The Yankel Corporation's controller prepares adjusting entries only at the end of the fiscal year. The following adjusting entries were prepared on December 31, 2016:

	Debit	Credit
Interest expense	1,800	
Interest payable		1,800
Insurance expense	60,000	
Prepaid insurance		60,000
Interest receivable	3,000	
Interest revenue		3,000

Additional information:

1. The company borrowed \$30,000 on June 30, 2016. Principal and interest are due on June 30, 2017. This note is the company's only interest-bearing debt.
2. Insurance for the year on the company's office buildings is \$90,000. The insurance is paid in advance.
3. On August 31, 2016, Yankel lent money to a customer. The customer signed a note with principal and interest at 9% due in one year.

Required:

Determine the following:

1. What is the interest rate on the company's note payable?
2. The 2016 insurance payment was made at the beginning of which month?
3. How much did Yankel lend its customer on August 31?

1. \$1,800 represents six months of interest on a \$30,000 note, or 50% of annual interest.

$\$1,800 \div .50 = \$3,600$ in annual interest

$\$3,600 \div \$30,000 = \mathbf{12\% \text{ interest rate}}$

Or,

Principal \times Rate \times Time = Interest

$\$30,000 \times \text{Rate} \times 6/12 = \$1,800$

$\$1,800 \div \$30,000 = .06$ six-month rate

To annualize the six month rate: $.06 \times 12/6 = .12$ or 12%

2. $\$90,000 \div 12$ months = \$7,500 per month in insurance

$\$60,000 \div \$7,500 = 8$ months expired. The insurance was paid on **May 1**, eight months ago.

3. Principal \times Rate \times Time = Interest

Principal $\times 9\% \times (4/12) = \$3,000$

Principal $\times 3\% = \$3,000$

Principal = \$100,000

Or

\$3,000 represents four months (September through December) in accrued interest, or \$750 per month.

$\$750 \times 12$ months = \$9,000 in annual interest

Principal $\times 9\% = \$9,000$

Principal = $\$9,000 \div .09 = \mathbf{\$100,000 \text{ note}}$

Essay Questions

137. Describe the difference between external events and internal events, and provide two examples of each.

External events involve an **exchange** between the **company** and a **separate economic entity**. Examples include purchasing inventory on account or borrowing money from a bank. Internal events directly affect the financial position of the company but **do not involve exchange transactions with another entity**. Examples include depreciation of equipment or use of supplies.

138. Describe what is meant by deferred revenues and provide two examples.

Deferred revenues are created when a company **receives cash** from a customer for **goods or services** that will be **provided in a future period**. Examples include magazine subscriptions received in advance by a publishing firm or rent received in advance by a property leasing firm. A liability exists because of the obligation to provide the service.

141. What is the difference between permanent accounts and temporary accounts, and why does an accounting system have both types of accounts?

Permanent accounts represent assets, liabilities, and shareholders' equity **at a point in time**. Temporary accounts represent **changes in retained earnings** caused by dividend, revenue, expense, and gain and loss accounts. The temporary accounts are closed out annually to facilitate measuring income on an annual basis. Temporary accounts are a convenience to aid the preparation of financial statements by recording revenues and expenses in these accounts rather than directly into retained earnings.

142. What is the purpose of the statement of cash flows? List the three major categories of cash flows and give an example of a cash transaction for each category.

The purpose of the statement of cash flows is to **summarize** the **transactions** that caused **cash to change** during the reporting period. The statement of cash flows summarizes cash flows in three categories: **operating, investing, and financing**. Operating activities include cash flows related to transactions entering into the determination of net income, such as cash collections from customers, payments for purchases, and other receipts, such as interest and dividends. Investing activities include purchasing and selling equipment or certain investment securities. Financing activities include borrowing or repaying loans, issuing stock, and payment of dividends.

143. What is the purpose of the closing process?

The closing process serves a dual purpose: (1) the **temporary accounts are reduced to a zero** balance, ready to measure activity in the next accounting period, and (2) the **balances** of these temporary accounts are **transferred to retained earnings** to reflect the changes that have occurred in that account during the period. Revenue and expense accounts are first transferred to income summary. The net balance in income summary is then transferred to retained earnings.
