49. The _____ option on the Info screen lets you mark a document as final so that it cannot be edited and encrypt a document with a password.

ANSWER: Protect Document

POINTS: 1

REFERENCES: Work with Document Properties 40

Module 2 (Word)

50. The _____ option on the Info tab lets you remove unwanted information from a document, check for content that people with disabilities might find difficult to read, and check the document for features that are not supported by previous versions of Word.

ANSWER: Check for Issues

POINTS: 1

REFERENCES: Work with Document Properties 40

51. Click the _____ button on the Clipboard pane to remove all the items from the Office Clipboard at once.

ANSWER: Clear All

POINTS: 1

REFERENCES: Use the Office Clipboard 30

52. When you select the _____ check box in the Find and Replace dialog box, Word finds only exact matches for uppercase and lowercase characters as entered in the Find what text box.

ANSWER: Match case

POINTS: 1

REFERENCES: Find and Replace Text 32

53. Describe how the Office Clipboard works. List two ways to open the Clipboard pane. How do you add items to the Office Clipboard? How are items displayed in the Clipboard pane, and what happens when you add a new item? How do you insert items on the Clipboard into a document, and how do you remove items from the Clipboard?

ANSWER: The Office Clipboard allows you to collect text and graphics from any Office program and insert them into a document. You can open the Clipboard pane by clicking the launcher in the Clipboard group on the Home tab or by setting it to open automatically when you cut or copy two items consecutively.

You add items to the Clipboard by cutting or copying text or graphics from a document. Items are displayed in the Clipboard pane with the first item collected at the bottom and the most recent item collected at the top. When you add a new item, the existing items move down the list. If there are already 24 items on the list, the first item collected will be deleted.

You insert items from the Clipboard by clicking on them. The item is pasted at the location of the insertion point. You delete individual items by clicking the list arrow next to the item and clicking Delete. To delete all of the items on the Clipboard, click the Clear All button.

54. Which Word research feature lets you look up synonyms for awkward or repetitive words? Describe the steps you would take to use this feature.

ANSWER: The Thesaurus lets you look up synonyms for awkward or repetitive words. To use the Thesaurus, follow these steps:

1. Select the word you want to look up, then click the Thesaurus button in the Proofing group on the Review tab to open the Thesaurus pane.
2. Find an appropriate word from the list of synonyms which appears in the Thesaurus pane.
3. Point to the word you chose, click the list arrow, and click Insert to replace the selected word with the new word.

POINTS: 1

Module 2 (Word)

REFERENCES: Research Information 36

TOPICS: Critical Thinking

55. Describe how to replace all instances of a word in a document with a different word. How do you ensure that you only replace versions of the word that are in lowercase characters (i.e. replace all instances of “journal” but not the word “Journal” when used in the phrase “Journal of the American Medical Association”)?

ANSWER: You can use the Find and Replace feature to automatically search for and replace all instances of a word or phrase in a document. Click the Replace button in the Editing group to open the Find and Replace dialog box. Type the word you want to find in the Find what text box. Type the word you want to replace that word with in the Replace with text box. Click Replace All to change all occurrences of the original word to the replacement word.

To ensure that Word only finds exact matches for the uppercase and lowercase characters entered in the Find what text box, click More in the Find and Replace dialog box then select the Match case check box. This will make sure, for instance, that Word only finds and replaces all instances of the word “journal” but not the word “Journal” when used in the phrase “Journal of the American Medical Association.”

56. Megan needs to distribute anonymous blood pressure test results for 10 volunteers over the Internet. Before she does so, what should she do to ensure that private information about her and her medical practice is removed and that the file is accessible to as many people as possible?

ANSWER: Megan should first follow these steps to ensure that private and confidential information is removed from the document:

1. Click the File tab to open Backstage view.
2. Click the Check for Issues button then click Inspect Document to open the Document Inspector.
3. Make sure all check boxes are selected, then click Inspect.
4. Click Remove All next to each category to ensure that sensitive information is removed, then click Close.

She should then use the other Check for Issues options to ensure that the document is accessible to people with disabilities and that it is compatible with previous versions of Microsoft Word.

58. Keith wants to use Microsoft Word to publish an article about how to write research grants to a blog on the Internet, so that other people can read and add comments to it. What steps does he need to take to do this?

ANSWER: Keith will publish his article as an online blog. There are two ways he could do this:

Name: _____ Class: _____ Date: _____

Module 2 (Word)

1. He could write the article as a new blog post. He would click New on the File tab then double-click Blog post to open a predesigned blog post document. He can write his article in this template, format the article, and add images.

2. He could publish an existing document as a blog by opening the document, clicking the File tab, clicking Share, and then clicking Post to Blog.

Either way, he needs to first obtain a blog account with a blog service provider if he does not already have one, and then register his blog account with Word.

POINTS: 1

59. Keith decides that he wants to copy some information from another Word document into a paragraph of his article. He also wants to make sure that the text he copies is formatted the same way as the rest of the paragraph, not the way it was formatted in the original document. How would he do this?

ANSWER: Keith would take the following steps:

1. Open both documents.
2. Select the text he wants to copy.
3. Use the Copy button or [Ctrl][C] to copy the selected text to the Clipboard.
4. Switch to the other document by clicking the button for that document on the task bar. Alternatively, he could use the Arrange All button or the View Side by Side button to display both documents at the same time.
5. Place the insertion point in the location where he wants to paste the text.
6. Use the Paste button or [Ctrl][V] to paste the text at the location of the insertion point. He could also click the item on the Office Clipboard to paste the text.
7. Click the Paste Options button, then click the Keep Text Only (T) button to ensure that the formatting of the text is changed to match the rest of the paragraph.
