## Microeconomics Australia 7th Edition McTaggart Test Bank

Exam				
Name				
MULT	IPLE CHOICE. C	choose the one alternative that best completes the statement or answers the question.		
	<ul><li>A) a society</li><li>B) scarcity i</li><li>C) resource</li><li>D) a society</li></ul>	omy produces at its allocatively efficient production point, can increase the production of all goods. Is not a problem. Is are not limited. It can increase the production of one good only by decreasing the production of some od that is valued more highly.  A) B)	1)	
		C) D)		
	units of X or 4 A) Brenda h B) Brenda h C) Agnes ha	educe either 1 unit of $X$ or 1 unit of $Y$ in an hour, while Brenda can produce either 2 units of $Y$ in an hour.  The as a comparative advantage in the production of $X$ .  The as a comparative advantage in the production of $X$ and $Y$ .  The as a comparative advantage in the production of $Y$ .  The analysis is a comparative advantage in the production of $Y$ .  The analysis is a comparative advantage in the production of $Y$ .	2)	
	Answer: B Explanation:	A) B) C) D)		
	A) firms sel B) househo C) househo	et is a market in which I goods and services. Ids buy goods and services. Ids sell the services of the factors of production they control. I the services of the factors of production.	3)	
	Answer: C Explanation:	A) B) C) D)		
	B) capital a C) people w	wth comes from  ng more goods than people want to consume.  ccumulation and the avoidance of opportunity cost.  villing to increase their skills, in which case, economic growth is free.  ccumulation and technological advance.	4)	
	Answer: D Explanation:	A) B) C) D)		

5) When	we choose a part	icular option, we	e must give up alternative options. The highest-valued	5)

11) A production	possibilities frontier does NOT illu	ustrate	11)
A) attainab	le and unattainable points.		
B) the limit	s on production imposed by our li	mited resources and technology.	
C) opportu		33	
	ange of one good or service for an	other	
	arige of one good of service for arr	outor.	
Answer: D	- •		
Explanation:	A)		
	B)		
	C)		
	D)		
12) Suppose that	the government is trying to decide	e between allocating its resources to build more	12)
dams or to bu	ild more freeways. In terms of forg	gone dams, as more freeways are constructed, the	
marginal bene	efit of additional freeways	_ and the marginal cost of additional freeways	
	3	_ 3	
A) increase	s: increases	B) increases; decreases	
·	es; decreases	D) decreases; increases	
-	s, deci eases	D) decidases, incidases	
Answer: D			
Explanation:	A)		
	B)		
	C)		
	D)		
13) Markets			13)
A) facilitate	trade.		
B) coordina	ate price information between buy	ers and sellers.	
	aders to enjoy gains from trade.		
	e above answers are correct.		
	s above answers are correct.		
Answer: D			
Explanation:	A)		
	B)		
	C)		
	D)		
14) Which of the f	following statements regarding the	e production possibilities frontier is true?	14)
A) Points ir	nside the frontier are attainable.		
·	utside the frontier are attainable.		
,	n the frontier are less efficient thar	points inside the frontier.	
	the above because all of the above		
,	the above because an or the above	, statements are raise.	
Answer: A	• >		
Explanation:	A)		
	B)		
	C)		
	D)		

15) When economic growth occurs, the

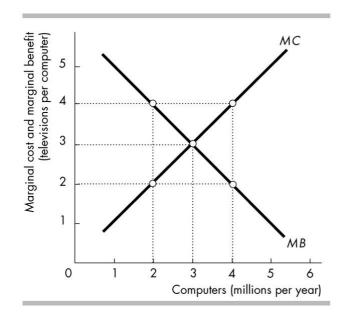

16)

- A) production possibilities frontier shifts outward.
- B) production possibilities frontier becomes steeper.
- C) economy moves along its production possibilities frontier.
- D) production possibilities frontier shifts outward but no longer limits the amount that can be produced.

Answer: A

Explanation:

- A) B)
  - C)
  - D)

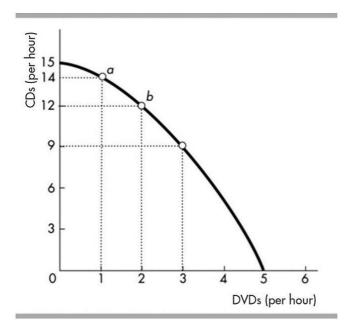

- 16) In the figure above, the allocatively efficient output of computers is
  - A) 2 million per year.
  - C) 3 million per year.

- B) 4 million per year.
- D) the largest amount possible.

Answer: C

- B)
- C)
- D)

17) In the above figure, at point *a*, what is the opportunity cost of producing one more CD? B) 14 DVDs.

D) There is no opportunity cost.

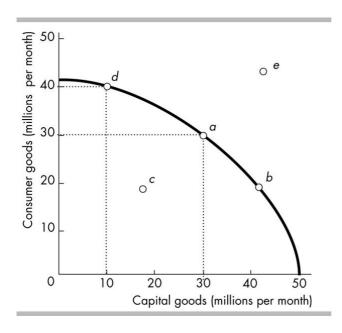

- A) 2 DVDs.
- C) 1 DVD.

Answer: C

Explanation: A)

- B) C) D)

17)

18) Refer to the production	possibilities frontier in the figure above. Production point	18)	
represents an	production point.		

- A) b; unattainable.
- B) e; inefficient.
- C) c; inefficient.
- D) c; unattainable.

Answer: C

Explanation: A)

- B)
- C)
- D)

	Don's production possibilities	Bob's production possibilities
Pens	10	5
Pencils	20	15

- 19) The above table shows the number of pencils or pens that could be produced by Don and Bob in an hour. This schedule shows that
  - A) Bob has a comparative advantage in the production of pencils.
  - B) Bob has an absolute advantage in the production of pencils, and Don has an absolute advantage in the production of pens.
  - C) Don has an absolute advantage in the production of pencils, and Bob has an absolute advantage in the production of pens.
  - D) Don has a comparative advantage in the production of both pencils and pens.

Answer: A

- B)
- C)
- D)

<ul> <li>20) If the marginal benefit of a good exceeds its marginal cost,</li> <li>A) we should produce more to achieve the allocatively efficient use of resources.</li> <li>B) we've achieved efficient resource use.</li> <li>C) we should produce less to achieve the allocatively efficient use of resources.</li> <li>D) we cannot tell if more or less should be produced to achieve the allocatively efficient use of resources.</li> <li>Answer: A</li> </ul>	20)
Explanation: A) B) C) D)	
<ul> <li>21) The production possibilities frontier itself illustrates</li> <li>A) all goods that can be produced by an economy.</li> <li>B) all possible production of capital goods.</li> <li>C) all goods and services that are desired but cannot be produced due to scarce resources.</li> <li>D) the combination of goods and services that can be produced efficiently.</li> </ul>	21)
Answer: D Explanation: A) B) C) D)	
<ul> <li>22) If property rights are not clearly defined and enforced, then</li> <li>A) some potential gains from specialisation and trade are lost.</li> <li>B) incentives for specialisation based on comparative advantage are weakened.</li> <li>C) resources are devoted to protecting possessions rather than to production.</li> <li>D) All of the above answers are correct.</li> </ul>	22)
Answer: D Explanation: A) B) C) D)

## Production possibilities

		Cola
	Pizza	(cases per
Possibility	(per hour)	hour)
А	0	100
В	1	95
С	2	80
D	3	60
E	4	35
F	5	0

26) Based on the above table, as the production of pizza increases, the opportunity cost of pizza in terms of forgone cases of cola

26)

A) decreases.

B) does not change.

C) initially increases then decreases.

D) increases.

Answer: D

Explanation: A)

B)

C)

D)

h	<del> </del>	<b></b>
	Production of grain	Production of cars
Point	(tonnes)	(cars)
А	0	30
В	2	28
С	4	24
D	6	18
E	8	10
F	10	0

27) The table above lists six points on the production possibilities frontier for grain and cars. What is the opportunity cost of producing the 5th tonne of grain?

27) \_\_\_\_\_

A) 2 cars per tonnes of grain

B) 16 cars per tonnes of grain

C) 3 cars per tonnes of grain

D) 6 cars per tonnes of grain

Answer: C

Explanation: A)

B)

C)

D)

28) A person has a comparative advantage in producing a particular good if that person

8)

- A) has less desire to consume that good than anyone else has.
- B) has more human capital related to that good than anyone else has.
- C) can produce it at lower opportunity cost than anyone else can.
- D) has higher productivity in producing it than anyone else has.

Answer: C

Explanation: A)

B)

C)

D)

	Production	Production cans of
Point	chocolate bars	cola
А	0	100
В	10	90
С	20	70
D	30	40
E	40	0

Which of the f A) Producir B) Producir technolo C) Producir	ollowing statements is true? ng 20 chocolate bars and 80 cans ng 30 chocolate bars and 38 cans gy. ng 40 chocolate bars and 0 cans c	of cola is attainable, but inefficient. of cola is only attainable with an increase in of cola is unattainable and inefficient. of cola is both attainable and efficient.	29)
Answer: D Explanation:	A) B) C) D)		
horizontal. Ur A) the verti B) the horiz C) the horiz	nusually good weather for growical intercept upward but does no	ot shift the horizontal intercept. bes not shift the vertical intercept. ne vertical intercept upward.	30)
Answer: A Explanation:	A) B) C) D)		
A) cost; per	ne marginal of a good I son is willing to pay son's preferences are	by what a for another unit of the good.  B) benefit; person is willing to pay  D) benefit; person must pay	31)
Answer: B Explanation:	A) B) C) D)		

32) The produc	ction possibilities fro	ntier		32)
B) is a m C) is a g D) depic	nodel that assumes th raph with price on th its the boundary betv	ere is no scarcity and e vertical axis and in- veen those combination	Imed by each person in a country.  I no opportunity cost.  come on the horizontal axis.  ons of goods and services that can be produced current state of technology.	
Answer: D Explanatio				
rides but to			s an hour. Harry could produce more balloon Harry is his production possibilities	33)

38) The term "mai	ket" refers to		38)
A) any arra another.	ngement that enables buyers and seller	rs to get information and trade with one	

- 39) Marginal benefit curves slope \_\_\_\_\_ and marginal cost curves slope \_\_\_\_
  - A) downward; upward C) upward; upward
    - B) upward; downward D) downward; downward

39)

41)

Answer: A

**Explanation:** 

- A)
- B)
- C) D)
- 40) In one week Alice can produce 5 pairs of shoes or 4 bookshelves while Roger can produce 10 pairs

of shoes or 6 bookshelves. Alice has \_\_\_\_\_ advantage in producing \_ A) a comparative; shoes

B) an absolute; bookshelves D) an absolute; shoes

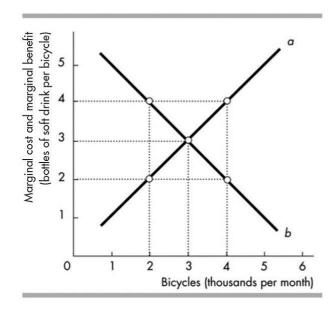

Answer: C

**Explanation:** A)

B)

C) a comparative; bookshelves

- C)
- D)

- 41) In the above figure, when 2000 bicycles are produced each month, we can see that
  - A) the marginal benefit from another bicycle is greater than the marginal cost of another bicycle.
  - B) more bicycles should be produced to reach the allocatively efficient level of output.
  - C) the economy is very efficient at the production of bicycles because the marginal benefit exceeds the marginal cost.
  - D) Both answers A and B are correct.

Answer: D

- B)
- C)
- D)

Blue Violet's production possibilities

Orange Rose's production possibilities

production possibilities			product	ion pos	SSIDITITIES
Teapots		Coffeepots	Teapots		Coffeepots
(number		(number per	(number		(number
per week)		week)	per week)		per week)
150	&	0	75	&	0
100	&	25	50	&	50
50	&	50	25	&	100
0	&	75	0	&	150

42) Two countries, Blue '	Violet and Orange Rose, produce	e only two goods: teapots and coffeepots. The	42)
table above gives the	ir production possibilities	has a comparative advantage in teapots	
and has a c	omparative advantage in coffeet	oots.	
A) Blue Violet; Ora	ange Rose	B) Blue Violet; Blue Violet	
C) Orange Rose; B	o .	D) Orange Rose; Orange Rose	
Answer: A		,

- 67) Molly just graduated from high school. The figure shows her possibilities frontier. If Molly goes to university, she will move from point M to point K. In terms of consumption goods, Molly's opportunity cost of going to university is
  - A) LM.
- B) KL.

- C) OL.
- D) MK.

Answer: A

Explanation: A)

- B)
- C)
- D)

Camel rides	Marginal benefit	Marginal cost
(per day)	(tubes of sunscreen)	(tubes of sunscreen)
1	20	11
2	18	12
3	16	13
4	14	14
5	12	15
6	10	16

- 68) Leisure Land produces only sunscreen and camel rides. The table shows the marginal benefit and marginal cost schedules for sunscreen and camel rides. The allocatively efficient number of camel rides is
- 68)

67)

- A) 4 rides per day.
- B) 2 rides per day.
- C) 6 rides per day because that is the maximum number of rides.
- D) 1 ride per day because the marginal benefit exceeds the marginal cost by as much as possible.

Answer: A

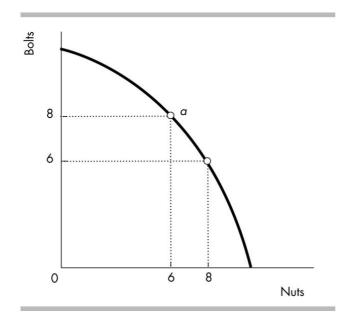

- B)
- C)
- D)

- A) Beth should produce sandwiches and Joe should produce pizza.
- B) Beth should produce both goods because she can produce more of both goods in an hour than can Joe.
- C) Beth should produce pizza and Joe should produce sandwiches.
- D) Beth should produce both goods and Joe should produce sandwiches.

Answer: C

Explanation: A)

- B)
- C)
- D)

- 70) Victor currently produces nuts and bolts at point *a* in the figure. Victor's marginal cost of producing an additional nut is \_\_\_\_\_.
  - A) 8/6 bolts per nut
  - C) 1 bolt per nut

Answer: C

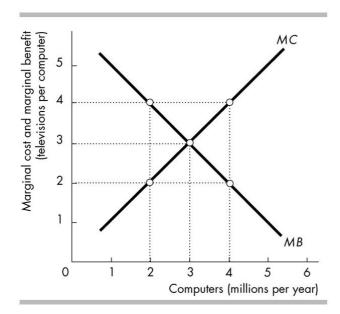

- Explanation: A)
  - B)
  - C)
  - D)

- B) 1/2 bolt per nut
- D) 8 bolts per nut

  - B)
  - C) D)

- 97) In the figure above, Jill is producing at point A. Jill's opportunity cost producing one pair of pants is
  - A) 5/3 of a shirt per pair of pants.
- B) 2 shirts per pair of pants.
- C) 3/5 of a shirt per pair of pants.
- D) 3 shirts per pair of pants.

98)

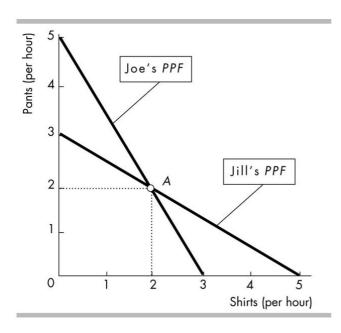

Answer: B

Explanation: A)

- B)
- Ć)
- D)
- 98) The production possibilities frontier is
  - A) upward sloping and reflects unlimited choices.
  - B) downward sloping and reflects tradeoffs in choices.
  - C) downward sloping and reflects unlimited choices.
  - D) upward sloping and reflects tradeoffs in choices.

Answer: B

- B)
- C)
- D)

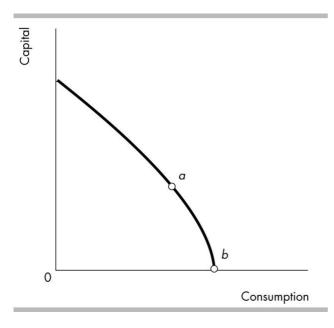

99) In the figure above, both Joe and Jill initially produce at point A. If Joe and Jill realise that they each possess a comparative advantage, which outcome can we expect?

99)

- A) Joe will specialise in shirts and Jill will specialise in pants.
- B) Joe will specialise in pants and Jill will specialise in shirts.
- C) Joe and Jill each will be able to consume more than 2 shirts and 2 pairs of pants.
- D) Both answers B and C are correct.

Answer: D

- B)
- C)
- D)

- 100) Two countries, Alpha and Beta, have identical production possibilities frontiers. If Alpha produces at point *a* and Beta produces at point *b*, then
  - A) Alpha's and Beta's economic growth rates will be the same.
  - B) Alpha consumes less than Beta today, but it will grow faster than Beta.
  - C) Beta's future consumption will be greater than Alpha's.
  - D) Beta's economic growth rate will exceed Alpha's.

Answer: B

Explanation: A)

B)

C)

D)

	Production of grain	Production of cars
Point	(tonnes)	(cars)

	B)		
	, C)		
	ע)		

A) both capi B) decreasin C) technolog	ove, moving from production at point <i>d</i> to production at point <i>a</i> requires tal accumulation and a decrease in unemployment.  g the output of consumer goods in order to boost the output of capital goods.  gical change.  e in unemployment.	115)
Answer: B		
Explanation:	A)	
	B)	
	C)	
	D)	
B) has no im C) makes the	production possibilities frontier outward.  pact on the production possibilities frontier.  production possibilities frontier steeper.  production possibilities frontier inward.  A)  B)  C)  D)	116)

117) \_\_\_\_

117) When a nation has a comparative advantage in the production of a particular good,

C) the comparative advantage encourages self-sufficiency.

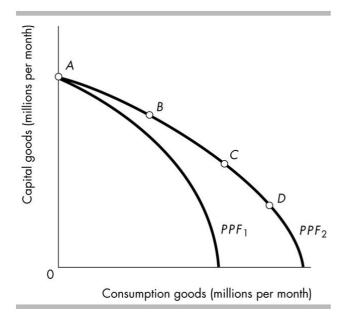

B) the opportunity cost of producing that good is higher than that of other goods.

A) the nation tends to avoid specialisation.

D) the nation can gain from trade.

A)B)C)D)

Answer: D Explanation:

- 118) In the above figure, in order for this country to move from production possibilities frontier *PPF*<sub>1</sub> to 118)
  - PPF2, it might
    - A) put all unemployed resources to work producing desired output.
    - B) increase the skills and productivity of its work force.
    - C) engage in exchange with other nations.
    - D) increase the average level of prices for all goods produced and consumed.

Answer: B

Explanation: A)

B)

C)

D)

	Production	Production cans of
Point	chocolate bars	cola
А	0	100
В	10	90
С	20	70
D	30	40
E	40	0

- 119) The above table shows production points on Sweet-Tooth Land's production possibilities frontier. 119) Which of the following is an example of a point that is inefficient?
  - A) 38 chocolate bars and 0 cans of cola
- B) 0 chocolate bars and 100 cans of cola
- C) 32 chocolate bars and 40 cans of cola
- D) 20 chocolate bars and 80 cans of cola

Answer: A

- B)
- C)
- D)

120) In goods markets and in factor markets	120)
A) firms sell to households; firms sell to households	
B) households sell to firms; households sell to firms	
C) firms sell to households; households sell to firms	
D) households sell to firms; firms sell to households	
Answer: C	
Explanation: A)	
В)	
C)	
D)	
121) A marginal cost curve	121)
A) is upward sloping.	
B) shows that as more of a good is produced, opportunity costs of producing another unit increase.	
C) is bowed inward so that its slope can become negative.	
D) Both answers A and B are correct.	
Answer: D	
Explanation: A)	
B)	
C)	

## Production possibilities

		Cola
	Pizza	(cases per
Possibility	(per hour)	hour)
А	0	100
В	1	95
С	2	80
D	3	60
E	4	35
F	5	0

D)

122) In the above table, the production of 3 pizzas and 35 cases of cola is	122)
A) possible only if the economy produces with maximum efficiency.	

- B) impossible unless more resources become available.
- C) feasible but would involve unemployed or misallocated resources.
- D) possible only if there is inflation.

Answer: C	
Explanation:	A)
	B)
	C)
	D)

- 123) In the above figure, which of the following is true regarding the movements from point *A* to *B* and from point *C* to *D*?
  - I. The movement from point A to B shows that the economy has chosen to produce 100 more jets.
  - II. The movement from point *C* to *D* shows that the economy has chosen to produce 100 more jets.
  - III. The movements from point A to B and from point C to D have the same opportunity cost.
    - A) I and II
- B) I and III
- C) II and III
- D) I, II and III

123)

124)

Answer: A

Explanation: A)

- B)
- C)
- D)
- 124) Some time ago the government of China required many highly skilled technicians and scientists to engage in unskilled agricultural labour in order to develop "proper social attitudes." This policy probably caused China to produce
  - A) inside its production possibilities frontier.
  - B) inside its production possibilities frontier with respect to food, but outside with respect to high-technology goods.
  - C) at an inappropriate point along its production possibilities frontier.
  - D) outside its production possibilities frontier with respect to food, but inside with respect to high-technology goods.

Answer: A

- B)
- C)
- D)

125) Which of the following is true regarding markets?

125)

- Economists define a market as a geographic location where trade occurs.
- II. A market enables buyers and sellers to get information about each other and to buy and sell from each other.
- III. Markets coordinate decisions through prices.
  - A) I only
- B) I and III
- C) II and III
- D) I, II and III

Answer: C

Explanation: A)

- B)
- C)
- D)
- 126) If an economy is operating at a point inside the production possibilities frontier, then

126) \_\_\_

127)

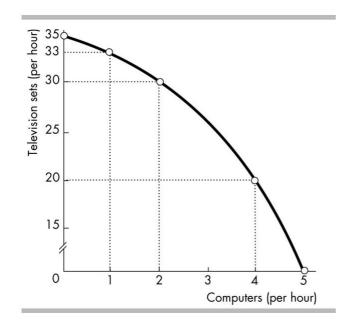

- A) society's resources are being used to produce too many consumer goods.
  - B) economic policy must retard further growth of the economy. C) society's resources are being inefficiently utilised.

  - D) the PPF curve will shift inward.

Answer: C

Explanation: A)

- B)
- C)
- D)

- 127) In the figure above, the marginal cost of the second computer is
  - A) 3 television sets.

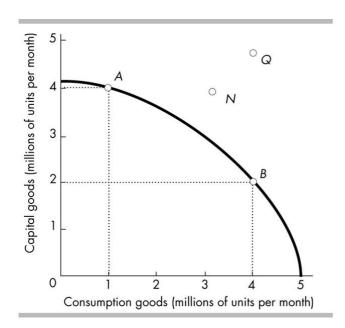

B) 5 television sets.

C) 30 television sets.

D) 2 television sets.

Answer: A

- B)
- C)
- D)

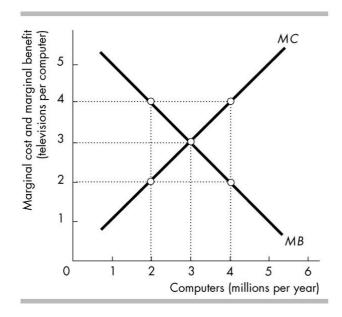

- 128) In 2006, Country X and Country Y had the same production possibilities, illustrated in the figure above. Country X chose to produce at point A, while country Y chose to produce at point B. In 2012, most likely, Country X will be at a point such as \_\_\_\_\_ while Country Y will be at a point such
  - as \_\_\_\_\_ A) *Q; N*
- B) A; B
- C) B; A
- D) N; Q

128)

Answer: A

- B)
- C) D)

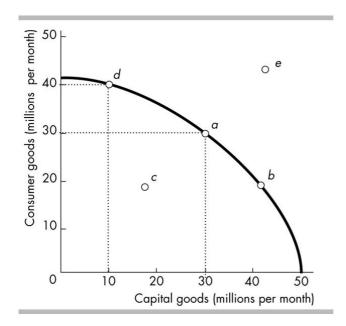

- 129) In the figure above, if 4 million computers are produced per year then the \_\_\_\_\_ should be produced to achieve the allocatively efficient use of resources.
  - A) marginal cost of a computer exceeds the marginal benefit of a computer, so fewer computers

129)

- B) marginal benefit of a computer exceeds the marginal cost of a computer, so more computers
- C) marginal benefit of a computer exceeds the marginal cost of a computer, so fewer computers
- D) marginal cost of a computer exceeds the marginal benefit of a computer, so more computers

Answer: A

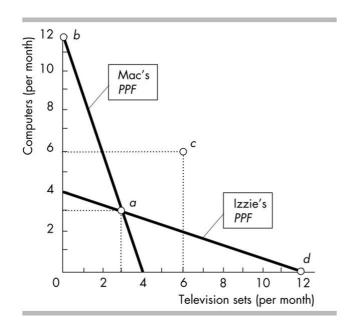

- B)
- C)
- D)

Explanation:

A)B)C)D)

130) Refer to the production possibilities frontier in the figure above. Suppose a country is producing at			130)

- 133)

- A) 6 computers in exchange for 12 TVs.
- C) 12 computers in exchange for 12 TVs.
- B) 6 computers in exchange for 6 TVs.
- D) 12 computers in exchange for 6 TVs.

Answer: B

Explanation:

- B)
- C) D)
- 134) An increase in the production of capital goods

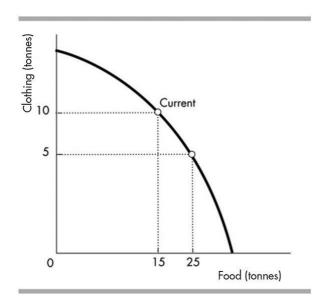

134)

- A) shifts the production possibilities frontier inward in the future.
- B) must decrease the future production of consumer goods.
- C) shifts the production possibilities frontier outward in the future.
- D) must increase the current production of consumer goods.

Answer: C

Explanation:

- A)
- B)
- C)
- D)

- 135) The above figure illustrates that if this country wishes to move from its current production point (labelled "Current") and have 10 more tonnes of food, it can do this by producing
- 135)

- A) 10 more tonnes of clothing.
- C) 5 fewer tonnes of clothing.

B) 10 fewer tonnes of clothing.

-----

D) 5 more tonnes of clothing.

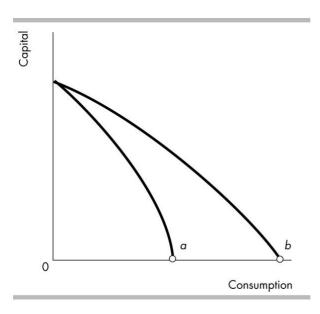

Answer: C

Explanation: A)

- B)
- C)
- D)
- 136) Tom takes 20 minutes to cook an egg and 5 minutes to make a sandwich. Jerry takes 15 minutes to cook an egg and 3 minutes to make a sandwich. Both individuals will be better off if
- 136)
- A) they don't trade as no one has the comparative advantage in either of the two goods.
- B) Jerry trades sandwiches in exchange for eggs.
- C) they trade, no matter who trades sandwiches and who eggs.
- D) Tom trades sandwiches in exchange for eggs.

Answer: B

- A)
- B)
- C)
- D)

137) The opportunity cost of producing a unit of consumption goods at point $b$ in the figure	137)	
point a.		$\overline{}$

- A) is less than at
- C) is the same as

Answer: A

Explanation: A)

- B)
- Ć)
- D)

- B) is greater than at
- D) cannot be compared with

138) Suppose that a typical German factory can produce 20 cameras or one computer in an hour, and that a typical American factory can produce 10 cameras or one computer in an hour. Germany wishes to purchase computers from the United States in exchange for cameras. What is the maximum number of cameras per computer that Germany would be willing to pay the United States?

- A) 20 cameras per computer
- C) 1 camera per computer
- Answer: A

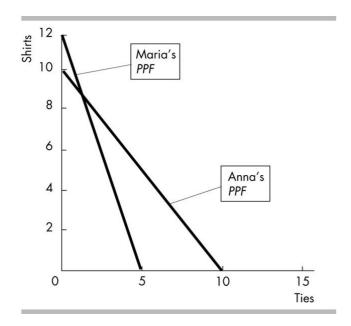

Explanation: A)

- B)
- C)
- D)

B) 2 cameras per computer

138)

D) 10 cameras per computer

Answer: D Explanation:

A) B) C) D)
