

CHAPTER 13

NON-FINANCIAL AND CURRENT LIABILITIES

CHAPTER STUDY OBJECTIVES

1. Understand the importance of non-financial and current liabilities from a business perspective. Cash flow management is a key control factor for most businesses. Taking advantage of supplier discounts for prompt payment is one step companies can take. Control of expenses and related accounts payable can improve the efficiency of a business, and can be particularly important during economic downturns.

2. Define liabilities, distinguish financial liabilities from other liabilities, and identify how they are measured. Liabilities are defined as present obligations of an entity arising from past transactions or events that are settled through a transfer of economic resources in the future. They must be enforceable on the entity. Financial liabilities are a subset of liabilities. They are contractual obligations to deliver cash or other financial assets to another party, or to exchange financial instruments with another party under conditions that are potentially unfavourable. Financial liabilities are initially recognized at fair value, and subsequently either at amortized cost or fair value. ASPE does not specify how non-financial liabilities are measured. However, unearned revenues are generally measured at the fair value of the goods or services to be delivered in the future, while others are measured at the best estimate of the resources needed to settle the obligation. Under IFRS, non-financial liabilities other than unearned revenues are measured at the best estimate of the amount the entity would rationally pay at the date of the statement of financial position to settle the present obligation.

3. Define current liabilities and identify and account for common types of current liabilities. Current liabilities are obligations that are payable within one year from the date of the statement of financial position or within the operating cycle if the cycle is longer than a year. IFRS also includes liabilities held for trading and any obligation where the entity does not have an unconditional right to defer settlement beyond 12 months after the date of the statement of financial position. There are several types of current liabilities. The most common are accounts and notes payable, and payroll-related obligations.

4. Identify and account for the major types of employee-related liabilities. Employee-related liabilities include (1) payroll deductions, (2) compensated absences, and (3) profit-sharing and bonus agreements. Payroll deductions are amounts that are withheld from employees and result in an obligation to the government or other party. The employer's matching contributions are also included in this obligation. Compensated absences earned by employees are company obligations that are recognized as employees earn an entitlement to them, as long as they can be reasonably measured. Bonuses based on income are accrued as an expense and liability as the income is earned.

5. Explain the recognition, measurement, and disclosure requirements for decommissioning and restoration obligations. A decommissioning, restoration, or asset retirement obligation (ARO) is an estimate of the costs a company is obliged to incur when it retires certain assets. It is recorded as a liability and is usually long-term in nature. Under ASPE, only legal obligations are recognized. They are measured at the best estimate of the cost to settle them at the date of the statement of financial position, and the associated cost is included as part of the cost of property, plant, and equipment. Under IFRS, both legal and constructive obligations are recognized. They are measured at the amount the entity would rationally pay to be relieved of the obligation, and are capitalized as part of PP&E or to inventory, if due to production activities. Over time, the liability is increased for the time value of money and the asset costs are amortized to expense. Entities disclose information about the nature of the obligation and how it is measured, with more disclosures required under IFRS than ASPE.

6. Explain the issues and account for unearned revenues. When an entity receives proceeds in advance or for multiple deliverables, unearned revenue is recognized to the extent the entity has not yet performed. This is measured at the fair value of the remaining goods or services that will be delivered. When costs remain to be incurred in revenue transactions where the revenue is considered earned and has been recognized, estimated liabilities and expenses are recognized at the best estimate of the application of the matching concept.

7. Explain the issues and account for product guarantees and other customer program obligations. Historically, an expense approach has been used to account for the outstanding liability, but some recent standards have moved toward the revenue approach. Under the expense approach, the outstanding liability is measured at the cost of the economic resources needed to meet the obligation. The assumption is that along with the liability that is required to be recognized at the reporting date, the associated expense needs to be measured and matched with the revenues of the period. Under the revenue approach, the outstanding liability is measured at the value of the obligation. The proceeds received for any goods or services yet to be delivered or performed are considered to be unearned at the point of sale. Until the revenue is earned, the obligation—the liability—is reported at its sales or fair value. The liability is then reduced as the revenue is earned.

8. Explain and account for contingencies and uncertain commitments, and identify the accounting and reporting requirements for guarantees and commitments. Under existing standards, a loss is accrued and a liability recognized if (1) information that is available before the issuance of the financial statements shows that it is likely (or more likely than not under IFRS) that a liability has been incurred at the date of the financial statements, and (2) the loss amount can be reasonably estimated (under IFRS, it would be a rare situation where this could not be done). An alternative approach likely to be required in new standards being developed by the IASB is described in the Looking Ahead section of the chapter.

Guarantees in general are accounted for similarly to contingencies. Commitments, or contractual obligations, do not usually result in a liability at the date of the statement of financial position. Information about specific types of outstanding commitments is reported at the date of the statement of financial position.

9. Indicate how non-financial and current liabilities are presented and analyzed. Current liability accounts are commonly presented as the first classification in the liability section of the statement of financial position, although under IFRS, a common presentation is to present current assets and liabilities at the bottom of the statement. Within the current liability section, the accounts may be listed in order of their maturity or in order of their liquidation preference. IFRS requires information about and reconciliations of any provisions. Additional information is provided so that there is enough to meet the requirement of full disclosure. Information about unrecognized loss contingencies is reported in notes to the financial statements, including their nature and estimates of possible losses. Commitments at year end that are significant in size, risk, or time are disclosed in the notes to the financial statements, with significantly more information required under IFRS. Three common ratios used to analyze liquidity are the current, acid-test, and days payables outstanding ratios.

10. Identify differences in accounting between IFRS and ASPE and what changes are expected in the near future. Private enterprise and international standards are substantially the same. However, there are some classification differences. ASPE does not address “provisions,” and there are differences related to which decommissioning and restoration liabilities are recognized and how the costs are capitalized, and how the probability and measurement criteria are applied to contingencies. In addition, requires considerably more disclosure. Looking ahead, revisions to the existing standards are being proposed by the IASB and FASB that will likely be applied, at least in part, under *CICA Handbook*, Part II in the future. The major changes relate to the recognition and measurement standards for non-financial liabilities.

MULTIPLE CHOICE—Conceptual

Answer	No.	Description
c	1.	Essential characteristics of liabilities
c	2.	Constructive obligation
b	3.	Recognition and accounting for financial liabilities
a	4.	Classification of notes payable
d	5.	Zero-interest-bearing notes
c	6.	Refinancing of long-term debts
b	7.	Identify item that is not a current liability.
c	8.	Identify the current liability.
d	9.	Classification of stock dividends distributable
a	10.	Goods and Services Tax
b	11.	Identify current liability.
c	12.	Accounting for GST
a	13.	Provincial Sales Tax
b	14.	Corporation income tax
a	15.	Knowledge of accounts payable
d	16.	Current liabilities in general - determine false statement
c	17.	Determine employer's payroll costs

MULTIPLE CHOICE—Conceptual

1. According to the existing IFRS and the CICA Handbook Part II guidelines, which of the following is NOT an essential characteristic of a liability?

- a) It embodies a duty or responsibility.
- b) The transaction or event that obliges the entity has occurred.
- c) The obligation is enforceable on the other party.
- d) The entity has little or no discretion to avoid the duty.

Answer: c

Difficulty: Easy

Learning Objective: Define liabilities, distinguish financial liabilities from other liabilities, and identify how they are measured.

Section Reference: Recognition and Measurement

CPA: Financial Reporting

Bloomcode: Knowledge

2. A constructive obligation arises when

- a) the entity is legally obligated to honour the obligation.
- b) the entity makes an unconditional promise to pay money in the future.
- c) past or present company practice reveals the entity acknowledges a potential economic burden.
- d) the entity has a conditional obligation which becomes unconditional if an uncertain future event occurs.

Answer: c

Difficulty: Easy

Learning Objective: Define liabilities, distinguish financial liabilities from other liabilities, and identify how they are measured.

Section Reference: Recognition and Measurement

CPA: Financial Reporting

Bloomcode: Comprehension

3. Which of the following statements is NOT true about recognition and subsequent accounting for financial liabilities?

- a) They are initially recognized at their fair value.
- b) After acquisition, they continue to be accounted for at fair value.
- c) After acquisition, they are generally accounted for at amortized cost.
- d) Short-term liabilities, such as accounts payable, are usually recorded at their maturity value.

Answer: b

Difficulty: Medium

Learning Objective: Define liabilities, distinguish financial liabilities from other liabilities, and identify how they are measured.

Section Reference: Recognition and Measurement

CPA: Financial Reporting

Bloomcode: Knowledge

4. Among Oslo Corp.'s short-term obligations, on its most recent statement of financial position date, are notes payable totalling \$250,000 with the Provincial Bank. These are 90-day notes, renewable for another 90-day period. These notes should be classified on Oslo's statement of financial position as
- a) current liabilities.
 - b) deferred charges.
 - c) long-term liabilities.
 - d) shareholders' equity.

Answer: a

Difficulty: Medium

Learning Objective: Define current liabilities and identify and account for common types of current liabilities.

Section Reference: Common Current Liabilities

CPA: Financial Reporting

Bloomcode: Application

5. Regarding zero-interest-bearing notes,
- a) they do not have an interest component.
 - b) the debtor receives the future value of the note and pays back the present value.
 - c) any interest is never recognized until the note is repaid.
 - d) the debtor receives the present value of the note and pays back the future value.

Answer: d

Difficulty: Medium

Learning Objective: Define current liabilities and identify and account for common types of current liabilities.

Section Reference: Common Current Liabilities

CPA: Financial Reporting

Bloomcode: Knowledge

6. Under IFRS, even if the entity plans to refinance long-term debt, the current portion must be reported as a current liability UNLESS
- a) long-term financing has been completed after the statement of financial position date, but before the financial statements are released.
 - b) management intends to refinance the debt on a long-term basis.
 - c) at statement of financial position date, the entity expects to refinance under an existing agreement for at least a year, and the decision is solely at its discretion.
 - d) management intends to discharge the debt by issuing shares.

Answer: c

Difficulty: Medium

Learning Objective: Define current liabilities and identify and account for common types of current liabilities.

Section Reference: Common Current Liabilities
CPA: Financial Reporting
Bloomcode: Knowledge

7. Which of the following should NOT be included in the current liabilities section of the statement of financial position?
- a) trade accounts payable
 - b) current portion of long-term debt to be retired by non-current assets
 - c) short-term zero-interest-bearing notes payable
 - d) a liability due on demand (callable debt)

Answer: b

Difficulty: Easy
Learning Objective: Define current liabilities and identify and account for common types of current liabilities.
Section Reference: Common Current Liabilities
CPA: Financial Reporting
Bloomcode: Comprehension

8. Which of the following is a current liability?
- a) preferred dividends in arrears
 - b) stock dividends distributable
 - c) preferred cash dividends payable
 - d) stock splits

Answer: c

Difficulty: Easy
Learning Objective: Define current liabilities and identify and account for common types of current liabilities.
Section Reference: Common Current Liabilities
CPA: Financial Reporting
Bloomcode: Knowledge

9. Stock dividends distributable should be classified on the
- a) income statement as an expense.
 - b) statement of financial position as an asset.
 - c) statement of financial position as a liability.
 - d) statement of financial position as an item of shareholders' equity.

Answer: d

Difficulty: Easy
Learning Objective: Define current liabilities and identify and account for common types of current liabilities.
Section Reference: Common Current Liabilities
CPA: Financial Reporting
Bloomcode: Knowledge

10. Goods and Services Tax (GST)

- a) is a value added tax.
- b) is a sales tax charged by each province on all taxable goods.
- c) in some provinces, is an income tax.
- d) must be collected by all businesses in Canada.

Answer: a

Difficulty: Easy

Learning Objective: Define current liabilities and identify and account for common types of current liabilities.

Section Reference: Common Current Liabilities

CPA: Financial Reporting

Bloomcode: Knowledge

11. Which of the following may be classified as a current liability?

- a) stock dividends distributable
- b) accounts receivable credit balances
- c) losses expected to be incurred within the next twelve months in excess of the company's insurance coverage
- d) tenant's rent deposit not returnable until the end of a long-term lease

Answer: b

Difficulty: Medium

Learning Objective: Define current liabilities and identify and account for common types of current liabilities.

Section Reference: Common Current Liabilities

CPA: Financial Reporting

Bloomcode: Comprehension

12. Accounting for GST includes

- a) crediting GST Payable to record GST paid on inventory for resale.
- b) crediting GST Receivable to record GST collected from customers.
- c) debiting GST Receivable to record GST paid to suppliers.
- d) debiting GST Payable to record GST collected from customers.

Answer: c

Difficulty: Medium

Learning Objective: Define current liabilities and identify and account for common types of current liabilities.

Bloomcode: Comprehension

Feedback: Interest payable that would have been recorded at Dec 31/17
 $\$278,000 \times 7\% \times 1 \div 12 = \$1,575$.

41. On February 10, 2017, after issuance of its financial statements for calendar 2016, Diogenes Corp. entered into a financing agreement with Gigantic Bank, allowing Diogenes Corp. to borrow up to \$6,000,000 at any time through 2019. Amounts borrowed under the agreement bear interest at 2% above the bank's prime interest rate and mature two years from the date of the loan. Diogenes presently has \$2,250,000 of notes payable with Provincial Bank maturing March 15, 2018. The company intends to borrow \$3,750,000 under the agreement with Gigantic and pay off the notes payable to Provincial. The agreement with Gigantic also requires Diogenes to maintain a working capital level of \$9,000,000 and prohibits the payment

of dividends on common shares without prior approval by Gigantic. From the above information only, the total short-term debt of Diogenes Corp. on the December 31, 2016 statement of financial position is

- a) \$0.
- b) \$2,250,000.
- c) \$3,000,000.
- d) \$6,000,000.

Answer: b

Difficulty: Medium

Feedback: $(\$200,000 \times 13\% \times 70\%) + (\$200,000 \times 5\% \times 25\%) = \$20,700$

50. The total payroll of Carbon Company for the month of October was \$240,000, all subject to CPP deductions of 4.95% and EI deductions of 1.83%. As well, \$60,000 in federal income taxes and \$6,000 of union dues were withheld. The employer matches the employee deductions and contributes 1.4 times the employee EI deductions. What amount should Carbon record as employer payroll tax expense for October?

a) \$16,272.00

b) \$18,028.80

c) \$24,028.80

d) \$78,028.80

Answer: b

Difficulty: Medium

Learning Objective: Identify and account for the major types of employee-related liabilities.

Section Reference: Employee-Related Liabilities

CPA: Financial Reporting

Bloomcode: Application

Feedback: $(\$240,000 \times 4.95\%) + (\$240,000 \times 1.83\% \times 1.4) = \$18,028.80$

Use the following information for questions 51–52.

Silver Ltd. has 35 employees who work 8-hour days and are paid hourly. On January 1, 2017, the company began a program of granting its employees 10 days paid vacation each year. Vacation days earned in 2017 may be taken starting on January 1, 2018. Information relative to these employees is as follows:

<u>Year</u>	<u>Hourly Wages</u>	<u>Vacation Days Earned by Each Employee</u>	<u>Vacation Days Used by Each Employee</u>
2017	\$12.90	10	0
2018	13.50	10	8
2019	14.25	10	10

Silver has chosen to accrue the liability for compensated absences (vacation pay) at the current rates of pay in effect when the vacation pay is earned.

51. What is the amount of vacation pay expense that should be reported on Silver’s income statement for 2017?

- a) \$37,800
- b) \$36,120
- c) \$34,440
- d) \$ 0

Answer: b

Difficulty: Hard

Learning Objective: Identify and account for the major types of employee-related liabilities.

Bloomcode: Application

Feedback: $\$12.90 \times 8 \times 10 \times 35 = \$36,120$

52. What is the amount of the Vacation Wages Payable that should be reported at December 31, 2019?

- a) \$39,900
- b) \$45,360
- c) \$47,460
- d) \$47,880

Answer: c

Difficulty: Hard

Learning Objective: Identify and account for the major types of employee-related liabilities.

Section Reference: Employee-Related Liabilities

CPA: Financial Reporting

Bloomcode: Application

Feedback: $(\$14.25 \times 8 \times 10 \times 35) + (\$13.50 \times 8 \times 2 \times 35) = \$47,460$

53. Information regarding Oxygen Inc.'s payroll for the period ending March 22 follows:

Gross salaries and wages	\$100,000
CPP rate	4.95%
EI rate	1.83%
Employee income tax.....	deducted \$20,000
Company pension deducted.....	5% of gross salaries and wages
Union dues deducted	\$800

Assume 100% of the gross salaries and wages are subject to CPP and EI. Therefore, the NET pay for this period is

- a) \$66,690.
- b) \$67,420.
- c) \$68,220.
- d) \$72,420.

Answer: b

Difficulty: Hard

Learning Objective: Identify and account for the major types of employee-related liabilities.

62. Potassium Corp. uses the revenue approach to account for warranties. During 2017, the company sold \$500,000 worth of products, all of which carried a two-year warranty (included in the price). It was estimated that 2% of the selling price represented the warranty portion, and that 60% of this related to 2017, and 40% to 2018. Assuming that Potassium incurred costs of \$3,700 to service the warranties in 2018, what is the net warranty revenue (revenue minus warranty costs) for 2018?

- a) \$300
- b) \$1,300
- c) \$3,700
- d) \$4,000

Answer: a

Difficulty: Hard

Learning Objective: Explain the issues and account for product guarantees and other customer program obligations.

Section Reference: Product Guarantees and Customer Programs

CPA: Financial Reporting

Bloomcode: Application

Feedback: $\$500,000 \times 2\% \times 40\% = \$4,000 - \$3,700 \text{ costs} = \300

63. In 2017, Hydrogen Corp. began selling a new line of products that carry a two-year warranty against defects. Based upon past experience with other products, the estimated warranty costs related to dollar sales are as follows:

First year of warranty	2%
Second year of warranty	5%

Sales and actual warranty expenditures for 2017 and 2018 are presented below:

	<u>2017</u>	<u>2018</u>
Sales	\$450,000	\$600,000
Actual warranty expenditures	15,000	30,000

Hydrogen uses the expense approach to account for warranties. What is the estimated warranty liability at the end of 2018?

- a) \$73,500
- b) \$43,500
- c) \$28,500
- d) \$12,000

Answer: c

Difficulty: Hard

Learning Objective: Explain the issues and account for product guarantees and other customer program obligations.

Section Reference: Product Guarantees and Customer Programs

CPA: Financial Reporting

Bloomcode: Application

Feedback: $[\$450,000 + \$600,000 \times .07] - \$15,000 - \$30,000 = \$28,500$

64. Krypton Foods distributes coupons to consumers which may be presented, on or before a stated expiry date, to grocery stores for discounts on certain Krypton products. The stores are reimbursed when they send the coupons in to Krypton. In Krypton's experience, only about 50% of these coupons are redeemed. During 2017, Krypton issued two separate series of coupons as follows:

<u>Issued On</u>	<u>Total Value</u>	<u>Coupon Expiry Date</u>	<u>Amounts Reimbursed as of Dec 31/17</u>
Jan 1/17	\$250,000	Jun 30/17	\$118,000
Jul 1/17	360,000	Dec 31/17	150,000

Krypton's only journal entries for 2017 recorded debits to coupon expense, and credits to cash of \$268,000. Their December 31, 2017 statement of financial position should include a liability for unredeemed coupons of

- a) \$0.
- b) \$30,000.
- c) \$62,000.
- d) \$180,000.

Answer: b

Difficulty: Hard

Learning Objective: Explain the issues and account for product guarantees and other customer program obligations.

Feedback: $\$125,000 + \$200,000 + \$90,000 = \$415,000$

66. Jackpine Trading Stamp Co. records trading stamp revenue and provides for the cost of redemptions in the year stamps are sold to licensees. Jackpine's past experience indicates that only 75% of the stamps sold to licensees will be redeemed. Jackpine's liability for stamp redemptions was \$3,000,000 at December 31, 2017. Additional information for 2017 is as follows:

Stamp revenue from stamps sold to licensees	\$2,000,000
Cost of redemptions	1,350,000

If all the stamps sold in 2017 were presented for redemption in 2017, the redemption cost would be \$1,000,000. What amount should Jackpine report as a liability for stamp redemptions at December 31, 2017?

- a) \$3,750,000
- b) \$2,650,000
- c) \$2,400,000
- d) \$1,650,000

Answer: c

Feedback: $\$3,000,000 + (\$2,000,000 \times 75\%) - \$1,350,000 - (\$1,000,000 \times 75\%) = \$2,400,000$

67. Asbestos Corp. is being sued for illness caused to local residents as a result of negligence on the company's part in permitting the local residents to be exposed to highly toxic chemicals. Asbestos's lawyer states that it is likely the corporation will lose the suit and be found liable for a judgement which may cost Asbestos anywhere from \$300,000 to \$1,500,000. However, the lawyer states that the most likely cost is \$900,000. As a result of the above facts, using ASPE, Asbestos should accrue

- a) a loss contingency of \$300,000 and disclose an additional contingency of up to \$1,200,000.
- b) a loss contingency of \$900,000 and disclose an additional contingency of up to \$600,000.
- c) a loss contingency of \$900,000 but not disclose any additional contingency.
- d) no loss contingency but disclose a contingency of \$300,000 to \$1,500,000.

Answer: b

68. At January 1, 2017, Neon Corp. owned a machine that had cost \$100,000. The accumulated depreciation to date was \$60,000, estimated residual value was \$6,000, and fair value was \$160,000. On January 4, 2017, this machine suffered major damage due to Argon Corp.'s actions and was written off as worthless. In October 2017, a court awarded damages of \$160,000 against Argon in favour of Neon. At December 31, 2017, the final outcome of this case was awaiting appeal and was, therefore, uncertain. However, in the opinion of Neon's attorney, Argon's appeal will be denied. At December 31, 2017, what amount should Neon accrue for this gain contingency?

- a) \$160,000
- b) \$130,000
- c) \$100,000
- d) \$0

Answer: d

Ex. 13-79 Contingent liabilities

Below are three independent situations:

1. In August, 2017, a worker was injured in the factory in an accident partially the result of his own negligence. The worker has sued his employer, Prince Corp., for \$500,000. Prince's legal counsel believes it is possible that the outcome of the suit will be unfavourable and that the settlement would cost the company from \$150,000 to \$400,000.
2. On October 4, 2017, a lawsuit for breach of contract seeking damages of \$2,400,000 was filed by an author against Queen Corp. Queen's legal counsel believes that an unfavourable outcome is more likely than not. A reliable measurement of the award to the plaintiff is between \$600,000 and \$1,800,000.
3. King Ltd. is involved in a pending court case. King's lawyers believe it is likely that King will be awarded damages of \$700,000.

Instructions

Discuss the proper accounting treatment, including any required disclosures, for each situation. Give the rationale for your answers. Assume all companies involved use IFRS.

Solution 13-79

1. Prince should disclose, in the notes to the financial statements, the existence of a possible contingent liability related to the law suit. The note should indicate the range of the possible loss. The contingent liability should not be accrued because the loss is only possible, not probable (as required by IFRS).
2. The likely award should be accrued by a debit to an estimated loss account and a credit to an estimated liability using the expected value method. Queen should disclose the following in the notes to the financial statements: the amount of the suit, the nature of the contingency, the reason for the accrual, and the range of the possible loss. The accrual is made because it is more likely than not (probable) that a liability has been incurred and the amount of the loss can be measured reliably.
3. King should not record the gain contingency until it is realized. Usually, gain contingencies are neither accrued nor disclosed. The \$700,000 gain contingency should be disclosed only if the likelihood that it will be realized is very high.

Difficulty: Medium

Learning Objective: Explain and account for contingencies and uncertain commitments, and

identify the accounting and reporting requirements for guarantees and commitments.

PROBLEMS

Pr. 13-80 Common types of current liabilities

Define and identify common types of current liabilities and how they are valued.

Solution 13-80

Current liabilities are obligations due within one year or the operating cycle where this is longer than one year from the statement of financial position date. The liquidation of a current liability is reasonably expected to require the use of current assets or the creation of other current liabilities. Theoretically, liabilities should be measured at the present value of the future outlay of cash required to liquidate them. In practice, current liabilities other than borrowings are usually recorded in accounting records and reported in financial statements at their full maturity value. There are several types of current liabilities, the most common being accounts and notes payable, sales taxes payable, and payroll-related obligations.

Difficulty: Easy

Learning Objective: Define liabilities, distinguish financial liabilities from other liabilities, and identify how they are measured.

Section Reference: Recognition and Measurement

CPA: Financial Reporting

Bloomcode: Knowledge

Pr. 13-81 Accounts and Notes Payable

Below are selected transactions of Blackbird Ltd. for 2017:

1. On May 10, the company purchased goods from Jay Corp. for \$60,000, terms 2/10, n/30. Purchases and accounts payable are recorded at net amounts. The invoice was paid on May 18.
2. On June 1, the company purchased equipment for \$180,000 from Seagull Ltd., paying \$60,000 in cash and giving a one-year, 8% note for the balance.
3. On September 30, the company borrowed \$162,000 from the Second National Bank by signing a one year, zero-interest-bearing note for \$180,000. The discount rate was 10%.

Instructions

- a) Prepare the journal entries necessary to record these transactions using appropriate dates.
- b) Prepare the adjusting entries necessary at December 31, 2017 in order to properly report interest expense related to the above transactions.
- c) Indicate the manner in which the above transactions should be reflected in the Current Liabilities section of Blackbird's December 31, 2017 statement of financial position.

Pr. 13-82 Refinancing of short-term debt

At their last year end, December 31, 2017, the liabilities outstanding of Copper Corp. included the following:

1. Cash dividends on common shares, \$100,000, payable on January 15, 2018
2. Note payable to Manitoba Bank, \$850,000, due January 20, 2018
3. Serial bonds, \$2,000,000, of which \$500,000 matures during 2018
4. Note payable to Ontario Bank, \$200,000, due January 27, 2018

The following transactions occurred early in 2018:

January 15: The cash dividends were paid.

January 20: The note payable to Manitoba Bank was paid.

January 25: Copper entered into a financing agreement with Saskatchewan Bank, enabling it to borrow up to \$1,000,000 at any time through the end of 2017. Amounts borrowed under the agreement would bear interest at 1% above the bank's prime rate and would mature 3 years from the date of the loan. The corporation immediately borrowed \$800,000 to replace the cash used in paying its January 20 note to Manitoba Bank.

January 26: 40,000 common shares were issued for \$300,000. \$200,000 of the proceeds was used to pay off the note payable to Ontario Bank.

February 1: The financial statements for 2017 were issued.

Instructions

Prepare a partial statement of financial position for Copper Corp., showing the manner in which

the above liabilities should be presented at December 31, 2017 under IFRS. The liabilities should be properly classified between current and long-term, and any appropriate note disclosure should be included.

Solution 13-82

Current liabilities:

Dividends payable on common shares.....	\$ 100,000
Notes payable—Manitoba Bank.....	850,000
Note payable—Ontario Bank—Note 1.....	200,000
Currently maturing portion of serial bonds.....	<u>500,000</u>
Total current liabilities.....	\$1,650,000

Long-term debt:

Serial bonds not maturing currently.....	<u>1,500,000</u>
Total long-term debt.....	<u>1,500,000</u>
Total liabilities.....	<u>\$3,150,000</u>

Note 1: On January 26, 2018, the corporation issued 40,000 common shares and received proceeds totalling \$300,000, of which \$200,000 was used to liquidate a note payable that matured on January 27, 2018.

Difficulty: Hard

Section Reference: Common Current Liabilities

CPA: Financial Reporting

Bloomcode: Analysis

Pr. 13-83 Employee-related liabilities

Identify and account for the major types of employee-related liabilities

Solution 13-83

Employee-related liabilities include (1) payroll deductions, (2) compensated absences and (3) bonus agreements. Payroll deductions are amounts withheld from employees along with the employer's required contributions that have not yet been remitted to the government.

Compensated absences earned by employees are company obligations that should be recognized as the employees earn the entitlement to them, provided they can be reasonably measured. Bonuses based on income should be accrued as an expense and liability as the income is earned.

Difficulty: Easy

Learning Objective: Identify and account for the major types of employee-related liabilities.

Section Reference: Employee-Related Liabilities

CPA: Financial Reporting

Bloomcode: Knowledge

Pr. 13-84 Asset Retirement Obligation

Extraction Friendly Ltd. (EFL) specializes in extracting ore. It prides itself for following high environmental standards in the extraction process. On January 1, 2013, EFL purchased the rights to use a parcel of land from the province of New Brunswick. The rights cost \$15,000,000

and allowed the company to extract ore for five years, i.e., until Dec 31, 2017. EFL expects to extract the ore evenly over the contract period. At the end of the contract, EFL has one year to clean up and restore the land. EFL estimates this will cost \$2,000,000.

EFL uses a discounted cash flow method to calculate the fair value of this obligation and believes that 8% is the appropriate discount rate. EFL uses straight-line depreciation method. EFL uses the calendar year as its fiscal year and follows IFRS.

As a helpful suggestion, students may want to draw a timeline of events before solving the questions given below.

Instructions (Round all values to the nearest dollar.)

- a) Prepare the journal entries to be recorded on January 1, 2013.
- b) Prepare the journal entries to be recorded on December 31, 2013. Show the amounts and accounts to be reported on the classified statement of financial position at December 31, 2013.
- c) Prepare the journal entries to be recorded on December 31, 2017. Show the amounts and accounts reported on the classified statement of financial position at December 31, 2017.
- d) After 2017, EFL was supposed to clean up and restore the land. Even though the company spent a considerable amount of money on restoration, it was sued by the province of New Brunswick for not following the contract’s requirements. On February 3, 2019, judgement was rendered against EFL for \$3,000,000. The company claims that because the language in the contract was misleading regarding the restoration costs, it plans to appeal the judgement and expects the ruling to be reduced to anywhere between \$1,000,000 and \$2,000,000, with \$1,500,000 being the probable amount. EFL has not yet released its 2018 financial statements. Discuss how EFL should report this matter on its financial statements for the year ended December 31, 2018.

Solution 13-84

- a) To record the purchase of the rights and the ARO:

January 1, 2013

Extraction rights	15,000,000	
Cash.....		15,000,000
Extraction rights	1,361,160	
Asset retirement obligation		1,361,160

5 N 8 I 2000000 FV CPT PV => 1,361,160

- b) To depreciate the extraction rights over 5 years and also record accretion (interest) expense on the obligation.

December 31, 2013

Depreciation expense	3,272,232	
(((\$15,000,000 + \$1,361,160) ÷ 5)		
Accumulated depreciation		3,272,232
Interest expense**	108,893	
(\$1,361,160 x 8%)		
Asset retirement obligation		108,893

** If the company were using ASPE, the debit is to Accretion Expense

Statement of financial position amounts:

<u>Account</u>	<u>Amount</u>	<u>Classification</u>
Extraction rights net of accumulated depreciation	\$13,088,928*	Long-term assets
Asset retirement obligation	\$1,470,053**	Long-term liabilities

*\$15,000,000 + \$1,361,160 – \$3,272,232 = \$13,088,928

**\$1,361,160 + \$108,893 = \$1,470,053

c) For the depreciation of the extraction rights, the journal entry is the same every year.

December 31, 2017

Depreciation expense	3,272,233	
Accumulated depreciation		3,272,233

For the accretion (interest) costs, first you need to find the carrying value of the ARO at January 1, 2017 and then to calculate the expense. Since the carrying value at January 1, 2017 is \$1,851,851, the interest expense is $1,851,851 \times 8\% = 148,149$.

Interest expense.....	148,149	
Asset retirement obligation.....		148,149

Statement of financial position amounts:

<u>Account</u>	<u>Amount</u>	<u>Classification</u>
Extraction rights net of accumulated depreciation	0	
Asset retirement obligation	\$2,000,000	Current liabilities

Since by the end of 2017 the liability is due to be discharged within a year, it should be classified as a current liability.

d) This is a somewhat complicated situation. Clearly EFL is expecting a contingent loss of anywhere between \$1,500,000 and \$3,000,000. However, a \$3,000,000 judgement has already been rendered against them, while the reduction in the loss is uncertain.

There are two legitimate approaches to this issue. The first approach is to record a loss of \$1,500,000 for 2018 (since this amount is deemed probable) and to provide full disclosure in the notes about the ruling and the expected appeal.

The second approach is that the firm has incurred a contingent loss of \$3,000,000 and expects a contingent gain of \$1,500,000. Because losses are recorded immediately and contingent gains are not, then EFL should record a loss of \$3,000,000 for 2018 and provide full disclosure on the possible contingent gain.

Pr. 13-85 Premiums

Creamy Candy Company offers a coffee mug as a premium for every ten 50-cent candy bar wrappers presented by customers together with \$1.00. The purchase price of each mug to the company is 90 cents; in addition it costs 60 cents to mail each mug. The results of the premium plan for the years 2017 and 2018 are as follows (assume all purchases and sales are for cash):

	<u>2017</u>	<u>2018</u>
Coffee mugs purchased	480,000	400,000
Candy bars sold	3,750,000	4,500,000
Wrappers redeemed	1,900,000	2,800,000
2017 wrappers expected to be redeemed in 2018.....	1,300,000	
2018 wrappers expected to be redeemed in 2019.....		1,800,000

Instructions

- a) Prepare the general journal entries that should be made in 2017 and 2018 related to the above plan by Creamy Candy.
- b) Indicate the account names, amounts, and classifications of the items related to the premium plan that would appear on the statement of financial position and income statement at the end of 2017 and 2018.

Solution 13-85

a)

2017

Inventory of Premium Mugs ($480,000 \times \$0.90 = \$432,000$).....	432,000	
Cash.....		432,000
Cash	1,875,000	
Sales ($3,750,000 \times \$0.50 = \$1,875,000$)		1,875,000
Cash [$1,900,000 \div 10 = 190,000 \times (\$1.00 - \$0.60) = \$76,000$]	76,000	
Premium Expense.....	95,000	
Inventory of Premium Mugs ($190,000 \times \$0.90 = \$171,000$).....		171,000
Premium Expense ($1,300,000 \div 10 = 130,000 \times \$0.50 = \$65,000$)..	65,000	
Estimated Liability for Premiums		65,000

2018

Inventory of Premium Mugs ($400,000 \times \$0.90 = \$360,000$).....	360,000	
Cash.....		360,000
Cash	2,250,000	
Sales ($4,500,000 \times \$0.50 = \$2,250,000$)		2,250,000
Cash [$2,800,000 \div 10 = 280,000 \times (\$1.00 - \$0.60) = \$112,000$]	112,000	
Estimated Liability for Premiums	65,000	
Premium Expense.....	75,000	
Inventory of Premium Mugs ($280,000 \times \$0.90 = \$252,000$).....		252,000
Premium Expense.....	90,000	
Estimated Liability for Premiums		90,000
($1,800,000 \div 10 = 180,000 \times \$0.50 = \$90,000$)		

b) Statement of financial position

<u>Name</u>	<u>Classification</u>	<u>2017</u>	<u>2018</u>
Inventory of Premium Mugs	Current Asset	\$261,000	\$369,000
Estimated Liability for Premiums	Current Liability	65,000	90,000

Income Statement

<u>Name</u>	<u>Classification</u>	<u>2017</u>	<u>2018</u>
Premium Expense	Operating Expense	160,000	165,000

Pr. 13-86 Warranties

Alaska Computer Company sells computers for \$2,000 each, which includes a 3-year warranty that requires the company to perform periodic services and to replace defective parts. During 2017, Alaska sold 500 computers on account. Based on past experience, the company has estimated the total 3-year warranty costs at \$80 for parts and \$100 for labour. (Assume sales all occur at December 31, 2017.)

In 2018, Alaska Computer Company incurred actual warranty costs relative to 2014 computer sales of \$10,000 for parts and \$12,000 for labour.

Instructions

- Using the expense warranty approach, prepare the entries to reflect the above transactions (accrual method) for 2017 and 2018.
- Using the cash basis method, what are the Warranty Expense balances for 2017 and 2018?
- The transactions of part a) create what balance under current liabilities in the 2017 statement of financial position?

Solution 13-86

a)

2017

Accounts Receivable.....	1,000,000	
Sales.....		1,000,000
Warranty Expense 500 x (\$80 + \$100).....	90,000	
Estimated Liability under Warranties		90,000

2018

Estimated Liability under Warranties	22,000	
Inventory		10,000
Accrued Payroll		12,000

- 2017 \$0
2018 \$22,000

- c) 2017 Current Liabilities—Estimated Liability under Warranties \$30,000
(The remainder of the \$90,000 liability is a long-term liability.)

Difficulty: Medium

Learning Objective: Explain the issues and account for product guarantees and other customer program obligations.

Pr. 13-87 Unredeemed coupons

During 2017, Red Deer Corp. sold 200,000 tickets for hockey games for \$60 each under a new sales promotion program. Each ticket contains one coupon. Any person who presents 2 coupons can receive a ticket to an Edmonton Flames football game for only \$2. Red Deer pays \$8.00 per football ticket and at the beginning of 2017 had purchased 80,000 tickets (any tickets not used in 2017 can be used in 2018). The company estimates that 60% of the coupons will be redeemed even though only 50,000 coupons had been processed during 2017.

Instructions

- a) What amount should Red Deer report as a liability for unredeemed coupons on December 31, 2017?
- b) What amount of expense will Red Deer report on its 2017 income statement as a result of the promotional program?
- c) Prepare any necessary 2017 journal entries related to the promotion program.
- d) Explain how the accounting treatment for this promotion is treated under IFRS.

Solution 13-87

- a) The number of coupons expected to be processed is $200,000 \times 60\% = 120,000$. In 2017, 50,000 coupons were processed, so 70,000 more are expected to be processed and accordingly 35,000 tickets to be purchased. The additional net cost per ticket is \$6 and therefore the liability for unredeemed coupons at December 31, 2017 should be $35,000 \times 6 = \$210,000$.

- b) Promotion expense = $(120,000 \div 2) \times 6 = 360,000$.

c)			
	Inventory of Premium Tickets (80,000 x \$8)	640,000	
	Cash.....		640,000
	Cash (200,000 x \$60).....	12,000,000	
	Sales		12,000,000
	Estimated Liability for Premiums	150,000	
	Cash (50,000 ÷ 2 x \$2).....	50,000	
	Inventory of Premium Tickets (50,000 ÷ 2 x \$8).....		200,000
	Premium Expense.....	360,000	
	Estimated Liability for Premiums		360,000

- d) Under IFRS, this promotion would be considered a multiple deliverables arrangement. Red Deer is selling two separate products (the hockey tickets and the football tickets), with the selling price of the hockey tickets inflated to encourage the ticket purchasers to also purchase football tickets. Therefore some of the revenue from the sale of each hockey ticket should be deferred and allocated to the delivery of the football tickets. An estimated amount should be deferred to 2018 when the remaining coupons will be redeemed.

Pr. 13-88 Contingencies

You have been hired by Yew Corp. to advise them on how to reflect the events below in their financial statements for the year ended December 31, 2017 under ASPE.

Event 1: The Division A employees union has been negotiating a new contract with Yew Corp. The union is requesting a 5% wage increase retroactive for two years. Yew's management has offered the union a 2% wage increase retroactive for one year. While the negotiations are still ongoing, the company believes that an agreement will soon be reached for a 4% wage increase retroactive for one year, but there is no guarantee that this will be the outcome of the negotiations.

Event 2: The Division B employees union is also negotiating a new contract with Yew Corp. However, these negotiations are proving to be very tough. So far there has not been much progress and management is pessimistic about a quick resolution. The company is concerned that during 2018 the Division B employees will decide to go on strike; in fact, Yew considers it very likely. At this point it is difficult to assess the economic consequences of the potential strike.

Event 3: Toward the end of 2017, a fire destroyed one of Yew's plants. The damage is estimated to be \$8,000,000 and the company's insurance policy has maximum coverage of \$15,000,000 for this. The deductible on the policy is \$300,000. The company is concerned that the insurance premium (\$200,000 in 2017) will double in 2018.

Instructions

For each of the above events, state the accounting treatment you believe is most appropriate. Be specific, and give your rationale.

Solution 13-88

Event 1: The event is more likely than not to happen and the cost can be reasonably estimated. Yew Corp. should accrue an additional expense for 2017 based on the most likely outcome of a 4% wage increase retroactive for one year. In the notes to the financial statements, they should provide the range for the potential expense (2-5%, 1-2 years).

Event 2: If Yew Corp. considers this to be a contingent liability, note disclosure only would be appropriate, since the event is likely to happen but cannot be reasonably estimated. If they do not, then no disclosure is required.

Event 3: The \$300,000 deductible payment should be accrued in 2017 as a loss from fire. While the premium is likely to increase and can be reasonably measured, the cost relates to future

periods and therefore no expense should be accrued for 2017. Full disclosure of the event and of the expected cost increase for next year is appropriate, unless the amount is immaterial.

Alternatives the company could consider:

1. Shop around for a better deal on insurance.
2. Avoid the potential premium increase by choosing to self-insure.
