- A) Recording interest earned that will be received in the next period.
 - B) Recording operating expense incurred but not yet paid.
 - C) Recording salary expense incurred but not yet paid.
 - D) Recording the pre-payment of two years' worth of insurance.

- A) \$15,400
- B) \$19,900
- C) \$900
- D) \$20,800

Answer: A

Explanation: Assets (\$8,800 + \$3,000 + \$16,000) = Liabilities (\$2,500) + Equity; Equity = \$25,300; \$25,300 = Common Stock + Retained Earnings (\$5,400 + \$19,000 - \$14,500); \$25,300 = Common Stock + \$9,900; Common Stock = \$15,400

- C) \$1,400 of supplies; \$3,200 of supplies expense
- D) \$1,600 of supplies; \$3,400 of supplies expense

Answer: C

- A) Expenses for the year exceeded revenues
- B) The company did not have enough cash to pay its expenses
- C) Total equity decreased
- D) Liabilities increased during the year

 - B) Adjust accounts, record transactions, close temporary accounts, prepare statements.
 - C) Record transactions, adjust accounts, prepare statements, close temporary accounts.
 - D) Adjust accounts, prepare statements, record transactions, close temporary accounts.

Answer: C

	Assets	=	Liab.	+	Equity	Rev.	-	Exp.	=	Net Inc.	Cash Flow
A.	NA	=	NA	+	NA	NA	-	NA	=	NA	+OA
B.	+	=	+	+	NA	NA	-	NA	=	NA	+OA
C.	NA	=	+	+	-	NA	-	+	=	-	NA
D.	All of these could represent the effects of a claims exchange transaction.										

- A) Option A
- B) Option B
- C) Option C
- D) Option D

Answer: C

Explanation: A claims exchange transaction will result in either an increase in liabilities and a decrease in equity or a decrease in liabilities and an increase in equity. - A) Issued common stock.
- B) Paid a cash dividend to stockholders.
- C) Received a payment on accounts receivable.
- D) Accrued salary expense.

Answer: A

Explanation: Issuing common stock is an asset source transaction that increases assets (cash) and increases equity (common stock). Paying a cash dividend is an asset use transaction, receiving a payment on accounts receivable is an asset exchange transaction, and accruing salary expense is a claims exchange transaction.

- A) Purchased machine for cash.
- B) Recorded insurance expense at the end of the period.
- C) Invested cash in an interest earning account.
- D) Accrued salary expense at the end of the period.

Answer: B

Explanation: Recording insurance expense at the end of the period is an asset use transaction that decreases assets (prepaid insurance) and decreases equity (insurance expense decreases retained earnings). Purchasing a machine for cash and investing cash in an interest earning account are asset exchange transactions. Accruing salary expense is a claims exchange transaction.

Answer: A

Explanation: Recognizing revenue earned on a contract where the cash had been collected at an earlier date is a claims exchange transaction that decreases liabilities (unearned revenue) and increases equity (revenue increases retained earnings). Purchasing a machine for cash and investing in an interest earning account are asset exchange transactions. Issuing common stock is an asset source transaction.

 - B) Accrued salary expense at the end of the accounting period.
 - C) Collected cash on accounts receivable.
 - D) Recognized revenue earned on a contract where the cash had been collected at an earlier date.

Answer: C

Explanation: Collecting cash on accounts receivable is an asset exchange transaction that increases one asset (cash) and decreases another asset (accounts receivable). Issuing common stock is an asset source transaction. Accruing salary expense and recognizing revenue earned on a contract where the cash had been collected at an earlier date are both claims exchange transactions.

- _____ d) End-of-period adjustments often affect cash flows.
- _____ e) Failure to record accrued salaries at the end of the year will cause reported net income to be higher than it should have been.

Answer: a) This is false. Recording usage of supplies decreases assets (supplies) and increases expense, which decreases equity.

b) This is true. Accruing salaries increases a liability (salaries payable) and decreases equity (salaries expense decreases retained earnings).

c) This is false. Recording service performed on a prepaid contract involves a decrease in liabilities (unearned revenue) and an increase in revenue, which increases equity. Assets are not affected.
