

Allen Repko and Rick Szostak  
*Interdisciplinary Research*, 3<sup>rd</sup> Edition  
Chapter 1 Test Bank

1. Epistemology

- \*a. Is how each discipline develops new knowledge.
- b. Is the understanding that authorities establish truth.
- c. Is the use of intuition to draw conclusions.
- d. Is a skeptical approach to learning.

Ans: A

Answer location: 4, 21

2. A(n) \_\_\_\_\_ is a scholarly contribution to the clear understanding of a problem based on research.

- a. Theory
- b. Concept
- c. Method
- \*d. Insight

Ans: D

Answer location: 4

3. Which of the following is a way to describe disciplines that share an interest in a broad issue?

- a. Groups
- \*b. Studies
- c. Concepts
- d. Theories

Ans: B

Answer location: 7

4. The “inter” part of interdisciplinary studies refers to:

- \*a. Contested space (problems that are the focus of several disciplines)
- b. Action taken on insights (integrative process)
- c. Results of integration (cognitive advancement)
- d. Space between campus and community

Ans: A

Answer location: 3

5. Which of the following best describes Interdisciplinary studies?

- a. Seeks to integrate disciplinary insights across campus and community life
- b. Brings together the insights from two or more disciplines
- c. It seeks to integrate insights both from within and outside of academic research
- \*d. It seeks to integrate disciplinary insights with the goal of developing a more comprehensive understanding.

Ans: D

Answer location: 3, 23-26

6. The primary focus of an interdisciplinary study is?

- a. The disciplines
- b. Research
- \*c. The problem or issue
- d. The insights of the scholars

Ans: C

Chapter 1 Test Bank

Answer location: 3

7. Common ground is all of the following except:

- a. Shared basis
- b. Exists between disciplinary insights
- c. Makes integration possible
- \*d. Goes beyond campus and community life

Ans: D

Answer location: 18

8. One assumption of interdisciplinary is that the disciplines alone are inadequate to address complex problems. Their lens of a problem is unique, and they use a reductionist strategy in research. This is called?

- \*a. Disciplinary inadequacy
- b. Complex reality
- c. Disciplinary foundations
- d. Disciplinary integration

Ans: A

Answer location: 11-12

9. "Both/and" is a position that is seen in the interdisciplinary field of health sciences.

- \*a. True
- b. False

Ans: A

Answer location: 10

10. All of the following describe one of the four assumptions of interdisciplinary except:

- a. Disciplinary inadequacy to address a complex problem
- \*b. The side by side placement of insights from more than one discipline
- c. Foundational disciplinarity
- d. Complex reality

Ans: B

Answer location: 10-12

11. \_\_\_\_\_ is a prefix that identifies the space between disciplines where several might focus their research.

- a. Intra
- b. Multi
- c. Studies
- \*d. Inter

Ans: D

Answer location: 3
