Answer: D

- 83) Which of the following is a weakness of an organization?
- A) A recession or economic downturn
 - B) Lack of financial resources
 - C) A new technology invented by a competitor
 - D) An unfavourable political development
 - E) Changes in demographic trends

Answer: B

84) Which of the following is an opportunity for an organization?

- A) Excellent geographic location
- B) Superior resources and capabilities
- C) Strong brand
- D) Strong base of loyal customers
- E) Reduced competition

Answer: E

Capricus Leathers Inc. is a company that manufactures leather apparel and accessories. The company sells two products, Indigo and Tango. Both the products serve in a low-growth market. While Indigo has significant market share in the market, Tango has less than 1 percent market share.

85) According to the Boston Consulting Group (BCG) matrix, Indigo is called a:

- A) dog.
- B) star.
- C) cash cow.
- D) question mark.
- E) champion.

Answer: C

86) According to the Boston Consulting Group (BCG) matrix, Tango is called a:

- A) question mark.
- B) cash cow.
- C) champion.
- D) star.
- E) dog.

Answer: E

87) Which of the following observations about Indigo is likely to be true?

- A) It will require heavy resource investments to survive in the market.
- B) It will experience rapid growth for a few years.
- C) It has the opportunity to become a star in the market.
- D) It has fewer chances to be profitable for the company in the near future.
- E) It has already received heavy investments to develop its market share.

Answer: E

88) Which of the following is a suitable course of action that Capricus Leathers should initiate?

- A) It should open new production facilities to fuel the growth of Tango.
- B) It should phase out Tango if it is not needed to complement Indigo.
- C) It should withdraw both the products and introduce a new brand in the market.
- D) It should make a heavy resource investment to rescue Tango.
- E) It should increase the production of both the products to gain more market share.

Answer: B

Lunar Inc. and Qwerty Inc. are competitors in the production of laptops for professionals. To improve sales, the management of Lunar decides to adopt the strategy of market penetration and the management of Qwerty decides to adopt market development.

89) Which of the following is Lunar Inc. most likely to do as part of its strategy?

- A) It will declare discounts on its products.
- B) It will roll back less successive models of laptops.
- C) It will start producing laptop accessories.
- D) It will expand its operation to new countries.
- E) It will launch a series of laptops exclusively designed for children.

Answer: A

90) Which of the following is Qwerty most likely to do as part of its strategy?

- A) It will start producing laptop accessories.
- B) It will get celebrities to endorse its product.
- C) It will announce bonus points for regular customers.
- D) It will expand its operation to new countries.
- E) It will begin a media campaign for marketing its product.

Answer: D

TRUE/FALSE. Write 'T' if the statement is true and 'F' if the statement is false.

91) Operational excellence is achieved mostly by producing high-quality products.

Answer: True False

92) Organizations achieve sustainable competitive advantage through operational excellence.

Answer: True False

93) Product excellence occurs by having offerings with high perceived value and effective branding and positioning.

Answer: True False

94) Nonprofit organizations state objectives and form mission statements.

Answer: True False

95) Lack of financial resources is an example of a threat that a company is facing.

Answer: True False

96) A company has access to many proprietary technologies. This is an example of the company's strength.

Answer: True False

97) A company sells its product through the Internet and hence is able to access a wide range of customers. This statement is indicative of the company's strength.

Answer: True False

98) Targeting is the process of selecting a segment to pursue as a market.

Answer: True False

99) Promotion is associated with value creation.

Answer: True False

100) Advertising campaigns by businesses is an example of promotion.

Answer: True False

101) Actual strategic planning is a sequential process.

Answer: True False

102) A product line consists of a group of dissimilar products.

Answer: True False

103) A product with a low market share that competes in a high-growth market is called a dog.

Answer: True False

104) Market penetration refers to introducing a new product in a new market.

Answer: True False

105) Market development strategy employs the existing marketing mix and focuses the firm's efforts on existing customers.

Answer: True False

SHORT ANSWER. Write the word or phrase that best completes each statement or answers the question.

106) Describe the four overarching strategies that focus on aspects of a marketing mix to create and deliver value and to develop sustainable competitive advantages.

Answer: The four overarching strategies are the following:

Customer excellence: Focuses on retaining loyal customers and excellent customer service

Operational excellence: Achieved through efficient operations and excellent supply chain and human resource management

Product excellence: Having products with high perceived value and effective branding and positioning

Locational excellence: Having a good physical location and Internet presence

107) Explain situation analysis.

Answer: After developing its mission, a firm must perform a situation analysis, using a SWOT analysis that assesses both the internal environment with regard to its strengths and weaknesses (internal analysis) and the external environment in terms of its opportunities and threats (external analysis). Situation analysis also includes an examination of market trends, customer analysis, and competitive analysis. Additionally, the firms should assess the opportunities and uncertainties of the marketplace caused by changes in cultural, demographic, social, technological, economic, and political forces.

108) Compare and contrast strengths and opportunities that apply to businesses.

Answer: Strengths are positive attributes that are internal to businesses. Businesses can control strengths. Opportunities are external to businesses and businesses cannot control them. A superior product is a strength, whereas a conducive market is an opportunity.

109) What is a market segment?

Answer: A market segment is a group of consumers who respond similarly to a firm's marketing efforts.

110) Explain target marketing and provide an example of it.

Answer: Target marketing is the process of evaluating the attractiveness of various segments and then deciding which to pursue as a market. For example, Beau, a manufacturer of cosmetics, realizes that its products are mostly sought by teenagers and directs the bulk of its marketing efforts towards that group. Students' examples will vary.

111) What is market positioning?

Answer: Market positioning involves the process of defining the marketing mix variables so that target customers have a clear, distinct, desirable understanding of what the product does or represents in comparison with competing products.

112) Briefly explain the final step in the marketing planning process.

Answer: The final step in the planning process includes evaluating the results of the strategy and implementation program by using marketing metrics. Metrics are used to explain why things happened and to project the future. They make it possible to compare results across regions, business units, product lines, and time periods.

113) List a few financial performance metrics that an organization commonly uses.

Answer: Some commonly used metrics to assess performance include revenues, or sales, and profits. A firm can determine why it achieved or did not achieve its performance goals using this metrics.

114) Explain portfolio analysis.

Answer: In portfolio analysis, a management evaluates a firm's portfolio and allocates resources according to which products are expected to be the most profitable for the firm in the future. Portfolio analysis is typically performed at the strategic business unit (SBU) or product line level of the firm, though managers can also use it to analyze brands or even individual items. An SBU is a division of the company that can be managed somewhat independently from other divisions since it markets a specific set of products to a clearly defined group of customers.

115) Differentiate between relative market share and market growth rate.

Answer: Relative market share is a measure of a product's strength in a particular market, defined as the sales of the focal product divided by the sales achieved by the largest firm in the industry. Market growth rate is the annual rate of growth of the specific market in which a product competes. Market growth rate is a measure of an industry, whereas relative market share is a measure of a product's strength in a particular market.

ESSAY. Write your answer in the space provided or on a separate sheet of paper.

116) Explain the various steps involved in developing a marketing plan.

Answer: There are five steps in developing a marketing plan.

- Step 1, Define the Business Mission and Objectives: The mission statement, a broad description of a firm's objectives and the scope of activities it plans to undertake, attempts to answer two main questions: What type of business are we? and What do we need to do to accomplish our goals and objectives? These fundamental business issues must be answered at the highest corporate level; marketing executives can get involved.
- Step 2, Conduct a Situation Analysis: After developing its mission, a firm next must perform a situation analysis, using a SWOT analysis that assesses both the internal environment with regard to strengths and weaknesses (internal analysis) and the external environment in terms of its opportunities and threats (external analysis). Situation analysis also includes an examination of market trends, customer analysis, and competitive analysis.
- Step 3, Identify and Evaluate Opportunities by Using STP (Segmentation, Targeting, and Positioning): After completing the situation analysis, the next step is to identify and evaluate opportunities for increasing sales and profits by using STP. With STP, the firm must first understand customer needs and wants through market research, then divide the market or customers into distinct subgroups or segments, determine which of those segments it should pursue or target, and finally decide how it should position its products and services to best meet the needs of those customer targets.
- Step 4, Implement Marketing Mix and Allocate Resources: When the firm has identified and evaluated different growth opportunities by performing an STP analysis, the real action begins. The company has decided what to do, how to do it, and how many resources the firm should allocate to it. In the fourth step of the planning process, marketers implement the marketing mix—product, price, promotion, and place—for each product and service on the basis of what it believes its target markets will value. At the same time, it makes important decisions about how it will allocate its scarce resources to its various products and services. Each element of the mix must be fully integrated to achieve a coherent strategy.
- Step 5, Evaluate Performance by Using Marketing Metrics: The final step in the planning process includes evaluating the results of the strategy and implementation program by using marketing metrics. A metric is a measuring system that quantifies a trend, dynamic, or characteristic. Metrics are used to explain why things happened and to project the future. They make it possible to compare results across regions, business units, product lines, and time periods. The

firm can determine why it achieved or did not achieve its performance goals with the help of these metrics.

- 117) As part of a study project, Rachel has to choose a firm and conduct a detailed SWOT analysis. Explain how Rachel will conduct the analysis.

Answer: Student answers will vary. A SWOT analysis is designed to help the firm determine areas in which it is strong and can compete effectively and areas where it is weak and vulnerable to competitive attacks. A SWOT analysis assesses the internal environment with regard to its strengths and weaknesses (internal analysis) and the external environment in terms of its opportunities and threats (external analysis). Students should select a firm and analyze its strengths, weaknesses, opportunities, and threats.

- 118) Explain the processes of segmentation, targeting, and positioning that firms use to identify and evaluate opportunities for increasing sales and profits.

Answer: Segmentation is the process of dividing the market into distinct groups of customers where each individual group has similar needs, wants, or characteristics and therefore might appreciate products or services geared especially for them in similar ways. Targeting is the process of evaluating the attractiveness of various market segments and then deciding which to pursue as a market.

Positioning involves the process of defining the marketing mix variables so that target customer has a clear, distinct, desirable understanding of what a product does or represents in comparison with competing products.

- 119) Briefly explain the four Ps of marketing.

Answer: The four Ps are as follows:

- **Product:** Products, which include services, constitute the first of the four Ps. Because the key to success of any marketing program is the creation of value, firms attempt to develop products and services that customers perceive as valuable enough to buy.
- **Price:** The second element of the marketing mix is price. As part of the exchange process, a firm provides a product or a service, or some combination thereof, and in return it receives money. Value-based marketing requires that firms charge a price that customers perceive as giving them value for the products and services they receive.
- **Place:** For the third P, place, the firm must be able to, after it has created value through a product or service, make the product or service readily accessible when and where the customer wants it.
- **Promotion:** The fourth P of the marketing mix is promotion. Marketers communicate the value offering, or the value proposition, to their customers through a variety of media, including TV, magazines, buses, trains, blimps, sales promotion, publicity, the sales force, and the Internet.

120) Explain the four major growth strategies that organizations adopt.

Answer: The four major growth strategies are as follows.

A market penetration strategy employs the existing marketing mix and focuses the firm's effort: existing customers. Such a growth strategy might be achieved by encouraging current customer patronize the firm more often or buy more merchandise on each visit or by attracting new const from within the firm's existing target market.

A market development strategy employs the existing marketing offering to reach new market segments, whether domestic or international or segments not currently served by the firm.

The third growth strategy option, a product development strategy, offers a new product or servi firm's current target market.

A diversification strategy, the last of the growth strategies, introduces a new product or service market segment that is currently not served.
