

Managerial Accounting, 3e (Braun/Tietz)

Chapter 2 Building Blocks of Managerial Accounting

1) Service companies must carry a large amount of inventory to meet consumer demand.

Answer: FALSE

Diff: 1

LO: 2-1

EOC: E2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

2) Manufacturing companies usually have three types of inventory.

Answer: TRUE

Diff: 1

LO: 2-1

EOC: E2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

3) Retailers sell their products to consumers.

Answer: TRUE

Diff: 1

LO: 2-1

EOC: E2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

4) Merchandising companies include both wholesalers and retailers.

Answer: TRUE

Diff: 1

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

5) All companies have the same types of inventories.

Answer: FALSE

Diff: 1

LO: 2-1

EOC: S2-2

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

6) Only manufacturing companies have finished goods inventory.

Answer: TRUE

Diff: 2

LO: 2-1

EOC: S2-2

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

7) Which of the following are merchandising companies?

A) Manufacturers

B) Retailers

C) Wholesalers

D) Both retailers and wholesalers

Answer: D

Diff: 1

LO: 2-1

EOC: E2-15A

AACSB: Analytical Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

8) Which of the following types of companies has raw materials, work in process and finished goods inventory?

A) Retailers

B) Manufacturers

C) Wholesalers

D) Service companies

Answer: B

Diff: 1

LO: 2-1

EOC: S2-2

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

9) Which type of company makes up the largest sector of the United States economy?

A) Manufacturers

B) Merchandising

C) Wholesalers

D) Service companies

Answer: D

Diff: 1

LO: 2-1

EOC: S2-2

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

10) The balance sheet of a service company has

- A) raw materials inventory.
- B) little or no inventory.
- C) three categories of inventory.
- D) two categories of inventory.

Answer: B

Diff: 1

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

11) Schlabig & Associates, a public accounting firm, is what type of company?

- A) Manufacturer
- B) Retailer
- C) Service
- D) Wholesaler

Answer: C

Diff: 1

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

12) Jiffy Lube, an automotive maintenance company, is primarily what type of company?

- A) Manufacturer
- B) Retailer
- C) Wholesaler
- D) Service

Answer: D

Diff: 1

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

13) Among other products, Nabisco makes Oreo cookies. Which type of company is Nabisco?

- A) Service
- B) Manufacturer
- C) Retailer
- D) Wholesaler

Answer: B

Diff: 1

LO: 2-1

EOC: S2-2

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

14) Which type of company typically produces its own inventory?

- A) Manufacturer
- B) Service company
- C) Retailer
- D) Wholesaler

Answer: A

Diff: 1

LO: 2-1

EOC: S2-2

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

15) What type of company resells products it purchases ready-made from suppliers?

- A) Merchandiser
- B) Retailer
- C) Wholesaler
- D) All of the above

Answer: D

Diff: 1

LO: 2-1

EOC: S2-2

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

- 16) Before these materials are used to manufacture its cars, Toyota classifies steel, glass, and plastic as
- A) raw materials inventory.
 - B) finished goods inventory.
 - C) work in process inventory.
 - D) merchandise inventory.

Answer: A

Diff: 1

LO: 2-1

EOC: S2-2

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

- 17) Before these materials are used to manufacture cabinets, a woodworker classifies lumber, paint, and glue as

- A) finished goods inventory.
- B) work in process inventory.
- C) raw materials inventory.
- D) merchandise inventory.

Answer: C

Diff: 1

LO: 2-1

EOC: S2-2

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

- 18) Macy's (the department store chain) classifies its clothing held for sale as

- A) merchandise inventory.
- B) raw materials inventory.
- C) work in process inventory.
- D) finished goods inventory.

Answer: A

Diff: 1

LO: 2-1

EOC: S2-2

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

19) American Eagle Outfitters classifies the denim jeans on the shelves at its retail locations as

- A) finished goods inventory.
- B) work in process inventory.
- C) merchandise inventory.
- D) raw materials inventory.

Answer: C

Diff: 1

LO: 2-1

EOC: S2-2

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

20) How would Chevrolet classify its partially completed vehicles?

- A) Finished goods
- B) Raw materials
- C) Work in process
- D) Supplies

Answer: C

Diff: 1

LO: 2-1

EOC: S2-2

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

21) In the United States, the fastest growing type of company is

- A) merchandising.
- B) service.
- C) manufacturing.
- D) none of the above.

Answer: B

Diff: 1

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

22) Which of the following is a characteristic of a service company?

- A) Service companies make a product.
- B) Service companies have a single category of inventory.
- C) Service companies generally have no tangible products to sell.
- D) Service companies transform raw materials into finished goods.

Answer: C

Diff: 1

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

23) A snow removal business would be classified as a

- A) manufacturing company.
- B) merchandising company.
- C) simple company.
- D) service company.

Answer: D

Diff: 1

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

24) An accounting firm would be classified as a

- A) manufacturing company.
- B) merchandising company.
- C) simple company.
- D) service company.

Answer: D

Diff: 1

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

25) Toshiba Corporation makes computer chips. Toshiba Corporation would be classified as a

- A) merchandising company.
- B) manufacturing company.
- C) service company.
- D) simple company.

Answer: B

Diff: 1

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

26) Which type of company has three types of inventory?

- A) A manufacturing company
- B) A merchandising company
- C) A service company
- D) All of these companies

Answer: A

Diff: 1

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

27) For a _____, inventory consists of freight-in and the cost of the product which is to be resold.

- A) service company
- B) manufacturing company
- C) merchandising company
- D) all of these companies

Answer: C

Diff: 1

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

28) A _____ company has the highest percentage of labor costs as compared to the other types of companies.

- A) merchandising
- B) service
- C) manufacturing
- D) All companies have a high percentage of labor costs.

Answer: B

Diff: 1

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

29) Which type(s) of companies prepare income statements and balance sheets?

- A) Service company
- B) Merchandising company
- C) Manufacturing company
- D) All of these types of companies

Answer: D

Diff: 1

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

30) All of the following items would be found in raw materials inventory for a furniture manufacturer **except**

- A) wood.
- B) fabric.
- C) steel framing.
- D) assembly worker wages.

Answer: D

Diff: 1

LO: 2-1

EOC: S2-2

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

31) Which of the following costs could be found in work in process inventory for a candy bar manufacturer?

- A) Assembly worker wages
- B) Utilities for administrative offices
- C) Depreciation on sales office
- D) Customer order forms

Answer: A

Diff: 1

LO: 2-1

EOC: S2-2

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

32) Enter the letter of the type of company on the line in front of each statement. Letters may be used more than once or not at all.

- A) service company
- B) merchandising company
- C) manufacturing company

___ generally has no inventory

___ has three types of inventory

___ inventory consists of freight-in and the cost of the product

___ has the highest percentage of labor costs

___ Wal-Mart is this type of company

Answer: A, C, B, A, B

Diff: 1

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

33) On the line in front of each statement, enter the letter corresponding to the term that best fits that statement. You may use a letter more than once and some letters may not be used at all.

A.	Materials inventory	E.	Work in process inventory
B.	Service companies	F.	Manufacturing companies
C.	Merchandise inventory	G.	Merchandising companies
D.	Finished goods inventory		

- ___ typically have a single category of inventory
- ___ resell products they previously purchased ready-made from suppliers
- ___ do not have inventory for resale
- ___ produce its own inventory
- ___ transform raw materials into new finished products
- ___ ready to sell inventory of manufacturers
- ___ partially completed items of manufacturers

Answer:

- G typically have a single category of inventory
- G resell products they previously purchased ready-made from suppliers
- B do not have inventory for resale
- F produce its own inventory
- F transform raw materials into new finished products
- D ready to sell inventory of manufacturers
- E partially completed items of manufacturers

Diff: 2

LO: 2-1

EOC: E2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

34) Describe service, merchandising, and manufacturing companies.

Answer: Service companies sell intangible services such as insurance, consulting and healthcare. Salaries and wages often are the largest part of their costs. They usually do not have inventory or cost of goods sold accounts, although some service companies will have a small amount of supplies inventory which is used for their own use and not for sale to customers. Merchandising companies resell tangible products they buy from suppliers. Retailers and wholesalers are both types of merchandising companies. Merchandisers have inventory. Manufacturing companies use labor, plant and equipment to convert raw materials into finished products which they sell to other companies. They have three types of inventory – raw materials, work in process, and finished goods.

Diff: 2

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

35) Explain the difference between raw materials inventory, work in process inventory, and finished goods inventory.

Answer: Raw materials inventory includes all materials used to make a product including materials that become a part of the product as well as other physical materials used in a plant such as machine lubricants and janitorial supplies. Work in process inventory includes goods that are partway through the manufacturing process but not yet complete. Finished goods inventory includes completed goods that have not yet been sold.

Diff: 1

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

36) Describe a company that has some elements of all three types of companies. It is part service company, part manufacturer, and part merchandiser.

Answer: Many restaurants fall into this category. They are a service company since they serve hungry customers. They are a manufacturer since they convert raw ingredients into finished meals and they are a merchandiser since they sell ready-to-serve bottles of beer and wine.

Diff: 2

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

37) Why do service firms not have inventory costs pertaining to items to be sold? What type of costs do they have?

Answer: Service firms do not have inventory costs because services cannot be produced today and stored up to sell later. They do not have inventory. They only have period costs that are expensed.

Diff: 2

LO: 2-1

EOC: S2-1

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

38) Controlling costs across the entire value chain often requires a trade-off between the individual elements of the value chain.

Answer: TRUE

Diff: 1

LO: 2-2

EOC: S2-3

AACSB: Reflective Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

39) All of the components of manufacturing—from research and development through customer service after the sale—are part of a firm's value chain.

Answer: TRUE

Diff: 1

LO: 2-2

EOC: S2-3

AACSB: Reflective Thinking

64) Lucky Cow Dairy provided the following expense information for May:

Assembly-line workers' wages	\$ 72,000
Caps for milk bottles	3,000
Reconfiguring the assembly line	125,000
Customer support hotline	10,000
Delivery expenses	20,000
Depreciation on factory equipment	75,000
Plastic milk bottles	52,000
Salaries of salespeople	63,000
Salaries of research scientists	70,000
Customer toll-free order line	6,000

What is the total cost for the marketing category of the value chain?

- A) \$69,000
- B) \$188,000
- C) \$197,000
- D) \$267,000

Answer: A

Explanation: A) Calculations: $\$63,000 + 6,000 = \$69,000$

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

82) Name and briefly describe the activities that make up the value chain.

Answer: The value chain consists of research and development, design, production or purchase, marketing, distribution, and customer service. Research and development refers to researching and developing new or improved products or services and the processes for producing them. Design involves the detailed engineering of products and services and the processes for producing them. Production or purchases refers to the resources used to produce a product or service or to purchase finished merchandise intended for resale. Marketing is the promotion and advertising of products or services. Distribution is the delivery of products or services to customers and customer service provides support for customers after the sale.

104) Country Furniture Company manufactures furniture at its Akron, Ohio, factory. Some of its costs from the past year include:

Depreciation on sales office	\$ 9,000
Depreciation on factory equipment	16,000
Factory supervisor salary	50,500
Sales commissions	23,000
Lubricants used in factory equipment	3,000
Insurance costs for factory	21,000
Wages paid to maintenance workers	115,000
Fabric used to upholster furniture	10,000
Freight-in (on raw materials)	3,000
Costs of delivery to customers	9,000
Wages paid to assembly-line workers	155,500
Lumber used to build product	82,000
Utilities in factory	54,500
Utilities in sales office	26,500

Prime costs for Country Furniture Company totaled

- A) \$92,000.
- B) \$247,500.
- C) \$250,500.
- D) \$368,500.

Answer: C

Explanation: C) Calculations: $\$ 3,000 + 10,000 + 155,500 + 82,000 = \$ 250,500$

105) Country Furniture Company manufactures furniture at its Akron, Ohio, factory. Some of its costs from the past year include:

Depreciation on sales office	\$ 9,000
Depreciation on factory equipment	16,000
Factory supervisor salary	50,500
Sales commissions	23,000
Lubricants used in factory equipment	3,000
Insurance costs for factory	21,000
Wages paid to maintenance workers	115,000
Fabric used to upholster furniture	10,000
Freight-in (on raw materials)	3,000
Costs of delivery to customers	9,000
Wages paid to assembly-line workers	155,500
Lumber used to build product	82,000
Utilities in factory	54,500
Utilities in sales office	26,500

Conversion costs for Country Furniture Company totaled

A) \$415,500.

B) \$250,500.

C) \$504,500.

D) \$352,500.

Answer: A

Explanation: A) Calculations: \$ 16,000 + 50,500 + 3,000 + 21,000 + 115,000 + 155,500 + 54,500 = \$415,500

115) Differentiate between:

A. direct materials versus indirect materials

B. direct labor versus indirect labor

Answer: Student responses will vary but should include the following points:

A. Direct materials must become a physical part of the finished product and their costs must be separately and conveniently traceable through the manufacturing process to specific units of the finished product. Examples for a furniture manufacturer include wood, leather, steel, etc. Indirect materials become part of the finished product, but their minor costs cannot conveniently be traced directly to individual units of the finished products. They are included as part of manufacturing overhead.

Examples for a furniture manufacturer include thread, glue, snaps, etc.

B. Direct labor cost is the compensation of employees who physically convert raw materials into the company's products and whose efforts can be traced directly to specific units of finished goods. Examples for a furniture manufacturer include machine operators and assemblers. Indirect labor is factory labor that is difficult to trace to individual units of specific products. Instead, the cost is included in manufacturing overhead. Examples for a furniture manufacturer include costs for forklift operators, janitors, and plant managers.

Lubricants used in factory equipment	3,000
Insurance costs for factory	21,000
Wages paid to maintenance workers	115,000
Fabric used to upholster furniture	10,000
Freight-in (on raw materials)	3,000
Costs of delivery to customers	9,000
Wages paid to assembly-line workers	155,500
Lumber used to build product	82,000
Utilities in factory	54,500
Utilities in sales office	26,500

Period costs for Country Furniture Company totaled

- A) \$41,000.
- B) \$129,000.
- C) \$44,500.
- D) \$67,500.

Answer: D

Explanation: D) Calculations: $\$ 9,000 + 23,000 + 9,000 + 26,500 = \$ 67,500$

143) Rustic Living Furniture Company manufactures furniture at its central Kentucky factory. Some of its costs from the past year include:

Wages paid to maintenance workers	\$ 60,000
Fabric used to upholster furniture	\$ 8,000
Wages paid to assembly-line workers	\$ 100,000
Lumber used to build product	\$ 15,000
Sales commissions	\$ 7,500
Insurance costs for factory	\$ 21,000
Freight-in (on raw materials)	\$ 3,000
Utilities in factory	\$ 12,000
Factory supervisor salary	\$ 60,000
Depreciation on factory equipment	\$ 18,000
Utilities in sales office	\$ 26,500
Costs of delivery to customers	\$ 8,000
Depreciation on sales office	\$ 1,000
Lubricants used in factory equipment	\$ 500

Product costs for Rustic Living Furniture Company totaled

- A) \$203,500.
- B) \$273,500.
- C) \$297,500.
- D) \$295,000.

Answer: C

Explanation: C) Calculations: \$ 18,000 + 60,000 + 500 + 21,000 + 12,000 + 60,000 + 8,000 + 3,000 + 100,000 + 15,000 = \$ 297,500

- D) \$675,000

Answer: C

Explanation: C) Calculations: \$ 650,000 + 90,000 = \$740,000

Diff: 3

LO: 2-5

EOC: E2-25A

AACSB: Analytical Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

178) Fit Apparel Company reports the following data for its first year of operation.

Cost of goods manufactured	\$650,000
Work in process inventory, beginning	0
Work in process inventory, ending	90,000
Direct materials used	85,000
Manufacturing overhead	100,000
Finished goods inventory, beginning	0
Finished goods inventory, ending	70,000

What is the cost of goods sold?

- A) \$650,000
- B) \$835,000
- C) \$580,000
- D) \$670,000

Answer: C

Explanation: C) Calculations: \$650,000 - 70,000 = \$580,000

Diff: 3

LO: 2-5

EOC: E2-25A

AACSB: Analytical Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

179) Tall Timbers reports the following data for its first year of operation.

Work in process inventory, beginning	\$ 0
Work in process inventory, ending	50,000
Manufacturing overhead	25,000
Direct materials used	7,000
Finished goods inventory, beginning	0
Finished goods inventory, ending	20,000
Cost of goods manufactured	85,000

What are the total manufacturing costs?

- A) \$47,000
- B) \$135,000
- C) \$85,000
- D) \$117,000

Answer: B

Explanation: B) Calculations: $\$85,000 + 50,000 = \$135,000$

Diff: 3

207) Selected financial information for Greek Food Producers is presented in the following table (000s omitted).

Beginning raw materials inventory	\$ 300
Ending raw materials inventory	\$ 180
Direct labor	\$ 250
Operating expenses	\$ 650
Purchases of direct materials	\$ 350
Beginning work in process inventory	\$ 320
Ending work in process inventory	\$ 600
Sales revenue	\$ 4,500
Manufacturing overhead	\$ 720
Beginning finished goods inventory	\$ 250
Ending finished goods inventory	\$ 250

What was operating income?

- A) \$3,850
- B) \$4,500
- C) \$3,180
- D) \$2,690

Answer: D

Explanation: D) Calculations: $\$ 4,500 - 1,160 = 3,340 - 650 = \$ 2,690$

219) Compute the missing amounts.

	Miami Company	Orlando Company
Sales	\$ 300,000	(D)
Cost of Goods Sold		
Beginning Inventory	(A)	65,000
Purchases and Freight-In	119,000	(E)
Cost of goods available for sale	(B)	192,000
Ending inventory	5,000	3,000
Cost of goods sold	115,000	(F)
Gross Margin	185,000	124,000
Selling and Administrative Expenses	(C)	90,000
Operating Income	32,000	(G)

Answer: A) $120,000 - 119,000 = 1,000$

B) $115,000 + 5,000 = 120,000$

C) $185,000 - 32,000 = 153,000$

D) $124,000 + 189,000 = 313,000$

E) $192,000 - 65,000 = 127,000$

F) $192,000 - 3,000 = 189,000$

G) $124,000 - 90,000 = 34,000$

222) North Pacific Company used \$65,000 of direct materials and incurred \$43,000 of direct labor costs during 2011. Indirect labor amounted to \$1,700 while indirect materials used totaled \$1,800. Other operating costs pertaining to the factory included utilities of \$4,300; maintenance of \$6,800; supplies of \$1,500; depreciation expense of \$8,900; and property taxes of \$2,400. There was no beginning or ending finished goods inventory, but work in process inventory began the year with a \$6,400 balance and ended the year with a \$7800 balance.

Required: Prepare a schedule of cost of goods manufactured for South State Company for the year ended December 31.

Answer:

North Pacific Company			
Schedule of Cost of Goods Manufactured			
Year Ended December 31			
Beginning work in process inventory			\$ 6,400
Add:			
Direct materials used		\$ 65,000	
Direct labor		43,000	
Manufacturing overhead:			
Indirect labor	\$ 1,700		
Indirect materials	1,800		
Utilities	4,300		
Maintenance	6,800		
Supplies	1,500		
Depreciation expense	8,900		
Property taxes	2,400	27,400	
Total manufacturing costs incurred during the year			135,400
Total manufacturing costs to account for			141,800
Less: Ending work in process inventory			(7,800)
Cost of goods manufactured			<u>\$134,000</u>

Diff: 3

LO: 2-5

EOC: E2-25A

AACSB: Analytical Thinking

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

223) The following information is available for the Bower Corporation for last year:

- Raw materials inventory decreased \$4,000 from the beginning of the year to the end of the year.
- Raw materials inventory on December 31 (end of year) was 50% of raw materials inventory on January 1 (beginning of year).
- Beginning work in process inventory was \$145,000.
- Ending finished goods inventory was \$65,000.
- Purchases of direct materials were \$154,700.
- Manufacturing overhead was 50% of the cost of direct labor.
- Total manufacturing costs incurred were \$246,400, 80% of cost of goods manufactured and \$156,000 less than cost of goods sold.

Compute:

- finished goods inventory on January 1 (beginning of year)
- work in process inventory on December 31 (end of year)
- direct labor incurred
- manufacturing overhead incurred
- direct materials used
- raw materials inventory on January 1 (beginning of year)
- raw materials inventory on December 31 (end of year)

Note to students: The solutions to this problem are not necessarily calculated in alphabetical order.

Answer:

a) cost of goods sold = $\$246,400 + \$156,000 = \$402,400$
 $\$402,400 + \$65,000 - \$308,000 = \$159,400$

b) cost of goods manufactured = $\$246,400 / .80 = \$308,000$
 $\$246,400 + \$145,000 - \$308,000 = \$83,400$

c) $\$158,700 + x + 0.5x = \$246,400$
 $1.5x = \$877,700$
 $x = \$58,467$

d) $\$58,467 \times .5 = \$29,233$

e) $\$8,000 + \$154,700 - \$4,000 = \$158,700$

f) X = January 1 materials inventory
 $\$4,000 = .5X$
 $X = \$8,000$

g) $\$8,000 - \$4,000 = \$4,000$

Diff: 3

224) The following amounts were taken from the general ledger of the Excellent Manufacturing Company. Compute the cost of goods manufactured and the cost of goods sold for the company for the year.

Raw materials inventory — beg. of year	\$52,000	Depreciation — plant & equipment	\$28,000
Raw materials inventory — end of year	46,000	Repairs and maintenance — plant	4,000
Work in process inv. — beg. of year	110,000	Insurance on plant	12,000
Work in process inv. — end of year	85,000	General and administration exp.	29,000
Finished goods inv. — beg. of year	26,000	Indirect labor	27,000
Finished goods inv. — end of year	54,000	Direct labor	178,000
Purchase of direct materials	37,000	Marketing expenses	62,000

Answer:

Excellent Manufacturing Company			
Schedule of Cost of Goods Manufactured			
Beginning work in process inventory			\$110,000
Add: Direct Materials Used			
Beginning raw materials inventory	\$52,000		
Purchase of direct materials	37,000		
Available for use	89,000		
Ending raw materials inventory	(46,000)	\$43,000	
Direct Labor		178,000	
Manufacturing overhead:			
Indirect labor	27,000		
Insurance on plant	12,000		
Depreciation — plant & equipment	28,000		
Repairs and maintenance - plant	4,000	71,000	
Total manufacturing costs incurred during the year			292,000
Total manufacturing costs to account for			402,000
Less: Ending work in process inventory			(85,000)
Cost of goods manufactured			317,000

Excellent Manufacturing Company	
Schedule of Cost of Goods Sold	
Beginning finished goods inventory	\$ 26,000
Cost of goods manufactured*	317,000
Cost of goods available for sale	343,000
Ending finished goods inventory	(54,000)
Cost of good sold	\$ 289,000

Learning Outcome: Define and use cost-volume-profit analysis to analyze the effects of changes in costs and volume on a company's profits

242) Differentiate between relevant and irrelevant costs and give an example using both.

Answer: When making a decision, those costs that differ between alternatives are relevant costs. Costs that do not differ between alternatives are irrelevant. For example, when deciding to buy a new car, the cost of the cars under consideration is relevant as is the insurance cost for each car. If they both have the same fuel economy ratings, then the cost of gasoline is irrelevant to the decision.

A.	Direct costs	F.	Variable costs
B.	Marginal cost	G.	Indirect cost
C.	Average cost	H.	Sunk cost
D.	Conversion costs	I.	Differential cost
E.	Prime costs		

- ___ The combination of direct materials and direct labor.
- ___ Costs that change in total in direct proportion to changes in volume.
- ___ A cost that relates to the cost object, but cannot be traced to it.
- ___ A cost that has already been incurred.

279) Getting to school for your 8 a.m. class doesn't leave much time for breakfast, and you are quite hungry by the time class ends. It is a long walk to the cafeteria, the lines are long once you get there, and you find yourself having to decide between having breakfast and getting to your next class on time. Many of your friends have expressed the same problem. The administration has agreed to let you set up a table just outside the building where you will sell various snacks for \$1 each. You have agreed to pay the administration \$400 per month and salaries to your friends to run the business will be another \$400 per month. It will cost you 60 cents each to buy the pre-packaged snacks. You believe you can sell 2,500 snack packs per month.

- a. What are the total fixed costs per month?
- b. What are the total variable costs per month?
- c. What is the fixed cost per snack pack?
- d. What is the variable cost per snack pack?
- e. What is the average cost per snack pack?
- f. What is the average profit margin per snack pack?
- g. Based on your analysis, should you start the snack pack business?

Answer:

- a. \$800 ($\$400 + \400)
- b. \$1,500 ($60 \text{ cents} \times 2,500 \text{ snack packs}$)
- c. 32 cents ($\$800/2,500 \text{ snack packs}$)
- d. 50 cents (given in the problem)
- e. \$0.82
- f. \$0.18 ($\$1 - 50 \text{ cents} - 32 \text{ cents}$)
- g. Yes, I will make 18 cents per snack pack and if I sell 2,500 I will make a profit of \$450.
