Social Security income is partially taxed based on the taxpayer's modified adjusted gross income. Modified adjusted gross income includes adjusted gross income plus tax exempt interest plus half of the Social Security received. For low income taxpayers, no Social Security income is taxable. Higher income taxpayers must include 50 percent to 85 percent of the Social Security receipts in income. Given the high level of income reported by Margaret and John, it is safe to say they would have to include 85 percent of the Social Security payments in taxable income. To be certain, the IRS Social Security worksheet should be used to calculate the taxable amount.
