Microeconomics Canadian 14th Edition Ragan Test Bank

Exam	
Name	
MULTIPLE CHOICE. Choose the one alternative that best completes the statement or answers the question	
 1) A small landscaping firm purchases a tractor that, in one day, is capable of drilling 60 fence-post holes or removing 12 tree stumps (or some intermediate combination). For this landscaper, what is the opportunity cost of removing one extra tree stump? A) 1/12th of the cost of the tractor B) there is no opportunity cost C) drilling 5 fence-post holes D) drilling 12 fence-post holes E) 1/5 of the cost of the tractor 	1)
Answer: C Explanation: A) B) C) D) E)	
 2) Scarcity arises from limited resources. For this reason, all economic choices involve A) greed. B) an opportunity cost. C) complementary ends. D) pride. E) a value judgement. Answer: B Explanation: A) B) C) D) F) 	2)

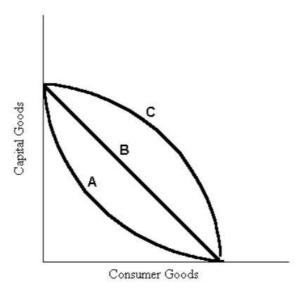

FIGURE 1-5

- 3) Refer to Figure 1-5. Suppose that the relevant production possibilities boundary is the one labelled
 - B. This boundary implies that
 - A) consumer goods are preferred to capital goods.
 - B) the concept of opportunity cost is not at work in this economy.
 - C) capital goods are preferred to consumer goods.
 - D) the opportunity cost of producing either capital goods or consumer goods does not depend on how much of each good is produced.
 - E) in this society the resources are not efficiently employed.

Answer: D

- B)
- C)
- D)
- E)

With a budget of \$500 000, a school board can choose to purchase 20 000 textbooks or 2000 laptop computers (or some intermediate combination) for use in classrooms.

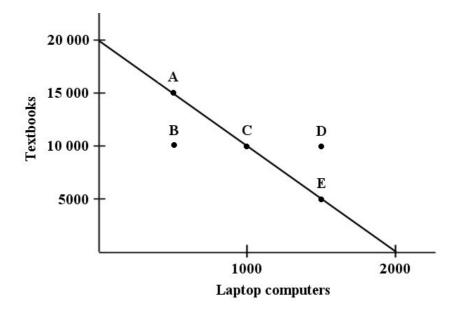

Figure 1-2

- 4) Refer to Figure 1-2. Suppose the school board chooses to allocate all \$500 000 to the purchase of laptop computers. What is the opportunity cost of this entire purchase?
- 4) _____

- A) The opportunity cost is \$0.
- B) The opportunity cost is 20,000 textbooks.
- C) There is no opportunity cost because the purchase was made within the available budget.
- D) The opportunity cost is 2000 laptops.
- E) The opportunity cost is uncertain.

Answer: B

Explanation: A)

B)

D)

C) D)

E)

5) Economists usually assume that households and firms, respectively, maximize

5)

- A) savings and profits.
- B) expenditures and profits.
- C) utility and profits.
- D) income and sales.
- E) wages and revenues.

Answer: C

Explanation: A)

B)

C)

D)

Madeleine allows herself \$100 per month for purchasing coffee. The diagram below illustrates the choices available to her.

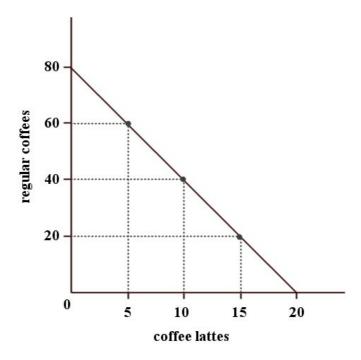

FIGURE 1-3

28) Refer to Figure 1-3. For Madeleine, the opportunity cost of one regular coffee is

28)

- A) 1/4 of a regular coffee.
- B) 80 lattes.
- C) 1/4 of a latte.
- D) 20 lattes.
- E) 4 lattes.

Answer: C

Explanation: A)

- B)
- C)
- D)
- E)

29) If there is always a three-for-one trade-off between the production of goods X and Y, then the production possibilities boundary for X and Y is

29) __

- A) a downward-sloping curve concave to the origin.
- B) a downward-sloping straight line.
- C) semi-circular.
- D) a downward-sloping straight line that is broken at one point.
- E) a downward-sloping curve convex to the origin.

Answer: B

- B)
- C)
- D)
- E)

A) eliminating the need for barter.B) increasing the value of gold.

A)

B) C) D) E)

Answer: A

Explanation:

C) reducing the shift of resources between uses.D) allowing an efficient barter system to develop.E) providing employment for coin makers.

The downward-sloping line in the diagram below shows the combinations of health care and education expenditures that the government can afford with a given amount of tax revenue.

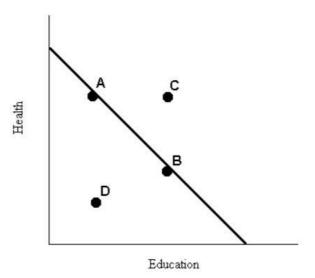

FIGURE 1-6

- 33) Refer to Figure 1-6. If the government's spending on health and education is given by point B, a move to point A must involve
- 33)

- A) less spending on education.
- B) less spending in total.
- C) more spending on education.
- D) zero opportunity cost.
- E) less spending on health.

Answer: A

- Explanation: A)
 - B)
 - C)
 - D)
 - E)

The diagram below shows two production possibilities boundaries for Country X.

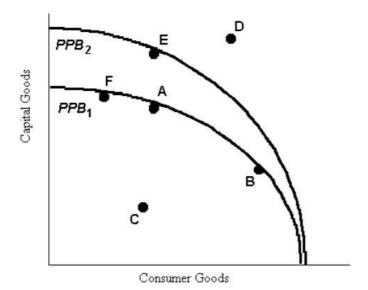

FIGURE 1-4

- 34) Refer to Figure 1-4. If Country X were producing at point C,
 - A) it is not possible to move to any point on PPB1 or PPB2 without technological progress.
 - B) the opportunity cost of moving to point A is to give up some capital goods.
 - C) the opportunity cost of moving to point B is to give up some consumption goods.
 - D) the opportunity cost of moving to point A is zero.
 - E) this is the maximum output possible from given resources.

Answer: D

Explanation:

- A)
- B)
- C)
- D)
- E)
- 35) Refer to Figure 1-4. Suppose that Country X is currently producing at point E. Country X could achieve production at point D if
- 35)

34)

- A) firms reduced output of capital goods.
- B) the given resources were fully employed.
- C) sufficient improvements in technology occurred in either the capital goods industry or the consumer goods industries.
- D) the given resources were more efficiently employed.
- E) the prices of capital goods and consumption goods fell.

Answer: C

- B)
- C)
- D)
- E)

36) If an economy exhibits the specialization of labour, we know that	36)	
A) each worker is self-sufficient.		
B) most production is artisanal in nature.		
C) job security is ensured.		
D) a barter economy is more suitable.		
E) different individuals are producing different products.		
Answer: E		
Explanation: A)		
B)		
C)		
D)		
E)		
37) Consider a production possibilities boundary showing the possible combinations of military g		
and civilian goods that a country can produce. Suppose that the country is currently at a point		
the boundary. If the production of military goods is increased, the production of civilian good	s will	
necessarily		
A) increase.		
B) increase at a decreasing rate.C) decrease.		
D) increase at a increasing rate.		
E) remain the same.		
Answer: C		
Explanation: A)		
B)		
C)		
D)		
E)		
38) During economic recessions, the opportunity cost of going to university because the	38)	
wages a student can expect to earn working in the best alternative		
A) decreases; decrease		
B) remains the same; remain the same		
C) decreases; increase		
D) increases; decrease E) increases; increase

	E)	
43) In command e	conomies, economic behaviour is	43)
A) largely a	ffected by elements of tradition and market incentives.	,
B) based pr	imarily on custom and habit.	
C) directed	by individual self interest.	
D) random	and unpredictable.	
E) largely d	etermined by a central authority.	

Answer: E Explanation:

A)B)C)D)

With a budget of \$500 000, a school board can choose to purchase 20 000 textbooks or 2000 laptop computers (or some intermediate combination) for use in classrooms.

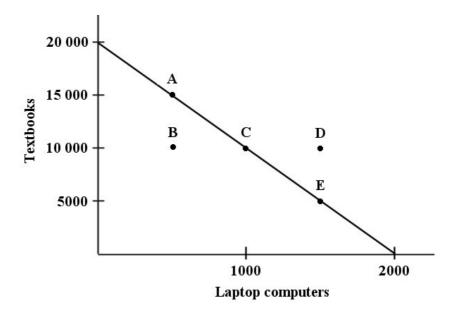

Figure 1-2

44) Refer to Figure 1-2. For the school board, what is the opportunity cost of one additional textbook?

- A) 2000 laptops
- B) 1000 laptops
- C) 1/100 of a laptop
- D) 1/1000 of a laptop
- E) 1/10 of a laptop

Answer: E

Explanation:

- A)
- B)
- C)
- D)
- E)

45) In traditional economies, economic behaviour is

44)

45)

- A) affected by elements of tradition, government command, and market incentives.
- B) directed only by self interest.
- C) random and unpredictable.
- D) largely determined by a central authority.
- E) based primarily on custom and habit.

Answer: E

- A)
- B)
- C)
- D)
- E)

46)	46) Suppose Andrea has a job that pays her \$25 000 per year (after taxes). She is considering quitting her job and going to university full time for four years. Tuition fees and books will cost \$12 000 per year. Living expenses in either situation will cost \$10 000 per year. What is the opportunity cost of Andrea's four-year university degree?			46)			
	A) \$188 000		B) \$100 000	C) \$120 000	D) \$88 000	E) \$148 000

The diagram below shows two production possibilities boundaries for Country X.

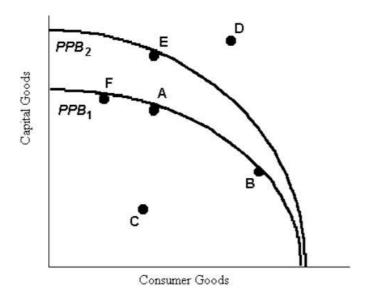

FIGURE 1-4

49) Refer to Figure 1-4. At point B,

49)

- A) the opportunity cost of producing an extra unit of consumer goods is higher than at point A.
- B) the price of consumer goods is equal to the price of capital goods.
- C) the opportunity cost of producing an extra unit of capital goods is higher than at point A.
- D) the price of capital goods is higher than the price of consumer goods.
- E) Country X is producing too many consumer goods and too few capital goods.

Answer: A

- A)
- B)
- C)
- D)
- E)

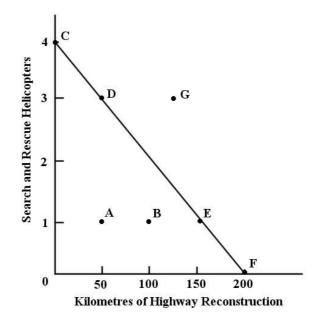

FIGURE 1-1

With a budget of \$200 million, the government can choose to purchase 4 helicopters or repair 200 km of highway.

50) Refer to Figure 1-1. If the government chooses to allocate all \$200 million to highway repair, we can	50)	
say that	_	
A) the opportunity cost of the highway repair is uncertain.		
B) there is no opportunity cost involved because the government has achieved its objectives.		

- C) the opportunity cost of the highway repair is \$0.
- D) there is no opportunity cost involved because the government stayed within its budget.
- E) the opportunity cost of the highway repair is 4 search and rescue helicopters.

Answer: E
Explanation: A)
B)

C) D) E)

51) A modern economy like Canada's is largely organized by

51)

A) benevolent individuals pursuing the public interest.

- B) individuals forming cooperative enterprises and labour unions.
- C) individuals following their own self interest, doing what seems best for themselves.
- D) governments at all levels coordinating the activities of firms and citizens.
- E) the self-interested behaviour of a small number of individuals.

A) contract.	B) explode.	C) stop.	D) expand.	E) run over.	

B) explode.

Answer: A

Explanation: A)

B)

C)

D)

- A) tariffs and trade barriers
- B) the decline in the relative importance of manufacturing
- C) the decreased importance of agriculture
- D) reductions in transportation and communication costs
- E) the shift toward a market economy in China

Answer: D

Explanation:

- A)
 - B)
 - C)
 - D)

E)

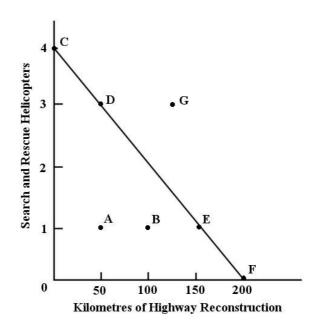

FIGURE 1-1

With a budget of \$200 million, the government can choose to purchase 4 helicopters or repair 200 km of highway.

57) Refer to Figure 1-1. For the government, the opportunity cost of one kilometre of highway repair is

57)

- A) 1 search and rescue helicopter.
- B) 1/50 of a search and rescue helicopter.
- C) 1/100 of a search and rescue helicopter.
- D) 1/10 of a search and rescue helicopter.
- E) 1/2 of a search and rescue helicopter.

Answer: B

- A)
- B)
- C)
- D)
- E)

58) Karl Marx argued that	58)
 A) technological change was not important in improving living standards. B) centrally planned economies could provide a more equitable distribution of total output than capitalist economies. 	
 C) benevolence, not self-interest, produced an effective economic order. D) the unfettered market system driven by self-interest leads to the best social outcome. E) a free-market system would produce a low level of total output. 	
Answer: B	
Explanation: A) B) C) D) E)	
59) A greater specialization of labour leads to which of the following major results?	59)
A) the circular flow of income contracts B) the overall output of the economy declines C) each worker must become more self-sufficient D) there is an increased need for government to intervene in the marketplace E) there is a greater need for trade	, <u> </u>
Answer: E	
Explanation: A)	
B)	
C) D)	
E)	
60) Which of the following statements best describes a barter system of exchange?	60)
A) It does not involve the double coincidence of wants.B) It involves the trading of goods directly for other goods.	
C) It developed late in history.	
D) It is the most efficient form of exchange.	
E) It requires the use of money.	
Answer: B Explanation: A)	
B)	
C)	
D)	
E)	

61)	indicates A) the use of B) increasing C) decreasin D) an unfair	roduction possibilities boundary is drawn as a straight (downward-sloping) line it the scarce resources in an economy. If the scarce resources in an economy of either good, gopportunity cost of producing more of either good, distribution of resources in an economy. Opportunity cost of producing more of either good.	61)
	Answer: E Explanation:	A) B) C) D) E)	
62)	arable land in s Quebec. Each o A) a commo B) goods and C) an econor	d services. mic service. f production.	62)
	Answer: D Explanation:	A) B) C) D) E)	

The diagram below shows two production possibilities boundaries for Country X.

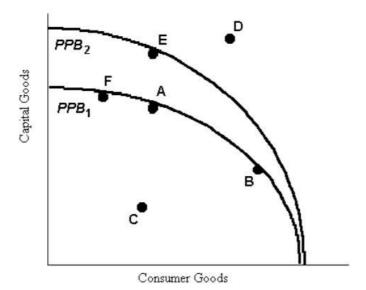

FIGURE 1-4

63)

64)

- 63) Refer to Figure 1-4. If Country X, constrained by the production possibilities boundary PPB₁, is producing the combination of goods indicated at point F, it can produce more consumer goods by moving to one of the points
 - A) A, B, or C.
 - B) A, B, C, D, or E.
 - C) A or E.
 - D) A or B, but not C.
 - E) D or E

Answer: A

Explanation: A)

- B)
- C)
- D)
- E)
- 64) Refer to Figure 1-4. Growth in the country's productive capacity is illustrated by
 - A) a movement from a point inside the boundary such as C to the boundary.
 - B) a single point such as A on the boundary.
 - C) a point like D outside the boundary.
 - D) the movement between points on a given boundary.
 - E) an outward shift of the boundary, for example from PPB1 to PPB2.

Answer: E

- B)
- C)
- D)
- E)

Madeleine allows herself \$100 per month for purchasing coffee. The diagram below illustrates the choices available to her.

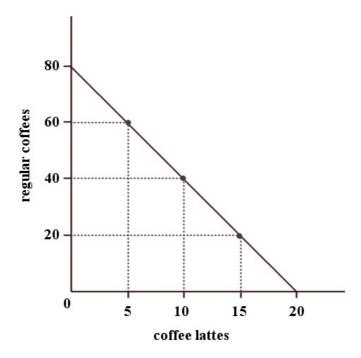

FIGURE 1-3

65)

66)

- 65) Refer to Figure 1-3. Which of the following combinations of regular coffees and lattes is affordable over the one-month period, given Madeleine's budget?
 - A) 15 lattes and 30 coffees
 - B) 16 lattes and 16 coffees
 - C) 20 lattes and 80 coffees
 - D) 4 lattes and 66 coffees
 - E) 8 lattes and 50 coffees

Answer: B

Explanation: A)

B)

C)

D)

E)

- 66) Income redistribution in a mixed economy
 - A) risks reducing individual incentives to work and produce.
 - B) is supported by all individuals.
 - C) is only accomplished through government intervention.
 - D) is not allowed.
 - E) rarely occurs.

Answer: A

Explanation: A)

B)

C)

D)

The downward-sloping line in the diagram below shows the combinations of health care and education expenditures that the government can afford with a given amount of tax revenue.

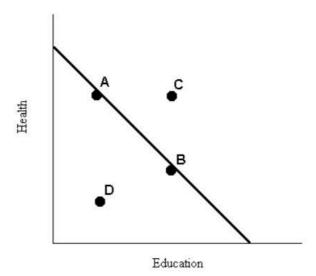

FIGURE 1-6

67)

68) ____

- 67) Refer to Figure 1-6. Suppose the government's current spending is shown by point D. In this case,
 - A) the government should spend its total budget so as to get to point B, since more health spending and more education spending are both clearly desirable.
 - B) the prices of education and health care have increased beyond the government's ability to
 - C) more education expenditures can be achieved only by sacrificing some health expenditures.
 - D) the government is not spending its total budget.
 - E) more health expenditures can be achieved only by sacrificing some education expenditures.

Answer: D

Explanation: A)

- B)
- C)
- D)
- E)
- 68) Behaviour in free-market economies is
 - A) based primarily on custom and habit.
 - B) determined by a central authority.
 - C) random and unpredictable.
 - D) mostly affected by elements of tradition and government command.
 - E) mostly directed by self interest.

Answer: E

- B)
- C)
- D)
- E)

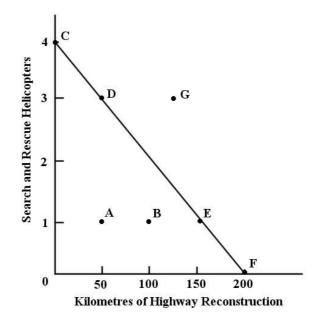

FIGURE 1-1

With a budget of \$200 million, the government can choose to purchase 4 helicopters or repair 200 km of highway.

69) Refer to Figure 1-1. For the government, the opportunity cost of one search and rescue helicopter is	69)	
A) 0 kilometres of highway repair.	_	
B) 200 kilometres of highway repair.		
C) 150 kilometres of highway repair.		
D) 100 kilometres of highway repair.		
E) 50 kilometres of highway repair.		
Answer: E		

Explanation: A)

B)

C)

D)

E)

70) The barter system of exchange is inefficient because

70)

- A) bargaining power is unequal between rich and poor.
- B) "fair" values cannot be defined without the use of money.
- C) markets do not exist.
- D) exchange partners need to know each other.
- E) the double coincidence of wants may not exist.

Answer: E

Explanation: A)

, ı)

B)

C)

D)

71) A basic underlying point in economics is that	71)
A) governments should never interfere in the workings of a market economy.	
B) people have unlimited wants in the face of limited resources.	
C) people have limited wants in the face of limited resources.	
D) governments should satisfy the needs of the people.	
E) there are unlimited resources.	
Answer: B	
Explanation: A)	
B)	
C)	
D)	
E)	
72) With reference to the circular flow of income, how is the ellection of recourses largely decided?	72)
72) With reference to the circular flow of income, how is the allocation of resources largely decided? A) by central authorities only	72)
B) by central authorities and firms only	
C) by individuals only	
D) by firms and households acting independently	
E) by political parties and firms only	
Answer: D	
Explanation: A)	
B)	
C)	
D)	
E)	
<i>-</i> ,	
73) A country's production possibilities boundary shows that	73)
A) when a society combines its resources inefficiently, it cannot produce more of one good	
without producing less of the other good.	
B) all points inside the boundary are preferred to all points on the boundary.	
C) when a society combines its resources efficiently, it cannot produce more of one good without	
producing less of the other good.	
D) when a society combines its resources efficiently, it is always possible to produce more of all	
goods.	
E) the supply for goods always exceeds the demand.	
Answer: C	
Explanation: A)	
B)	
C)	
D)	
E)	

- 74) When discussing types of economic systems the Canadian economy is best described as
- 74)

- A) a command economy.
- B) traditional.
- C) a mixed economic system.
- D) primarily a public ownership economy.
- E) primarily free-market decision making.

Answer: C

Explanation: A)

- B)
- D)
- C) D)
- É)

Madeleine allows herself \$100 per month for purchasing coffee. The diagram below illustrates the choices available to her.

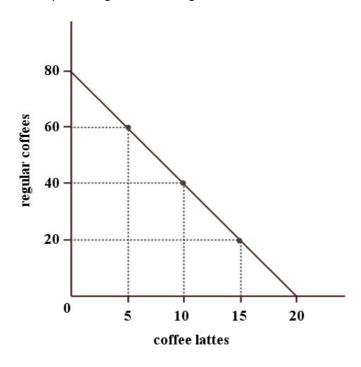

FIGURE 1-3

- 75) Refer to Figure 1-3. If Madeleine chooses to allocate all \$100 to buying lattes, we can say that her opportunity cost in one month is
- 75) ___

- A) 80 cups of regular coffee.
- B) zero because she stayed within her budget.
- C) 20 cups of regular coffee.
- D) zero because she bought what she desired.
- E) 40 cups of regular coffee.

Answer: A

- B)
- C)
- D)
- D)

With a budget of \$500 000, a school board can choose to purchase 20 000 textbooks or 2000 laptop computers (or some intermediate combination) for use in classrooms.

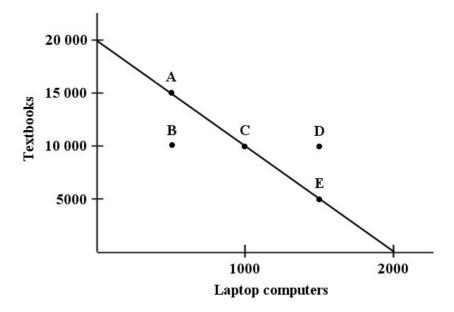

Figure 1-2

- 85) Refer to Figure 1-2. For the school board, what is the opportunity cost of one additional laptop computer?
- 85)

- A) 0 textbooks
- B) 1/10 of a textbook
- C) 10 textbooks
- D) 20 textbooks
- E) 2000 textbooks

Answer: C

Explanation: A)

B)

C)

D)

E)

86) The key decision makers in a market economy are

86)

- A) governments and all institutions under government control.
- B) corporations and governments.
- C) individual citizens, non-profit organizations, and the Bank of Canada.
- D) large corporations and labour organizations.
- E) households, firms, and government.

Answer: E

Explanation: A)

B)

C)

D)

E)

- 87) Which of the following represents a typical "real" flow (as opposed to a financial flow) in the circular flow of income?
- 87)

- A) money payments going from consumers to producers
- B) money payments going from producers to consumers
- C) factor services going from producers to consumers
- D) goods going from consumers to producers
- E) goods going from producers to consumers

Answer: E

Explanation: A)

B)

C)

D)

E)

Madeleine allows herself \$100 per month for purchasing coffee. The diagram below illustrates the choices available to her.

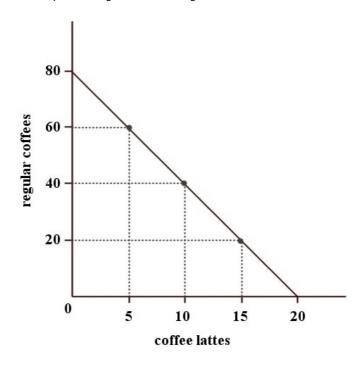

FIGURE 1-3

88) Refer to Figure 1-3. For Madeleine, the opportunity cost of one latte is

88

- A) 4 regular coffees.
- B) 8 regular coffees.
- C) 1/4 of a regular coffee.
- D) 80 regular coffees.
- E) 1/4 of a latte.

Answer: A

Explanation: A)

B)

C)

D)

E)

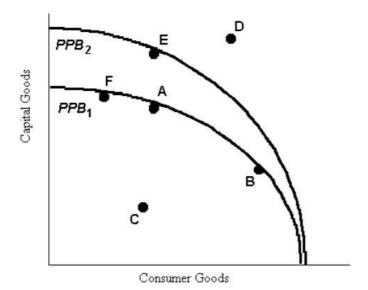

FIGURE 1-4

- 89) Refer to Figure 1-4. A shift of the production possibilities boundary from *PPB*₂ implies
- 89)

- A) that technology in the consumer goods industry has improved.
- B) that technology in the capital goods industries has improved.
- C) an inevitable decrease in total output.
- D) a movement from full employment to some unemployment.
- E) that if point E is the new choice of outputs, productivity has increased in the consumer goods industry.

Answer: B

Explanation: A)

- , v)
- B)
- C)
- D)
- E)
- 90) Comparison of economic systems indicates that

90)

- A) most countries have mixed economies.
- B) most nations have either a purely socialist economy or a purely capitalist economy.
- C) all countries have largely traditional economies.
- D) socialist economies are clearly superior in producing consumer goods.
- E) capitalist economies are clearly superior in distributing income.

Answer: A

Explanation: A)

- B)
- C)
- D)
- D)
- E)

The table below illustrates that, in one day, Tristan can produce either 12 fishing lures or mow 3 lawns, while Thomas can produce either 6 fishing lures or mow 6 lawns.

	Fishing Lures	Mowed Lawns
Tristan	12	3
Thomas	6	6

TABLE 1-1

91) ____ 91) Refer to Table 1-1. What is Thomas's opportunity cost of producing one mowed lawn? A) 1/6 fishing lure B) 0 fishing lures

- C) one fishing lure D) 6 fishing lures
- E) 12 fishing lures

A) B) C) D) E)

Answer: C Explanation:

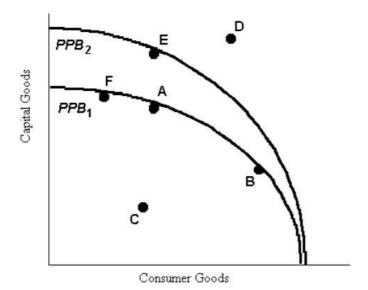

FIGURE 1-4

- 92) Refer to Figure 1-4. If Country X is currently producing at point A, it could move to point B if
 - A) the cost of producing capital goods were to increase.
 - B) some resources were switched from the consumer goods industries to the capital goods industries.
 - C) the cost of producing consumer goods were to increase.
 - D) some resources were switched from the capital goods industries to the consumer goods industries.
 - E) Country X is no longer able to produce the quantity of capital goods at point A.

Answer: D

Explanation: A)

- B)
- C)
- D)
- E)
- 93) In recent years, several large Canadian-owned mining and resource companies have been sold to foreign owners. The immediate effect on Canada's production possibilities boundary is
- 93)

92)

- A) a movement along.
- B) a shift inward.
- C) no change.
- D) a shift outward.
- E) a movement to a point beyond the boundary.

Answer: C

Explanation:

- A)
- B)
- C)
- D)
- E)

94) Economics can best be described as	94)
 A) the study of how a society <i>ought</i> to allocate its resources. B) the study of the use of scarce resources to satisfy unlimited human wants. C) a normative science. D) the application of sophisticated mathematical models to address social problems. E) the study of how to reduce inflation and unemployment. 	
Answer: B Explanation: A) B) C) D) E)	
 95) Consider Canada's production possibilities boundary. Suppose a scientific breakthrough leads to a lower-cost method of producing battery-operated cars in Canada. The likely effect would be to move Canada's current production A) to a point inside its new production possibilities boundary. B) above the level of U.S. production. C) to a point beyond its new production possibilities boundary. D) possibilities boundary outward. E) possibilities boundary inward. 	95)
Answer: D Explanation: A) B) C) D) E)	
 96) A farmer selling tomatoes and corn at a roadside, and a currency trader in Hong Kong, are each participating in A) an involuntary transaction. B) international trade. C) barter. D) a market. E) flexible manufacturing. 	96)
Answer: D Explanation: A) B) C) D) E)	

With a budget of \$500 000, a school board can choose to purchase 20 000 textbooks or 2000 laptop computers (or some intermediate combination) for use in classrooms.

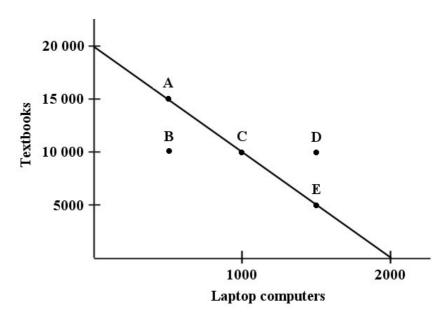

Figure 1-2

97) Refer to Figure 1-2. What is the price of a laptop computer in this example?

97)

A) \$25

B) \$40

C) \$50

D) \$100

E) \$250

Answer: E

Explanation: A)

B)

C)

D)

E)

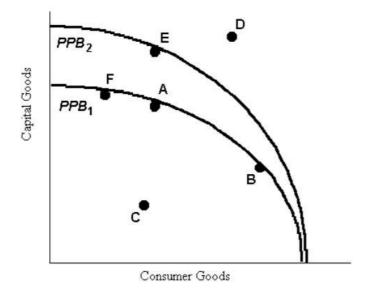

FIGURE 1-4

98)

- 98) Refer to Figure 1-4. The production possibilities boundaries are drawn concave to the origin. What does this shape of the PPB demonstrate?
 - A) the increasing opportunity cost of producing more of either good
 - B) the decreasing opportunity cost of producing more of either good
 - C) the unfair distribution of resources in the economy
 - D) the scarcity of resources in the economy
 - E) the constant opportunity cost of producing more of either good

Answer: A

- Explanation: A)
 - B)
 - C)
 - D)
