Chapter 2 Recording Business Transactions

Review Questions

1. Identify the three categories of the accounting equation, and list at least four accounts associated with each category.

The three categories of the accounting equation are assets, liabilities, and equity. Assets include Cash, Accounts Receivable, Notes Receivable, Prepaid Expenses, Land, Building, Equipment, Furniture, and Fixtures. Liabilities include Accounts Payable, Notes Payable, Accrued Liability, and Unearned Revenue. Equity includes Owner, Capital, Owner, Withdrawals, Revenue, and Expenses.

2. What is the purpose of the chart of accounts? Explain the numbering typically associated with the accounts.

Companies need a way to organize their accounts so they use a chart of accounts. Accounts starting with 1 are usually Assets, 2 - Liabilities, 3 - Equity, 4 - Revenues, and 5 - Expenses. The second and third digits in account numbers indicate where the account fits within the category.

3. What does a ledger show? What's the difference between a ledger and the chart of accounts?

A chart of accounts and a ledger are similar in that they both list the account names and account numbers of the business. A ledger, though, provides more detail. It includes the increases and decreases of each account for a specific period and the balance of each account at a specific point in time.

4. Accounting uses a double-entry system. Explain what this sentence means.

With a double-entry you need to record the dual effects of each transaction. Every transaction affects at least two accounts.

5. What is a T-account? On which side is the debit? On which side is the credit? Where does the account name go on a T-account?

A T-account is a shortened form of each account in the ledger. The debit is on the left side, credit on the right side, and the account name is shown on top.

6. When are debits increases? When are debits decreases?

Debits are increases for assets, withdrawals, and expenses. Debits are decreases for liabilities, capital, and revenue.

7. When are credits increases? When are credits decreases?

Credits are increases for liabilities, capital, and revenue. Credits are decreases for assets, withdrawals, and expenses.

8. Identify which types of accounts have a normal debit balance and which types of accounts have a normal credit balance.

Assets, withdrawals, and expenses have a normal debit balance. Liabilities, capital, and revenue have a normal credit balance.

9. What are source documents? Provide examples of source documents that a business might use.

Source documents provide the evidence and data for accounting transactions. Examples of source documents a business would have are: bank deposit slips, purchase invoices, bank checks, and sales invoices

10. Where are transactions initially recorded?

Transactions are first recorded in a journal, which is the record of transactions in date order.

11. Explain the five steps in journalizing and posting transactions.

Step 1: Identify the accounts and the account type. You need this information before you can complete the next step. Step 2: Decide if each account increases or decreases, then apply the rules of debits and credits. Reviewing the rules of debits and credits, we use the accounting equation to help determine debits and credits for each account. Step 3: Record transactions in the journal using journal entries. Step 4: Post the journal entry to the ledger. When journal entries are posted from the journal to the ledger, the dollar amount is transferred from the debit and credit columns to the specific accounts in the ledger. The date on the journal entry should also be transferred to the accounts in the ledger. Step 5: Determine whether the accounting equation is in balance. After each entry the accounting equation should always be in balance.

12. What are the four parts of a journal entry?

Part 1: Date of the transaction. Part 2: Debit account name and dollar amount. Part 3: Credit account name and dollar amount. The credit account name is indented. Part 4: Brief explanation.

13. What is involved in the posting process?

When transactions are posted from the journal to the ledger, the dollar amount is transferred from the debit and credit columns to the specific accounts in the ledger. The date of the journal entry is also transferred to the accounts in the ledger. The posting reference columns in the journal and ledger are also completed. In a computerized system, this step is completed automatically when the transaction is recorded in the journal.

14. What is the purpose of the trial balance?

The trial balance is used to prove the equality of total debits and total credits of all accounts in the ledger; it is also used to prepare the financial statements.

15. What is the difference between the trial balance and the balance sheet?

A trial balance verifies the equality of total debits and total credits of all accounts on the trial balance and is an internal document used only by employees of the company. The balance sheet, on the other hand, presents the business's accounting equation and is a financial statement that can be used by both internal and external users.

16. If total debits equal total credits on the trial balance, is the trial balance error-free? Explain your answer.

If total debits equal total credits on the trial balance, it does not mean that the trial balance is errorfree. An incorrect amount could have been used, an entry could have been completely missed, or the wrong account title could have been debited or credited.

17. What is the calculation for the debt ratio? Explain what the debt ratio evaluates.

The debt ratio is calculated by dividing total liabilities by total assets and shows the proportion of assets financed with debt. It can be used to evaluate a business's ability to pay its debts.

E2-25 Analyzing accounting errors

Learning Objectives 4

Courtney Meehan has trouble keeping her debits and credits equal. During a recent month, Courtney made the following accounting errors:

- **a.** In preparing the trial balance, Courtney omitted a \$5,000 Notes Payable. The debit to Cash was correct.
- **b.** Courtney posted a \$1,000 Utilities Expense as \$100. The credit to Cash was correct.
- **c.** In recording a \$600 payment on account, Courtney debited Furniture instead of Accounts Payable.
- **d.** In journalizing a receipt of cash for service revenue, Courtney debited Cash for \$50 instead of the correct amount of \$500. The credit was correct.
- e. Courtney recorded a \$210 purchase of office supplies on account by debiting Office Supplies for \$120 and crediting Accounts Payable for \$120.

Requirements

- 1. For each of these errors, state whether total debits equal total credits on the trial balance.
- **2.** Identify each account that has an incorrect balance and the amount and direction of the error (e.g., "Accounts Receivable \$500 too high").

SOLUTION

Critical Thinking

Tying It All Together Case 2-1

Before you begin this assignment, review the Tying It All Together feature in the chapter.

Part of the **Fry's Electronics**, **Inc.**'s experience involves providing technical support to its customers. This includes in-home installations of electronics and also computer support at their retail store locations.

Requirements

- **1.** Suppose Fry's Electronics, Inc. provides \$10,500 of computer support at the Dallas-Fort Worth store during the month of November. How would Fry's Electronics record this transaction? Assume all customers paid in cash. What financial statement(s) would this transaction affect?
- **2.** Assume Fry's Electronics, Inc.'s Modesto, California, location received \$24,000 for an annual contract to provide computer support to the local city government. How would Fry's Electronics record this transaction? What financial statement(s) would this transaction affect?
- **3.** What is the difference in how revenue is recorded in requirements 1 and 2? Clearly state when revenue is recorded in each requirement.

SOLUTION

Requirement 1

Fry's Electronics would record the following journal entry:

Date	Accounts and Explanation	Debit	Credit
	Cash	10,500	
	Service Revenue		10,500

The transaction would increase assets (Cash) and equity on the balance sheet and increase Service Revenue on the income statement.

Requirement 2

Fry's Electronics would record the following journal entry:

Date	Accounts and Explanation	Debit	Credit
	Cash Unearned Revenue	24,000	24,000

The transaction would increase assets (Cash) and increase liabilities (Unearned Revenue) on the balance sheet.

Requirement 3

In requirement 1, Fry's Electronics recorded revenue because the company had received the cash from the customer and provided the service. In requirement 2, Fry's Electronics recorded a liability, Unearned Revenue, because even though cash was received, the service has not been provided. The revenue related to requirement 2 will not be recorded until the service has been provided.

Decision Case 2-1

Your friend, Dean McChesney, requested that you advise him on the effects that certain transactions will have on his business, A-Plus Travel Planners. Time is short, so you cannot journalize the transactions. Instead, you must analyze the transactions without a journal. McChesney will continue the business only if he can expect to earn a monthly net income of \$6,000. The business completed the following transactions during June:

- **a.** McChesney deposited \$10,000 cash in a business bank account to start the company. The company gave capital to McChesney.
- **b.** Paid \$300 cash for office supplies.
- c. Incurred advertising expense on account, \$700.
- d. Paid the following cash expenses: administrative assistant's salary, \$1,400; office rent, \$1,000.
- e. Earned service revenue on account, \$8,800.
- f. Collected cash from customers on account, \$1,200.

Requirements

- 1. Open the following T-accounts: Cash; Accounts Receivable; Office Supplies; Accounts Payable; McChesney, Capital; Service Revenue; Salaries Expense; Rent Expense; and Advertising Expense.
- **2.** Post the transactions directly to the accounts without using a journal. Record each transaction by letter. Calculate account balances.
- **3.** Prepare a trial balance at June 30, 2018.
- **4.** Compute the amount of net income or net loss for this first month of operations. Would you recommend that McChesney continue in business?

McChesney should discontinue the business because net income falls below the target amount.

Ethical Issue 2-1

Better Days Ahead, a charitable organization, has a standing agreement with First National Bank. The agreement allows Better Days Ahead to overdraw its cash balance at the bank when donations are running low. In the past, Better Days Ahead managed funds wisely and rarely used this privilege. Jacob Henson has recently become the president of Better Days Ahead. To expand operations, Henson acquired office equipment and spent large amounts on fundraising. During Henson's presidency, Better Days Ahead has maintained a negative bank balance of approximately \$10,000.

What is the ethical issue in this situation, if any? State why you approve or disapprove of Henson's management of Better Days Ahead's funds.

SOLUTION

The bank has a standing agreement with Better Days Ahead for overdrafts, so as long as transactions are compliant with terms of the agreement, there is no ethical issue. The exercise refers to Better Days Ahead managing funds "wisely." However, whether funds are managed wisely or not is a matter of prudent business management and not an ethical issue. Presumably if Better Days Ahead was exceeding the terms of the agreement, the bank would cancel the arrangement.

Some students may point out that the agreement was for times when donations were running low, whereas the reasons given for the overdraft are for expansion and fundraising. If this is interpreted to mean that Better Days Ahead is abusing the privilege according to the terms of the agreement, then there may be an ethical issue involved, but that is not made clear by the information given.

Students may approve of Henson's cash management if the arrangement is beneficial to Better Days Ahead, and thus helps them accomplish their charitable mission more effectively. Students may disapprove of Henson's cash management if (a) they feel it is "unwise" (poor business management), or (b) if they believe he is exceeding the terms of the agreement.

Fraud Case 2-1

Roy Akins was the accounting manager at Zelco, a tire manufacturer, and he played golf with Hugh Stallings, the CEO, who was something of a celebrity in the community. The CEO stood to earn a substantial bonus if Zelco increased net income by year-end. Roy was eager to get into Hugh's elite social circle; he boasted to Hugh that he knew some accounting tricks that could increase company income by simply revising a few journal entries for rental payments on storage units. At the end of the year, Roy changed the debits from "rent expense" to "prepaid rent" on several entries. Later, Hugh got his bonus, and the deviations were never discovered.

Requirements

- 1. How did the change in the journal entries affect the net income of the company at year-end?
- 2. Who gained and who lost as a result of these actions?

Requirement 1

By changing an expense to an asset, the total expenses will decrease and net income will increase.

Requirement 2

The CEO gained by earning a bonus, and the accounting manager may have gained by getting favorable treatment from the CEO. The company lost, because the company paid out the bonus under fraudulent conditions.

Financial Statement Case 2-1

Refer to http://www.pearsonhighered.com/Horngren to view a link to **Target Corporation's** Fiscal 2015 Annual Report.

Requirements

- 1. Calculate the debt ratio for Target Corporation as of January 30, 2016.
- 2. How did the debt ratio for Target Corporation compare to the debt ratio for Kohl's Corporation? Discuss.

SOLUTION

Requirement 1

Debt ratio = Total liabilities / Total assets

= \$27,305 (in millions) / \$40,262 (in millions) = 0.678* = 67.8% * rounded

Requirement 2

Target's debt ratio is significantly higher than Kohl's (59.6%).

Communication Activity 2-1

In 35 words or fewer, explain the difference between a debit and a credit, and explain what the normal balance of the six account types is.

SOLUTION

Debits are on the left, credits are on the right. Normal balance for assets, expenses, and Owner's Withdrawals is a debit. For liability, Owner's Capital, and revenue accounts, the normal balance is a credit.
