,000</u>
Expenses:	
Wages Expense	97,000
Advertising Expenses	9,025
Interest Expense	6,300
Income Tax Expense	<u> 18,500</u>
Total Expenses	<u>130,825</u>
Net Income	<u>\$ 35,175</u>

Note that dividends declared are not an expense. As a distribution of the company's prior profits, they will be deducted from Retained Earnings.

### E1-8

- A Net Income = \$110,000 \$82,000 = \$28,000Stockholders' Equity = \$150,000 - \$70,000 = \$80,000
- B Total Revenues = \$80,000 + \$12,000 = \$92,000Total Liabilities = \$112,000 - \$70,000 = \$42,000
- C Net Income (Loss) =  $\$80,000 \$86,000 = \frac{\$(6,000)}{100}$ Stockholders' Equity =  $\$104,000 - \$26,000 = \frac{\$78,000}{100}$
- D Total Expenses = \$50,000 \$20,000 = \$30,000Total Assets = \$22,000 + \$77,000 = \$99,000
- E Total Revenues =  $\$81,000 \$6,000 = \underline{\$75,000}$ Total Assets =  $\$73,000 + \$28,000 = \underline{\$101,000}$

-18 Solutions Manual

### Req. 1

### MIAMI MUSIC CORPORATION Income Statement For the Month Ended January 31, 2012

Total Revenues	\$131,000
Operating Expenses	90,500
Net Income	<u>\$ 40,500</u>

### MIAMI MUSIC CORPORATION Balance Sheet At January 31, 2012

Assets:	·
Cash	\$30,800
Accounts Receivable	25,300
Supplies	40,700
Total Assets	<u>\$96,800</u>

### Liabilities:

Accounts Payable	\$ <u>25,700</u>
Total Liabilities	25,700

### Stockholders' Equity:

Contributed Capital	30,600
Retained Earnings (from the income statement above)	40,500
Total Stockholders' Equity	71,100
Total Liabilities and Stockholders' Equity	<u>\$96,800</u>

### Req. 2

Miami Music Corporation generated a profit of \$40,500, as indicated by "Net Income" on the income statement.

### Req. 3

Miami Music Corporation should have no problem paying its liabilities since it has more total assets than total liabilities. In fact, it has over three times as many total assets as liabilities (\$96,800/\$25,700 = 3.77 times). This means that Miami Music Corporation could pay its liabilities more than three times over if all assets on hand at January 31, 2012, were converted to cash. Of course, not all assets will be converted into cash right away. Even so, looking only at the amount of cash at the end of January, we see that Miami Music has enough cash to cover all its liabilities. This is a very strong financial position.

#### E1-10

### Req. 1

Average monthly revenue,  $$216,000 \div 12 = $18,000$ 

### Req. 2

Average monthly salaries and wages expense,  $$33,000 \div 12 = $2,750$ 

### Req. 3

Advertising is an expense because it represents the cost of ads that were run during the period to generate revenue.

### Req. 4

The dividends are not reported as an expense because they represent a distribution of prior profits to stockholders. Consequently, they appear only on the statement of retained earnings, not the income statement.

### Req. 5

Standing alone, the income statement does not report, or make it possible to determine, the ending cash balance. Some revenues might not have been collected, and some expenses might not have been paid by the end of the year. The amount of cash on December 31, 2012, would be reported on the balance sheet under assets and on the cash flow statement as the final amount shown.

### E1-11

### **CP1-2**

### Req. 1

Nuclear Company's income statement reported net income of \$21,950, suggesting that the company was profitable because revenues exceeded expenses.

### Req. 2

Nuclear Company's statement of retained earnings reported a retained earnings balance of \$21,750, after dividends of \$200 had been subtracted. This suggests the company could have sustained additional dividends of \$21,750, if sufficient cash were available to pay them. As it turns out, the company's balance sheet reports cash of \$12,000, suggesting that only \$12,000 in additional dividends could be paid (without borrowing additional cash).

### Req. 3

Nuclear Company's balance sheet reports total liabilities of \$31,470 and stockholders' equity of \$84,030, indicating that the company is financed mainly by stockholders.

### Req. 4

Nuclear Company was founded at the beginning of the year, so it began with no cash. The balance sheet reports a cash balance of \$12,000 at the end of the year. The reasons for this increase of \$12,000 would be shown in the statement of cash flows.

### **PB1-4**

### Req. 1

The statement of cash flows shows that the Cheese Factory increased its cash balance by \$5,000, during the year ended December 31, 2012.

### Req. 2

The income statement shows that the Cheese Factory earned net income of \$80,000 during the year ended December 31, 2012, after having deducted wages expense of \$540,000. A 10% increase in wages would result in additional wage expense of \$54,000 (\$540,000 x 0.10), which would decrease net income to \$26,000 (\$80,000 – \$54,000). (This answer ignores the possible income tax savings that would be created by having greater wages expense.)

### **ANSWERS TO SKILLS DEVELOPMENT CASES**

### **S1-1**

- 1. D
- 2. A
- 3. C
- 4. D

### Sources:

### Reg. 1

The Home Depot's income statement shows net income of \$3,338 (million), which is labeled net earnings. Note that the amounts on the financial statements are rounded to the nearest million, so this is actually \$3,338,000,000 (answer d).

### Req. 2

The income statement shows that the amount of sales was \$67,997 (million) for the year ended January 30, 2011 (answer a).

### Req. 3

The balance sheet shows that inventory (merchandise inventories) costing \$10,625 (million) was on hand at January 30, 2011 (answer c).

### Req. 4

The balance sheet and statement of cash flows show Cash (and Cash Equivalents) totaling \$545 (million) at January 30, 2011 (answer d).

### **S1-2**

### Req. 1

Lowe's net income for the year ended January 28, 2011 was \$2,010 (million). This is less than the \$3,338 (million) earned by Home Depot for the year ended January 30<sup>th</sup>, 2011.

.-34 Solutions Manual

### S1-2 (continued)

### Req. 2

Lowe's reported sales revenue of \$48,815 (million) for the year ended January 28, 2011. This is lower than the \$67,997 (million) reported by Home Depot for the year ended January 30<sup>th</sup>, 2011.

### Req. 3

Lowe's inventory as of January 28, 2011 was \$8,321 (million). This is lower than the \$10,625 (million) reported by Home Depot as of January 30, 2011.

### Req. 4

Lowe's Cash (and Cash Equivalents) on January 28, 2011 was \$652 (million). This is greater than the \$545 (million) reported by Home Depot at January 30, 2011.

### Req. 5

Because Home Depot's stock is traded on the New York Stock Exchange, Home Depot must be a public company. Like Home Depot, Lowe's is a public company. Its stock trades on the New York Stock Exchange under the symbol LOW.

### Req. 6

The Home Depot and Lowe's might choose to end their fiscal years in January because, as retailers, the weeks surrounding December 31<sup>st</sup> are the busiest of the year. Sales are usually greater immediately before Christmas, and gift returns are usually greater during the first weeks of the following new year. The Home Depot's year end of January 30, 2011, is the final Sunday in January. Lowe's year end of January 28, 2011, is the final Friday in January.

### Req. 7

Two measures of financial success are Net Income and Sales Revenues. As noted for requirements 1 and 2, Home Depot reported greater amounts for both measures, suggesting that the company was more successful during the 2010 fiscal year. Note that Home Depot is slightly bigger than Lowe's, with more locations, more inventory (requirement 3), and more total assets. Given these differences, Home Depot is likely to produce more sales and net income than Lowe's. To determine whether Home Depot is truly run more successfully than Lowe's, a complete analysis is required and should take into account size differences between the two companies. (You'll learn about this kind of analysis in later chapters).

### **S1-3**

The solutions to this case will depend on the company and/or accounting period selected for analysis.

### **S1-4**

### Reg. 1

The accounting concept that the Rigas family is accused of violating is the separate entity assumption.

### Req. 2

Based on the limited information available, it is difficult to categorize particular dealings as appropriate or inappropriate. Dealings would clearly be inappropriate if they involved Adelphia paying for items for the owners' personal use or to unfairly transfer some of the resources of Adelphia (and its stockholders) to the Rigas family. However, we cannot determine the propriety of the payments from the limited information available.

### Req. 3

Stockholders should take at least two actions to ensure this kind of behavior does not occur or does not occur without their knowledge. First, stockholders should ensure that the managers of the business are accountable for their actions. The most common way of doing this is to appoint a board of directors who are independent of top management. These directors should review and challenge the actions taken by management and require that the financial statements disclose significant transactions with related parties. Second, stockholders should read the financial statements, including any notes describing related party transactions. Any questionable dealings should be raised with top management at the company's annual meeting. If stockholders don't receive satisfactory answers to their concerns, they should sell their investment in the company's stock.

### Req. 4

Other parties that might be harmed by the actions committed by the Rigas family are creditors (such as suppliers and banks), the company's auditors, governmental agencies (such as the IRS and SEC), and the public at large.

.-36 Solutions Manual

### **S1-5**

### Req. 1

You should take the position that an *independent* annual audit of the financial statements is an absolute must. This is the best way to ensure that the financial statements are complete, are free from bias, and conform with GAAP. You should be prepared to reject the stockholder's uncle as the auditor because there is no evidence about his competence as an accountant or auditor. Also, he does not appear independent because he is related to the stockholder who prepares the financial statements, resulting in a potential conflict of interest.

### Req. 2

You should strongly recommend the selection of an independent CPA in public practice because the financial statements should be audited by a competent and independent professional who must follow prescribed accounting and auditing standards on a strictly independent basis. An audit by an uncle would not meet these requirements.

### **S1-6**

### Req. 1

A balance sheet lists items owned (assets) and owed (liabilities) at a particular point in time, producing a "net worth" that represents the excess of assets over liabilities. Two balance sheets are presented below, one based on historical costs (similar to GAAP) and one based on fair values (similar to a personal financial planning approach). Notes for these balance sheets also are presented, along with a conclusion about which individual is better off.

### Based on historical cost:

Ashley		Jason	
Assets Cash Artwork Total Assets	\$ 1,000 <u>800</u> 1,800	Assets Cash PlayStation Console Total Assets	\$6,000 250 6,250
Liabilities Loan Payable Total Liabilities	250 250	Liabilities Tuition Payable Loan Payable Total Liabilities	800 4,800 5,600
Net Worth	\$ 1,550	Net Worth	\$ 650

### S1-6 (continued):

Req. 1 (continued)

Based on fair value:

Ashley		Jason	
Assets		Assets	
Cash	\$ 1,000	Cash	\$6,000
Artwork	1,400	PlayStation Console	180
Total Assets	2,400	Total Assets	6,180
Liabilities		Liabilities	
Loan Payable	250	Tuition Payable	800
Total Liabilities	250	Loan Payable	4,800
		Total Liabilities	5,600
Net Worth	\$ 2,150	Net Worth	\$ 580

The notes are an important part of these balance sheets.

### Notes:

- 1) The goal in preparing these balance sheets is to estimate each individual's net worth, represented as the excess of assets over liabilities.
- 2) Use of historical cost is consistent with generally accepted accounting principles. Note that these asset values have not been adjusted for "value" consumed through use, which is not consistent with generally accepted accounting principles. The fair value balance sheets are based on the estimated current values of assets, some of which are greater and others less than their cost.
- 3) Some potential assets (e.g., Porsche) are not recorded because their likelihood of occurrence is not certain.

### Req. 2

Based on the calculations of net worth and underlying assumptions indicated above, Ashley is "better off" because her net worth (\$1,550 or \$2,150) is greater than Jason's (\$650 or \$580). A creditor is more likely to lend money to Ashley because she has a greater net worth. Alternatively, a creditor might lend to both characters, but charge Jason a higher interest rate to compensate for the increased risk that he might not be able to repay the loan.

Note that choosing between historical cost and fair values inevitably requires trading off the reliability of accounting information (cost is not as subjective as fair values) and the potential relevance of that information (fair values may be more relevant when determining an individual's net worth).

1-38 Solutions Manual

### S1-6 (continued):

### Req. 3

An income statement lists the amounts earned (revenues) and costs incurred (expenses) during a particular period of time, producing "net income" that represents the excess of revenues over expenses. An income statement is presented below for both Ashley and Jason. Notes for these income statements are presented below, along with a conclusion about which individual is more successful.

Ashley		Jason	
Revenue		Revenue	
Part Time Job (for October)	\$ 1,500	Lottery Ticket Winnings	\$1,950
Expenses		Expenses	
Rent Expense (for October)	470	Rent Expense (for October)	800
Living Expenses (for October)	950	Living Expenses (for October)	950
Total Expenses	1, 420	Total Expenses	1,750
Net Income	\$ 80	Net Income	\$ 200

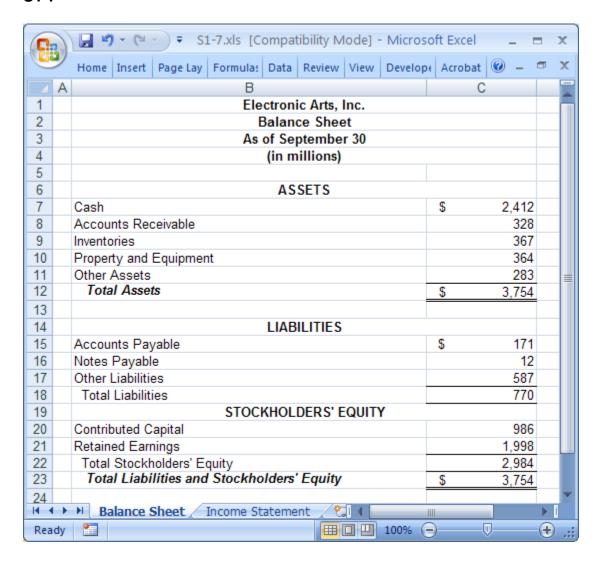

### Notes:

- 1) Jason's lottery ticket winnings are not likely to recur in the future.
- 2) Income taxes are not reported (although they would apply to both Ashley and Jason).

### Req.4

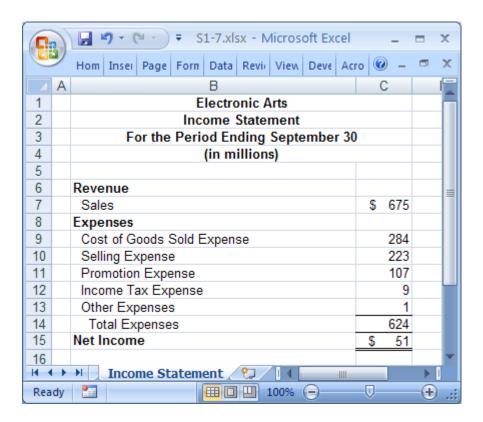

### Conclusion:

Based on the net income numbers alone, Jason was more successful in the current period. However, his revenues are likely to be non-recurring, whereas Ashley's appear more stable and likely to recur in the future. For this reason, one might conclude that Ashley actually was more successful, but that the current period's net income does not yet reflect this greater success. As a long-term creditor, it would be better to lend money to Ashley as she has a more stable source of income to meet future expenses. Notice that you should not reach a conclusion based only on the numbers.
